Vegetables include potatoes and sweet potatoes. Hay and forage include \$206,934,650 of corn cut for forage.

The 1919 figures include the value of corn cut for forage, which crop was not reported to any extent in 1909. The value of corn cut for forage in the United States in 1919 was \$206,934,650, or 8.2 per cent. of the total value of hay and forage.

Forest Products of Farms—Value of in 1919: Sold, or cut and held for sale, \$217,716,046; used on farm, \$175,605,782.

Nursery and Greenhouse Products—Value of in 1919: Nursery, \$20,434,389; greenhouse, \$77,380,230, of which \$61,892,352 was from flowers and flowering plants, and \$15,487,878 from vegetables and vegetable plants.

In New York State, nursery products sold for \$2,310,253; greenhouse products for \$8,689,325.

## INCREASE OF VALUE IN FARM CROPS.

The total value of farm crops harvested in 1919 (excluding forest products and nursery and greenhouse products) was \$14,755,364,894, as against \$3,231,850,683 in 1909. These figures represent an increase of \$9,523,514,211, or 182 per cent., for the decade. This increase in the value of farm crops is due mainly to the fact that the prices of crops were

unusually high in the year 1919. A tabulation of the quantities of all the important crops harvested in 1919, with values computed on the basis of 1909 prices, indicates an increase of 8.6 per cent. So much of the increase in value, therefore, may be attributed to increased production and the remainder to higher prices.

## VALUE OF FARM CROPS IN 1909.

(Figures represent dollars.)

Cereals, total, 2,655,539,714; corn, 1,438,553,919; wheat, 657,656,801; oats, 414,697,422; other cereals, 154,631,572.

Hay and forage, excluding corn cut for forage, \$26,401,175.

Vegetables, total, 418,110,154. Potatoes (white),

166,423,910; sweet potatoes and yams, 35,429,176; other vegetables, 216,257,068.

Tobacco, 104,302,856.

Cotton (including cottonseed), \$24,696,287.

All other crops, 392,300,497.

Total of all crops, 5,231,850,683.

Of the 1921 cotton crop, 2,198,158 bales (500-lbs.) were produced in Texas; 813,014 in Mississippi; 796,936 in Arkansas; 787,084 in Georgia; 776,222 in North Carolina; 754,560 in South Carolina; 580,222 in Alabama; 481,286 in Oklahoma; 301,950 in Tennessee; 278,858 in Louisiana; 69,931 in Missouri; 45,323 in Arizona; 34,109 in California; 16,368 in Virginia; 10,905 in Florida; and 8,715 in other States, including Kentucky and New Mexico, and the lint production of Arizona,

California, Florida, Illinois, and Missouri. In 1921 the cotton mills in the United States consumed 5,408,979 bales of 500 lbs. of which the Southern mills used 3,151,954 bales.

There are over 36,000,000 active cotton spindles in mills in the United States.

Production of cotton seed oil in 1921 was 123,815,000 gallons; cake and meal, 1,352,000 short tons.

Loss of cotton, due to boll weevil insects in the fields, in 1921 was 6,277,000 bales.

Production figures exclude pulled wool, estimated at 42,500,000 lbs. for 1922.

The number of woollen mills in the United States exceeds 1,000, and there are about 80,000 looms, over 8,000 of which are used in making carpets and

rug. The number of active spinning spindles exceeds 4,000,000. Pretty evenly divided between woollens and worsteds. There are usually from 250,000 to 500,000 falc spindles.

The 1922 U. S. cane sugar production figures do not include Texas.

Sugar Consumption in the U. S.—(1921), 10,548,451,000 lbs. (97.8 lbs. per capita, as against

58.8 lbs. per capita in 1900). The average net cash price of granulated sugar in 1921 was 6.2 cents a pound.

## IMPORTS AND EXPORTS OF SUGAR, ETC., IN DETAIL.

(For year ended June 30, 1922. Values are in parentheses.)

Imports—Cane sugar (from Cuba), 7,720,255,237 lbs. (\$171,300,590); cane sugar (from Philippines), 538,468,567 lbs. (\$21,656,224); cane sugar (from Dominica), 93,067,270 lbs. (\$2,502,168); cane sugar (from Central America), 43,738,907 lbs. (\$1,219,396); molasses, 87,911,060 gals. (\$1,673,354); beet sugar, 29,387 lbs. (\$1,164); maple sugar and maple syrup, 3,672,489 lbs. (\$341,861); sugar candy and confectionery, 870,305 lbs. (\$261,872).

Exports of domestic—sugar, 2,002,038,450 lbs. (\$77,447,331); molasses, 5,774,935 gals. (\$696,916); confectionery, including sweet chocolate, \$1,718,665; chewing gum, \$824,186; maple sugar and maple syrup (Jan. 1 to June 30, 1922), 242,056 lbs. (\$46,214); honey, 2,406,822 lbs. (\$261,899); glucose (corn syrup), 258,447,893 lbs. (\$6,109,862); grape sugar (corn sugar), 15,534,234 lbs. (\$448,244); syrup, 6,717,062 gals. (\$1,808,768).

## THE SUGAR INDUSTRY IN THE U. S.

Practically all of the cane sugar is manufactured in La. Beet sugar is manufactured in Cal., Mich. Ohio, Utah and Wis., and other States, including Col., Idaho, Ill. and Neb.

Primary horsepower, 43,397.

## TYPES OF AMERICAN TOBACCO.

The leading types of tobacco held are "bright yellow," grown in Virginia, North Carolina, South Carolina, and Georgia; and "burley," grown almost entirely in Kentucky, Indiana, Ohio, and West Virginia. The production of these types is greater than that of any others, and it is therefore to be expected that they would lead in the quantities held at the several report dates.

The type of tobacco ranking third, so far as quantity is concerned, is "dark fired," which is grown in the Clarksville, Hopkinsville, and Paducah districts.

Of the cigar types, "Pennsylvania" led in the quantity held for the several report dates prior to January, 1921, being closely followed in this respect by the "Ohio," "Wisconsin," and "New England" types. Since that date "Wisconsin" ranks first.

## WHAT AMERICANS DRINK.

The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals for denaturation, free of tax.

NOTE.—Owing to changes in the internal revenue laws, spirits distilled from fruits cannot be separately stated since 1918.

Domestic beer consumed in 1921 was mostly "near beer," the U. S. Government says.

Consumption per capita in gallons: Distilled spirits (1850), 2.24; (1900), 1.28; (1917), 1.62; (1918), 0.87; (1919), 0.79; (1920), 0.22. Wines (1850), 0.27; (1900), 0.39; (1917), 0.41; (1918), 0.19; (1919), 0.51; (1920), 0.12; (1921), 0.19. Malt liquors (1850), 1.58; (1900), 16.09; (1917), 18.17; (1918), 14.77; (1919), 8.00; (1920), 2.61; (1921), 2.61. Total for all kinds (1850), 4.08; (1900), 17.76; (1917), 20.20; (1918), 16.13; (1919), 9.30; (1920), 2.95; (1921), 3.12.

The Alaska seal herd (1921) numbered 587,820; 23,000 were killed for skins.

Hudson River shad fishery (1920), 199,844 lbs. (\$56,309).

The Pacific Coast salmon pack in 1920 was 6,289,321 cases. Of the total pack 4,395,937 cases came from Alaska, 1,187,616 from British Columbia, 166,520 from Puget Sound, and 481,545 from Columbia River.

The U. S. Bureau of Fisheries, in 1921, distributed 1,109,637,130 fish eggs; 3,626,262,730 small fry, and 226,589,545 fingerlings and yearlings. Chief varieties were: flounder, cod, pollock, whitefish, haddock, pike, perch, buffalo fish and cisco.

## FISH IMPORTS AND EXPORTS.

(For the year ended June 30, 1922. Values in parentheses.)

Imports—Cod, haddock, hake, and pollock (cured or preserved), 53,706,375 lbs. (\$3,241,824); fish in oil, 20,174,952 lbs. (\$3,848,400); herring, 64,073,724 lbs. (\$3,435,383); mackerel, 12,505,648 lbs. (\$938,133); all other cured, 12,240,690 lbs. (\$1,724,537); halibut (fresh), 26,536,184 lbs. (\$3,165,740); salmon (fresh), 11,699,953 lbs. (\$1,113,902); smelts (fresh), 8,273,758 lbs. (\$1,057,916); all other, fresh, 72,976,400 lbs. (\$5,122,088); crab meat, 3,677,629 lbs. (\$1,600,484); lobsters (canned), 1,894,896 lbs. (\$991,608); lobsters (all other), 7,072,424 lbs. (\$1,234,611); shrimps and turtles, \$744,295.

Exports of domestic—Salmon (canned), 69,213,635 lbs. (\$9,239,217); sardines (Jan. 1 to June 30, 1922), 7,040,787 lbs. (\$594,849); oysters, \$529,016; total fish, all kinds, \$16,846,314.

## BIRD COUNT IN THE UNITED STATES.

(By the Chief of the Bureau of Biological Survey, United States Department of Agriculture.)

It has been ascertained through these counts that birds in the agricultural districts in the Northeastern United States average slightly more than a pair to the acre, though in parts of the arid West and on the treeless plains this number dwindles to an average of half a pair, or even less, to the acre.

By far the most abundant birds in the United States are the robin and the English sparrow, but several others are common enough to make their total numbers run well into the millions. The counts so far show that the most abundant bird on farms in the Northeastern States is the robin; next to this is the English sparrow, and following these are the catbird, brown thrasher, house wren, kingbird and

bluebird, in the order named. The densest bird population anywhere recorded is near Washington, D. C., where a careful count showed, in 1915, one hundred and thirty-five pairs of forty species on five acres. Two city blocks, well furnished with trees, in the city of Alken, S. C., harbored sixty-five pairs on ten acres.

Some species of ducks and geese and other water birds, together with certain land birds, are decidedly on the increase, while others, some few, appear to be steadily decreasing; but as a whole the bird population seems to be now on the increase. A few species, however, such as the trumpeter swan, Eskimo curlew, Carolina parakeet, and the ivory-billed woodpecker seem to be rapidly decreasing in numbers and may be on the verge of extinction.

## MINERAL PRODUCING STATES AND THEIR LEADING MINERAL PRODUCTS.

| STATE.   | Principal Mineral Products.                     | STATE. | Principal Mineral Products.                   |
|----------|-------------------------------------------------|--------|-----------------------------------------------|
| Ala.     | Coal, iron ore, clay products, cement.          | Mont.  | Copper, zinc, silver, coal.                   |
| Alaska   | Copper, gold, silver, coal.                     | Neb.   | Potash, clay products; stone, sand, gravel.   |
| Ariz.    | Copper, silver, gold, lead.                     | Nev.   | Copper, silver, gold, lead.                   |
| Ark.     | Coal, bauxite, natural gas, clay products.      | N. H.  | Stone, clay products, mica, sand, gravel.     |
| Cal.     | Petroleum, gold, copper, natural gas.           | N. J.  | Zinc, clay products, cement, sand, gravel.    |
| Col.     | Coal, gold, zinc, silver.                       | N. M.  | Copper, coal, zinc, silver.                   |
| Conn.    | Clay products, stone, lime, sand, gravel.       | N. Y.  | Clay products, iron ore, cement, salt.        |
| Del.     | Stone, clay prod., sand, gravel, min. water.    | N. C.  | Stone, clay products; mica, iron ore.         |
| D. of C. | Clay prod. sand-lime brick, stone, min. wat.    | N. D.  | Coal, clay prod., min. wat., sand-lime brick. |
| Fla.     | Phosph. rock, stone, fuller's earth, clay prod. | Ohio.  | Coal, clay products, petroleum, natural gas.  |
| Ga.      | Clay products, stone, iron ore, cement.         | Okla.  | Petrol., nat.-gas gasoline, zinc, coal.       |
| Idaho.   | Lead, silver, zinc, copper.                     | Ore.   | Gold, copper, chromite, cement.               |
| Ill.     | Coal, petroleum, clay products, cement.         | Pa.    | Coal, clay products, cement, natural gas.     |
| Ind.     | Coal, cement, clay products, stone.             | R. I.  | Stone, clay products, graphite; mineral wat.  |
| Iowa.    | Coal, clay products, cement, gypsum.            | S. C.  | Clay prod., stone, phosph. rock, min. water.  |
| Kan.     | Petroleum, coal, natural gas, zinc.             | S. D.  | Gold, tungsten ore, stone, silver.            |
| Ky.      | Coal, petroleum, clay products, fluorspar.      | Tenn.  | Coal, zinc, copper, clay products.            |
| La.      | Petrol., sulphur, nat. gas, nat.-gas gasoline.  | Tex.   | Petroleum, sulphur, coal, natural gas.        |
| Me.      | Stone, lime, clay products, slate.              | Utah.  | Copper, lead, silver, coal.                   |
| Mass.    | Coal, clay prod., cement, sand and gravel.      | Vt.    | Stone, slate, talc, lime.                     |
| Mich.    | Stone, clay products, lime, sand, gravel.       | Va.    | Coal, lime, clay products, stone.             |
| Minn.    | Copper, iron ore, salt, cement.                 | Wash.  | Coal, clay products, magnesite.               |
| Miss.    | Iron ore, clay prod., cement, manganif. ore.    | W. Va. | Coal, natural gas, petroleum, clay products.  |
| Mo.      | Clay prod., sand, gravel, min. water, stone.    | Wis.   | Zinc, iron ore, stone, mineral water.         |
|          | Lead, zinc, coal, clay products.                | Wyo.   | Coal, petroleum, iron ore, nat.-gas gasoline. |

## VALUE OF MINE AND QUARRY PRODUCTS OF THE U. S.

(From data of the Geological Survey.)

| YEAR. | Metallic.   | Non-Metallic. | Other and Total. | YEAR. | Metallic.     | Non-Metallic. | Other and Total. |

Some of the 1921 figures are subject to final revision.

The canvass of sulphuric acid was discontinued in 1917, when the quantity was 1,455,257 short tons (including 119,048 tons of stronger acid), and the value was \$18,890,545.

"Unspecified" products in 1921 included the value of the following products: Bismuth, cadmium sulphide, chats, columbite, flint lining for tube mills, iron ore sold for paint, lithium minerals, marls, pebbles for grinding, selenium, silica sand and sandstone (finely ground), sodium salts (sodium carbonate, sodium sulphate, trona, and borax) from natural sources, tellurium, and an estimate of the value of miscellaneous mineral products, statistics for which are not collected annually by the Survey.

## MINING AND QUARRYING IN THE U. S.

(U. S. Census of Manufactures, 1919.)

## PRINCIPAL INDUSTRIES, BY STATES, RANKED BY VALUE OF PRODUCTS, PRODUCING ENTERPRISES.

Gold value, \$20.67 a fine ounce. Silver valued at \$1.09827 per ounce, being the average of the New York price to the end of May, when the Pittman act of \$1 per ounce became effective.

GEMS AND PRECIOUS STONES FOUND IN U. S.  
(The figures represent values.)

Corundum (sapphire) (1920) \$214,705; (1921) \$432,745.  
Turquoise (1920) \$16,865; (1921) \$6,272.  
Diamonds, opals, and topazes no longer figure to any extent in the gem discoveries in the United States.  
Quartz (1920) \$14,676; (1921) \$11,114.  
Tourmaline (1920) \$4,869; (1921) \$1,450.

IMPORTS AND EXPORTS OF PRECIOUS STONES.  
(For year ended June 30, 1922. Values are in parentheses.)

Imports—Diamonds (unset) 20,927 carats (\$458,462); diamonds (uncut) 49,288 carats (\$3,012,732); diamonds (cut but not set) 336,338 carats (\$82,215,412); pearls and parts of, not strung or set, \$6,011,932; other and total, \$47,232,364.  
Exports—Diamonds and other stones (Jan. 1 to June 30, 1922) \$14,923.

The above table does not include antimonial lead, production of which was 10,064 short tons in 1921.

## COPPER AND LEAD IMPORTS AND EXPORTS.

(Year ended June 30, 1922. Values in Parentheses.)

Imports—Copper ore, etc., 409,120 tons, containing 98,959,369 lbs. of copper (\$12,001,869); unrefined copper, 184,734,976 lbs. (\$21,750,504); refined copper (pigs, etc.), 274,181,835 lbs. (\$32,869,592). Lead ore and bullion (total) \$3,110,734.

Exports of domestic—Copper wire and cable, \$3,031,904; refined copper (pigs, etc.), 677,487,373 lbs. (\$88,782,115); total, copper and manufactures of, \$101,152,264. Lead (pigs, etc.), 83,473,774 lbs. (\$3,907,539).

Production of lead pigments and salts in the United States in 1921 totalled over 251,000 short tons, valued at \$42,000,000.

## PRODUCTION OF IRON ORE IN THE U. S.

(Ore mined; thousands of long tons.)

In addition to mines, the anthracite enterprises reported 243 breakers, 79 washeries, and 81 dredges.

Anthracite in the above table means Pennsylvania anthracite.

Non-producing enterprises, not included in the above, numbered 26, operating 24,707 acres, with \$6,617,170 capital, and \$1,252,604 expenditures in 1919.

Bituminous coal production in 1919 in short tons in chief States: Pennsylvania, 150,030,000; West Virginia, 77,617,000; Illinois, 60,331,000; Ohio, 35,141,000; Kentucky, 29,426,000; Indiana, 20,505,000; Alabama, 15,411,000; Colorado, 10,183,000.

The U. S. Census Bureau estimates that the production of coal per capita of population was, in short tons: (1879) 1.36; (1889) 2.24; (1899) 3.34; (1909) 5.01; (1919) 5.24.

PETROLEUM AND NATURAL GAS IN 1919.

Primary or crude zinc is made directly from the domestic ore. Production of secondary zinc (re-distilled, etc.) was 33,863 short tons in 1921.

Zinc ore and pig imports in the year ended June 30, 1922, totalled 1,001,322 lb.; exports totalled 38,838,914 lb., not including about 7,000,000 lb. of sheet and dust.

Figures as to wage earners represent the average number.

Primary horsepower, total for the 14 groups.—(1919) 29,507,117; (1914) 22,470,872; (1909) 18,675,376; (1904) 13,487,707; (1899) 6,097,893. The group, iron and steel and their products, in 1919 used 8,082,692 horsepower, lumber and its remanufactures, 3,417,941, textiles and their products, 3,274,090, food and kindred products, 2,571,257, paper and printing, 2,351,224; chemicals and allied products, 2,043,525, stone, clay, and glass products, 1,569,719.

Value added by manufacture.—The value of products is not always a satisfactory measure of either the absolute or the relative importance of a given industry. The best measure of an industry, from a manufacturing standpoint, is the value created by the manufacturing operations carried on within the industry. This value is calculated by deducting the cost of the materials used from the value of the products and is termed 'value added by manufacture.'

## MANUFACTURING IN THE U. S., BY INDUSTRIES, IN 1919 AND 1914.

(U. S. Census figures.)

NOTE.—The figures for some industries do not represent the total production because important establishments that manufacture the same class of products may be included in other industries.

Cloth gloves and mittens were included in "Furnishing goods, men's," in 1914.

Machine tools, and iron and steel, tempering and welding, were included in "Foundry and machine shops" prior to 1919.

## MANUFACTURING IN THE U. S., BY INDUSTRIES, IN 1919 AND 1914—Continued.

Smelting and refining, metals not elsewhere specified, was included in other classifications in 1914 and covers smelting and refining, antimony, and smelting and refining, tin, which could not be shown separately. Steel barrels, etc., was included in "foundry and machine shops" prior to 1919.

Textile machinery and parts were included in "foundry and machine shop products" prior to 1919.

"All other industries" comprises: In 1919, "straw goods, not elsewhere specified," 1 establishment; "whalebone cutting," 1; "wood carpet," 3. In 1914, "millstones," 2 establishments; "ordnance and acco-  
sories," 2; "pulp, from fibre other than wood," 3; "whalebone cutting," 1; "wood carpet," 6.

## INDUSTRIAL PLANTS BY CLASSES.

Out of a total of 290,105 manufacturing establishments in 1919, 48.9 per cent. employed only from 1 to 5 wage earners; 19.4 per cent. employed from 6 to 20; 8.7 per cent. from 21 to 50; 4.3 per cent. from 51 to 100; 3.5 per cent. from 101 to 250; 1.2 per cent. from 251 to 500; 0.6 per cent. from 501 to 1,000; and 0.4 per cent. employed over 1,000 wage earners each.

Of the total number of wage earners reported more than one-fourth (26.4 per cent.) were em-

ployed in the big establishments having over 1,000 wage earners each. More than half of the total number of wage earners (53.5 per cent.) were in establishments employing more than 250 wage earners each; 17.4 per cent. in establishments employing 101 to 250; 9.8 per cent. in establishments employing 51 to 100 each; and 19.4 per cent. in establishments employing not over 50 wage earners. The number of wage earners employed in the small establishments having from 1 to 5 wage earners each was only 3.4 per cent. of the total.

## ELECTRICAL UNITS AND THEIR POPULAR DEFINITIONS.

THE watt is the unit expressing electrical power as horsepower (hp) represents power in mechanics; it is equal to the product of the volts (pressure) times amperes (rate of flow). Thus, 2 volts times 2 amperes would give in a direct current circuit 4 watts. Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour—which means 1,000 watt hours. This may represent 1 watt for 1,000 hours or 1,000 watts for 1 hour. 746 watts are equal to one horsepower or inversely 1 kilowatt (kw) is equal to about  $1\frac{1}{3}$  horsepower.

The horsepower represents the power required to lift a weight of 33,000 pounds 1 foot in 1 minute or 550 pounds 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a conductor which offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure. For example, 1,000 feet of copper wire of No. 10 B. and S. gauge has just 1 ohm of resistance and allows the flow of 1 ampere at 1 volt.

Custom mills and mills cutting less than 50 M feet not included in 1914.

Number of active sawmills (1919) 29,534; (1909) 46,584.

## BY-PRODUCTS OF THE FORESTS.

Consumption of timber in 1919 in by-products was as follows in the United States:

Veneers, 576,581 M feet, worth \$25,104,164, of which red gum supplied 198,641 M feet, worth \$4,616,727; yellow pine, 67,071 M feet; birch, 54,079 M feet; cottonwood, 36,739 M feet; tupelo, 34,175 M feet; yellow poplar, 32,653 M feet; and white oak, 30,654 M feet. Smaller quantities were used of maple, walnut, spruce, and other woods.

Dyestuffs, 950,275 tons of wood, worth \$12,133,799, of which chestnut supplied 754,972 tons. The timber came mainly from Virginia, Tennessee and North Carolina.

Value of forest products of farms in 1919—Sold, \$217,716,046; used on farms, \$176,605,782. Area of merchantable timber on farms (1920) 35,270,527 acres (on 946,871 farms).

Messengers do not include telegraph. Many clerks probably are salesmen.

The "gainfully occupied" children consist mainly of (1) those working on their own account, such as newsboys, and (2) employees working for gain.

The total number of children gainfully occupied was only slightly more than half as large in 1920 as in 1910, the decrease having been 46.7 per cent. For the several broad groups of occupations the rates of increase or decrease were as follows: Agriculture, forestry, and animal husbandry, decrease of

54.8 per cent.; extraction of minerals, decrease of 60.2 per cent.; manufacturing and mechanical industries, decrease of 29 per cent.; transportation, decrease of 9.1 per cent.; trade, decrease of 10.4 per cent.; public service (not elsewhere classified), increase of 110.4 per cent.; professional service, decrease of 2.8 per cent.; domestic and personal service, decrease of 51.9 per cent.; clerical occupations, increase of 12.9 per cent.

## NOTES ON THE ABOVE TABLE.

For 1890 the rank of Arizona advances from 48 to 47 and that of Oklahoma advances from 46 to 39 when the population specially enumerated in Indian Territory and on Indian reservations is included.

North Dakota included in South Dakota in 1860, 1870, and 1880.

The ranking of Oklahoma in 1900 was 38 and Indian Territory 39. The present ranking for the same census is based on the combined population of Oklahoma and Indian Territory.

For 1890 the rank of South Dakota advances from 37 to 35 when the population specially enumerated on Indian reservations is included.

## U. S. POPULATION GROWTH, IN PERCENTAGES.

The growth of the country's population, exclusive of the outlying possessions, is shown in the following table:

| CENSUS YEAR. | Population. | Increase.  | Per Cent. | CENSUS YEAR. | Population. | Increase. | Per Cent. |
|--------------|-------------|------------|-----------|--------------|-------------|-----------|-----------|
| 1920.....    | 105,710,620 | 13,738,354 | 14.9      | 1850.....    | 23,191,876  | 6,122,423 | 35.9      |
| 1910.....    | 91,972,266  | 15,977,691 | 21.0      | 1840.....    | 17,069,453  | 4,203,433 | 32.7      |
| 1900.....    | 75,994,575  | 13,046,861 | 20.7      | 1830.....    | 12,866,020  | 3,227,567 | 33.5      |
| 1890.....    | 62,947,714  | 12,791,931 | 25.5      | 1820.....    | 9,638,453   | 2,398,572 | 33.1      |
| 1880.....    | 50,155,783  | 11,597,412 | 30.1      | 1810.....    | 7,239,881   | 1,931,398 | 36.4      |
| 1870.....    | 38,558,371  | 7,115,050  | 22.6      | 1800.....    | 5,308,483   | 1,379,269 | 35.1      |
| 1860.....    | 31,443,321  | 8,251,445  | 35.6      | 1790.....    | 3,929,214   |           |           |

## DENSITY OF POPULATION PER SQUARE MILE IN UNITED STATES.

(NOTE.—In computing density of population for the United States, the areas and population of Alaska, Hawaii, and Porto Rico in 1900, 1910, and 1920, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880, are not considered.)

| STATE.           | 1800. | 1810. | 1820. | 1830. | 1840. | 1850. | 1860.   | 1870.   | 1880.   | 1890.   | 1900.   | 1910.   | 1920.   |

The combined population (42,453,437) of the 10 States having more than 100 inhabitants per square mile and of the District of Columbia in 1920 constituted slightly more than two-fifths (40.2 per cent.) of the total population of the United States, while their combined land area (222,675 square miles) represented hardly more than one-fourteenth (7.5 per cent.) of the entire land area of the country. The 11 States having fewer than 10 inhabitants per square mile are all west of the Mississippi River, 8 being in the Mountain Division (constituting its entire area), 2 in the West North Central Division, and 1 in the Pacific Division. The combined land area of these 11 States (1,101,667 square miles) forms almost three-eighths (37 per cent.) of the entire land area of the United States, while their combined population (5,402,909) represented only about one-twentieth (5.1 per cent.) of the total population of the country in 1920.

## POPULATION URBAN AND RURAL.

(U. S. Census Returns. Urban includes places of 2,500 or more inhabitants.)

The total number of places of certain classes for the United States as a whole is less than the sum of the numbers shown for the individual States of the country, for the reason that each of three cities lies in two adjoining States, namely, Bristol (Va. and Tenn.), Texarkana (Ark. and Tex.), and Union City (Ind. and Ohio), and is counted in each State. Moreover, one of these cities, Bristol, lies in two geographic divisions (South Atlantic and East South Central), and is counted in both. Each of these cities consists of two incorporated municipalities, but each is from the statistical standpoint, one city and should be classed according to its total population. In each case that part of the population living in each State, whatever its number, is credited to the group of cities to which, according to its total population, the city belongs. Classed

In this manner, Bristol fell in 1920 and 1910 in the class of cities having 10,000 to 25,000 inhabitants, and in 1900 and 1890 in the 5,000-10,000 class; Texarkana fell, in 1920, 1910, and 1900, in the 10,000-25,000 class, and in 1890 in the 5,000-10,000 class; and Union City fell at each census from 1890 to 1920 in the 2,500-5,000 class.

The number of incorporated places cannot be exactly determined from the returns of the 1890 census, at which incorporated places were not distinguished from unincorporated ones, and very small places, whether incorporated or not, were not enumerated separately. It has been assumed that those places were incorporated in 1890 which were returned separately in that year and were returned in 1900 as incorporated.

The item (1920) "Incorporated places of less than 2,500" includes 48 places not returned separately.

Ratio of males to females, whole U. S., prior years: (1820) 103.3; (1830) 103.1; (1840) 103.7; (1850) 104.3; (1860) 104.7; (1870) 102.2; (1880) 103.6; (1890) 105.0.  
In 1920 in the U. S., there were 104.4 white males to each 100 white females; there were 99.2 negro males to each 100 negro females.

## DWELLINGS AND FAMILIES IN THE UNITED STATES.

The following table presents statistics as to dwellings and families for the United States as a whole for each census year from 1850 to 1920.

| CENSUS YEAR. | Population. | Number of Dwellings. | Number of Families. | Persons to a Dwelling. | Persons to a Family. | Families to a Dwelling. |
|--------------|-------------|----------------------|---------------------|------------------------|----------------------|-------------------------|
| 1850.....    | 19,987,563  | 3,362,337            | 3,598,240           | 5.9                    | 5.6                  | 1.07                    |
| 1860.....    | 27,489,561  | .....                | 5,210,934           | .....                  | 5.3                  | .....                   |
| 1870.....    | 38,558,371  | .....                | 7,579,363           | .....                  | 5.1                  | .....                   |
| 1880.....    | 50,155,788  | 8,955,812            | 9,945,916           | 5.6                    | 5.0                  | 1.11                    |
| 1890.....    | 62,622,250  | 11,483,318           | 12,690,152          | 5.5                    | 4.9                  | 1.11                    |
| 1900.....    | 75,994,575  | 14,430,145           | 16,187,715          | 5.3                    | 4.7                  | 1.12                    |
| 1910.....    | 91,972,266  | 17,805,845           | 20,255,555          | 5.2                    | 4.5                  | 1.14                    |
| 1920.....    | 105,710,620 | 20,697,204           | 24,351,676          | 5.1                    | 4.3                  | 1.18                    |

Population total, 1890, is exclusive of population (325,464) specially enumerated in Indian Territory and on Indian Reservations, for which statistics of dwellings and families are not available.

## AGES OF MARRIED PERSONS: 1920 AND 1910.

(By the U. S. Census Bureau.)

The U. S. census figures of Jan. 1, 1920, establish beyond question the interesting fact that there has been a significant increase during recent years in the proportion of married persons among the younger element of the population. The number of married men 18 years of age increased from 13,321, or 1.4 per cent. of the total male population at that age in 1910, to 24,944, or 2.7 per cent. of the corresponding total, in 1920; the number of married men 19 years of age increased from 33,566, or 3.8 per cent., to 58,909, or 6.5 per cent.; the number of married men 20 years of age increased from 77,658, or 8.6 per cent., to 105,369, or 12.5 per cent.; and the number of married men 21 years of age increased from 152,298, or 16.2 per cent., to 193,663, or 21 per cent.

The number of married women 16 years of age increased from 34,829, or 3.7 per cent. of the total female population at that age in 1910, to 41,626, or 4.2 per cent. of the corresponding total, in 1920; the number of married women 17 years of age increased from 76,683, or 8.7 per cent., to 90,930, or 9.8 per

cent.; the number of married women 18 years of age increased from 166,460, or 17 per cent., to 186,645, or 19.2 per cent.; and the number of married women 19 years of age increased from 224,976, or 25.7 per cent., to 264,507, or 28.6 per cent.

For each year of age from 15 to 34 the figures for 1920 show, without exception, in the case of each sex, an increase in the proportion married as compared with 1910, the change being especially noticeable for the younger ages. For the ages from 35 to 44 inclusive, considered as a group, there was also an increase during the decade in the proportion married, but this increase was less pronounced, especially in the case of women, than the increase shown for the younger ages. Among persons at the ages of 45 and upward, considered in three groups—45 to 54, 55 to 64, and 65 and over—the proportion married was somewhat smaller in 1920 than for the corresponding groups in 1910.

The accompanying tables show the marital condition of the population of the United States in 1920, for each specified age or age group, with comparative percentages for 1910.

## MARITAL CONDITION, BY AGE, FOR MALE POPULATION.

Original registration States include the New England States, Indiana, Michigan, New Jersey, New York, and the District of Columbia.

According to the above table a person born in Kansas has the best chance for a long life.

## U. S. POPULATION BY AGE GROUPS, 1880-1920.

(Official revised U. S. Census figures.)

THE total population according to the census, 1905,710,620, included 11,573,230 children under 5 years of age, of whom 2,257,255 were infants under 1. The percentage for infants under 1 was 2.1 in 1920, as against 2.4 in 1910. The decrease in the proportions of young children and infants between 1910 and 1920 is doubtless due, in whole or in large part, to the decline in the birth rate.

The proportion of persons at and above the age of 25 has become larger from census to census since 1880, the increase between 1910 and 1920 having been especially noteworthy in the case of persons aged 45 and over.

The number of centenarians reported in 1920 was 4,267, as against 3,555 in 1910. Of the persons reported as centenarians in 1920, 1,561 were men and 2,706 were women. The greater longevity of women is also shown by the fact that, although the males outnumbered the females in the population as a whole, the women predominated in each of the 5-year age periods above 75, in both 1920 and 1910. The census takers had no means of verifying the ages of the persons enumerated by them, and consequently the age returns, especially for centenarians, are not absolutely accurate. It is probable that the number of centenarians has been somewhat overstated at every census.

## DEFINITION OF THE TERM "CITIZEN."

The total number of citizens, male and female, in the above table, is 54,421,832. The citizens comprise all native persons and all naturalized foreign-born persons.

Under the provisions of the naturalization laws at the time the 1910 census was taken, the citizenship status of a married woman was the same as that of her husband (but if the husband had taken out his naturalization papers only, his wife was classified in the census returns as an alien); for an unmarried woman the process of naturalization was the same as for a man; a foreign-born widow or foreign-born divorced wife of a citizen of the United States retained the citizenship status of her former husband so long as she continued to reside in this country; and a foreign-born widow or foreign-born divorced wife of an alien could become naturalized in the same manner as a man.

## WOMEN LEAD IN NATURALIZATION.

In general, the citizenship returns of 1920 show a greater proportion of women naturalized than of men. The proportion of women shown as having taken out first papers was very much smaller than the proportion shown for men. This is due to the fact that a foreign-born married woman whose husband has taken out his first papers is herself treated as an alien, so that this classification in the case of women relates only to those who are not married.

FOREIGN-BORN WHITE POPULATION OF U. S. OF VOTING AGE.

(U. S. Census Returns, Jan. 1, 1920.)

## INTERSTATE MIGRATION IN THE U. S.

(By the Bureau of the Census.)

The total population of continental United States (Jan. 1, 1920), 105,710,620, comprised 71,071,013 persons who were living in the States in which they were born, 20,274,450 who were living in other States than those in which born, 13,920,692 who were born in foreign countries, and a group of 444,465 natives consisting of persons for whom the State of birth was not reported, persons born in outlying possessions or at sea under the United States flag, and American citizens born abroad. Of the total population, 67.2 per cent. were living in the States in which born, 19.2 per cent. were living in other States, 13.2 per cent. were foreign born, and four-tenths of 1 per cent. were included in the group of 444,465 above mentioned. Of the total native population, 77.8 per cent. were living in the States in which born and 22.2 per cent. were living in other States.

These figures do not indicate the amount of interstate migration within any definite period. They simply show, as regards the population of any State, the total net gain or loss up to the date of the census of 1920 resulting from the interstate migration of people living on that date.

On the basis of nativity the population of any State may be divided into three component parts, comprising natives of the State, natives of other States, and natives of foreign countries. The contrast between Eastern and Western States in this classification is rather striking. Thus, while the population of New York State is 63.9 per cent. native of the State, 8.3 per cent. native of other States, and 27.2 per cent. foreign born, the population of California is only 37 per cent. native of that State but is 39.8 per cent. native of other States and 22.1 per cent. foreign born. In the cases of several Western States besides California the population born in the State is less than the population born in other States.

The first of the accompanying tables shows, as regards any State, what proportion of the natives of that State have gone to other States to live, and also what proportion of the native American population resident in that State came from other States; the second table shows the number and proportion of the population of each State born in that State, in other States, and in foreign countries, respectively.

## NATIVE POPULATION BY STATE OF BIRTH AND STATE OF RESIDENCE: 1920.

| STATE.                    | BORN IN SPECIFIED STATE. |                        | Born and Living in Specified State. | LIVING IN SPECIFIED STATE. |                      | Gain (+) or Loss (—) Through Interstate Migration. |

## THE LYNCHING RECORD FOR 1921.

ACCORDING to the records compiled by Monroe N. Work, of the Department of Records and Research of the Tuskegee Institute, there were 72 instances in which officers of the law prevented lynchings. Of these 3 were in Northern States and 64 were in Southern States. In 1920 there were 56 such instances, 46 in Southern and 10 in Northern States. In 66 of the cases, the prisoners were removed, or the guards were augmented, or other precautions taken. In 6 instances armed force was used to repel the would-be lynchers. Concerning the cases of lynchings, there were 19 instances in which prisoners were taken from the jail and 16 instances in which, before reaching a jail, they were taken from officers of the law.

There were 64 persons lynched in 1921. Of these, 63 were in the South and 1 in the North. This is three more than the number, 61, for the year 1920. Of those lynched 59 were Negroes and 5 were whites.

## THE 1921 LYNCHING RECORD—Continued.

Two of those put to death were Negro women. Nineteen, or less than one-third, of those put to death were charged with rape or attempted rape. Four of the victims were burned to death. Three were put to death and then their bodies were burned. The charges against those burned to death were: murder, 2; rape and murder, 2.

The offenses charged against the whites were: murder, 4; rape, 1. One of the women put to death was charged with assisting a man to escape who had killed an officer of the law. The other was charged with inciting racial troubles. The offenses charged against the Negro men were: murder, 11; attempted murder, 3; rape, 16; attempted rape, 3; killing men in altercation, 4; no special charge, 3; wounding men, 4; furnishing ammunition to man resisting arrest, 2; leaders in race clash, 2; charge not reported, 3; assisting man to escape who had killed officer of law, 1; making improper remarks to woman, 1; threatening to kill another, 1; entering young woman's room, 1; insulting woman, 1; writing note to woman, 1; attacking a man and woman, 1.

The States in which lynchings occurred and the number in each State are as follows: Alabama, 2; Arkansas, 6; Florida, 6; Georgia, 11; Kentucky, 1; Louisiana, 5; Mississippi, 14; Missouri, 1; North Carolina, 4; South Carolina, 5; Tennessee, 1; Texas, 7; Virginia, 1.

## NEGRO MIGRATIONS.

The total number of Negroes for whom the State of birth was reported comprised at the U. S. Census of 1920, as shown in the table above, 8,288,492, or 80.1 per cent., who were living in the States in which born, and 2,054,242, or 19.9 per cent., who were living in other States. In 1910 the percentage living in other States was 16.6, and in 1900 it was 15.6.

The total number of Negroes reported as born in the South (that part of the country lying south of the southern boundaries of New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Missouri, and Kansas) was 9,600,943. Of these, 7,751,361, or 80.7 per cent., were living in their native States in 1920; 1,068,788, or 11.1 per cent., were living in other Southern States; and 780,794, or 8.1 per cent., were living in the North or West. The total number of Negroes reported as born in the North or West was 741,791, of whom 537,131, or 72.4 per cent., were living in their native States in 1920; 157,437, or 21.2 per cent., were living in other Northern or Western States; and 47,223, or 6.4 per cent., were living in the South. Thus the proportion of Southern-born Negroes who migrated to the North or West, 8.1 per cent., was only about one-fourth larger than the proportion of the Negroes who were born in the North or West and migrated to the South, 6.4 per cent.

The number of Negroes born in the South and living in the North or West less the number born in the North or West and living in the South was 733,571. These may be termed the survivors of the net migration of Negroes from the South to the North and West. The number of Southern-born Negroes living in the North and West increased from 440,534 in 1910 to 780,794 in 1920, forming 40.9 per cent. of the total Negro population of the North and West in the earlier year and 50.3 per cent. in the later.

The migration of Southern Negroes to Northern and Western States undoubtedly took place to a

materially greater extent between 1910 and 1920 than during the preceding decade. While it is impossible to calculate exactly the extent of this migration during the recent decade, the available data indicate that approximately 400,000, or somewhat more than one-half, of the 733,571 survivors of the net Negro migration from the South to the North and West prior to Jan. 1, 1920, left the South subsequently to April 15, 1910.

In general, the Negroes born in the North and West and in the northern part of the South have migrated to a much greater extent than those born in the far South. Considering as one group all the Negroes born in the Northern and Western States, the percentage living, in 1920, in other States than those in which born was 27.6; considering as another group those born in Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, Kentucky, Tennessee, Arkansas, and Oklahoma—i. e., the northern part of the South—the corresponding percentage was 24.8; but for the Negroes born in the far Southern States of South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas, the percentage living in States other than those in which born was only 16.2.

Although migration to the North and West has not taken place among the far Southern Negroes to the same extent, relatively to their total numbers, as among the Negroes in the northern part of the South, there was nevertheless a pronounced increase in such migration from the far South during the past decade. For example: The Negroes who were born in South Carolina and had migrated from that State to Pennsylvania increased from 2,113 in 1910 to 11,624 in 1920; those from Georgia to Pennsylvania increased from 1,578 to 16,196; those from Florida to Pennsylvania, from 393 to 5,370; those from Alabama to Ohio, from 781 to 17,588; those from Mississippi to Illinois, from 4,612 to 19,485; those from Louisiana to Illinois, from 1,609 to 8,078; and those from Texas to Missouri, from 1,907 to 4,344.

## NEGRO MIGRATION, BY STATES.

The above table covers only immigration aliens and does not include non-immigrant aliens.

In the year ending June 30, 1922, alien immigrants to the number of 13,731 were debarred, and 4,353 others were deported. Of those debarred 5,529 were paupers; 1,249 unable to read; 672 diseased; 176 criminals.

Of the immigrants deported, 434 were criminals.

## ALIEN IMMIGRATION, BY CHIEF PORTS, SINCE 1907.

### BIRTH RATE IN U. S. BIRTH REGISTRATION AREA, 1915-1920.

(By the United States Census Bureau.)

| YEAR.   | Popula-<br>tion. | Births. | Per<br>1,000<br>Pop. | YEAR.   | Popula-<br>tion. | Births.   | Per<br>1,000<br>Pop. | YEAR.   | Popula-<br>tion. | Births.   | Per<br>1,000<br>Pop. |
|---------|------------------|---------|----------------------|---------|------------------|-----------|----------------------|---------|------------------|-----------|----------------------|
| 1915... | 30,936,179       | 776,304 | 25.1                 | 1917... | 54,771,416       | 1,353,792 | 24.7                 | 1919... | 61,483,423       | 1,373,438 | 22.3                 |
| 1916... | 32,788,670       | 818,983 | 25.0                 | 1918... | 55,515,241       | 1,363,649 | 24.6                 | 1920... | 63,659,441       | 1,508,874 | 23.7                 |

Births are exclusive of still births. The birth registration area was established in 1915.

The birth rate in 1920 among the general population in the birth registration area was, as shown in the above table, 23.7 per 1,000 population. The white birth rate was 23.5; colored, 27.0. The Negro birth rate in 1920 was 26.3 per 1,000 Negro population; the death rate, 18.4 per 1,000 Negro population.

The Japanese birth rate in 1920 in the birth registration area of the United States was 65.0 per 1,000 Japanese population; the death rate was 13.9 per 1,000 Japanese population.

"It is not to be expected," says the Census Bureau, "that this rate of natural increase will be maintained year after year by the Japanese in this country. At present the age constitution of the Japanese in this country is undoubtedly most favorable for a very rapid natural increase of population, but as the years go by and our Japanese grow older this rate will undoubtedly decrease, together with the birth rate, till the latter approximates the birth rate of Japan itself, where in 1917 the official rate is given as 32.4."

### ESTIMATED POPULATION, NUMBER OF BIRTHS AND DEATHS (EXCLUSIVE OF STILL-BIRTHS) BIRTH AND DEATH RATES PER 1,000 POPULATION, DEATHS UNDER 1 YEAR OF AGE, AND INFANT MORTALITY RATES IN THE BIRTH REGISTRATION AREA, 1920.

Rhode Island was dropped from the death registration area in 1919.

In 1920, in the registration area, 82 white babies and 132 colored babies out of 1,000 of each color born died in their first year of life. In New York City the number dying in the first year of life was 83 white and 157 colored. The greatest white infant mortality was in Richmond Borough; the greatest colored, in the Bronx.

### ILLEGITIMATE BIRTHS.

The percentage of illegitimate births in 1920 in the United States was 2.27 per 100 births; percentage of white illegitimates, 1.42; percentage of native white illegitimates, 1.67; percentage of illegitimate births by foreign mothers, .052; percentage of Negro illegitimate births, 12.56.

The average number of children ever born to mothers of 1920 was 3.3; the average number of these children living was 2.9. Italian, Austrian and Hungarian mothers of 1920 had an average of 4.0

to 4.5 children each, of which 3.4 to 3.9 were still living.

The largest number of children are born to miners, metal mill workers, guards, watchmen, janitors and sextons; the smallest number to soldiers, sailors, marines, bookkeepers, policemen, designers, technical engineers, chemists, actors, architects, artists, lawyers, doctors, druggists, teachers, authors, reporters, editors, bankers and brokers, chauffeurs and electricians.

One birth in every 100 is of twins or triplets, etc.

## BIRTH RATES AMONG ALIEN WHITE MOTHERS IN U. S.

(Per 1,000 enumerated female population, by country of birth in the registration area and each registration State, 1920).

(Rates are shown in *italics* when the number of births is less than 5.)

Birth rates of colored per 1,000 enumerated female population, in the registration area, 1920—Negro, 52.8; Indian, 48.3; Japanese, 188.5; Chinese, 116.4; other colored, 126.8.

## NATIONAL GEOGRAPHIC SOCIETY, WASHINGTON, D. C.

(By the President, Gilbert Grosvenor.)

FOUNDED in 1899, "for the increase and diffusion of geographic knowledge," the National Geographic Society has filled such an important role in the encouragement of science and its application to the needs of mankind that its membership now exceeds 750,000. In the promotion of its work of increasing geographic knowledge the society pioneered in the study of Alaska and the encouragement of the opening up of that territory; supported Peary in his Polar work; investigated the problems of vulcanism and seismology at Mont Pelee, Messina and in Alaska; explored the ruins of the Inca country of the high Andes, unearthing its holy city, Machu Picchu, and the staircase farms of the Incas, which far eclipse the Hanging Gardens of Babylon; studied the history of the Ice Age, as exemplified in the glaciers of Alaska; discovered the Valley of Ten Thousand Smokes. It is now engaged in a series of excavations in Chaco Canyon, with a view to reconstructing, as far as possible, the primitive history of the pre-Columbian people of that region.

In its recognition of the services to mankind of those who labor to push back the horizons of geography, the society has awarded the Hubbard Gold Medal to Peary for his furthest North in 1906; to Amundsen for achieving the Northwest Passage and locating the North Magnetic Pole; to Gilbert for his physiographic researches; to Shackleton for his Antarctic explorations; and to Stefansson for his discovery of a hundred thousand square miles of territory in the Canadian Arctic. It also awarded special gold medals to Peary and Amundsen for their attainment of the North and South Poles respectively; and to Gen. George W. Goethals in recognition of his service to the world in the building of the Panama Canal. In its work of diffusing geographic knowledge the society relies principally on its leading publication, the National Geographic Magazine. The magazine contains some 1,400 pages of text and illustrations in the twelve numbers of each year. Some of these numbers are monographic, and have become the recognized handbook on the subjects with which they deal—like Nelson's "Larger and Smaller Mammals of North America," McCandless and Grosvenor's "Flag Number," Fuertes's "Dog Number," and Wylie's "Romance of Military Insignia."

Through the columns of more than 500 leading American daily newspapers and the large plate matter syndicates the society's geographic news bulletins are reaching to more than half the homes of the United States. These bulletins are furnished

gratis to the press, and through them the society is able to interpret the geographic and historical backgrounds that give significance to the news despatches from every corner of the globe. The United States Bureau of Education, in its promotion of the intelligent study of current events in the schools of the country, has co-operated with the society in placing illustrated editions of these bulletins in the hands of the teachers of the United States. Many State Superintendents have requested that they be furnished to every teacher in their jurisdiction.

A further educational activity undertaken by the society in recent months is its Pictorial Geography. By means of a continuing series of loose-leaf geographic text and pictures, prepared in recognition of the fact that the average map and the technical phraseology of geographies mean little to children, the society is aiming to bring them mental pictures of busy places, living peoples and beautiful landscapes and to portray to them nature's moods and processes in terms they understand and forms they enjoy. Another activity of the society in the diffusion of geographic knowledge is the publication of books, maps and monographs on subjects of first interest. Its map of the war zone in France was readily used by American officers at home and abroad; and the War Department has adopted its map of Mexico as the base for the army's military map of that turbulent country. It has recently published new maps of Europe, Africa, South America, and of the world. In 1917 the society appropriated \$20,000 and in 1920 \$13,500 out of its reserve fund, the money necessary to save from destruction the privately owned "Big Trees" in Sequoia National Park, California, and had the ground they occupy deeded in perpetuity to the United States for the benefit of posterity. More recently the society and a group of its members added a fund of nearly \$100,000 for the preservation of another large group of these big trees.

For a review of the society's scientific work in the past year reference is made to the article on "Scientific Progress in 1921," elsewhere in this ALMANAC. The officers and editorial staff are: President and Editor, Gilbert Grosvenor; Vice-President, Henry White; Vice-Director and Associate Editor, John Oliver La Gorce; Secretary, O. P. Austin; Associate Secretary, George W. Hutchinson; Treasurer, John Joy Edson; Assistant Editors, William J. Snowalter and Ralph A. Graves; Chief of Illustrations Division, Franklin L. Fisher; Chief of School Service, J. R. Hildebrand.

CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

DURING the fifteen years of its existence the Carnegie Foundation has distributed (these data are from the annual report for the year ending June 30, 1922) \$9,929,066 in retiring allowances and pensions to 1,000 persons. Of this sum \$625,000 has been paid to former teachers of Harvard, \$548,000 to former teachers of Yale, and \$464,000 to former teachers of Columbia University. Sixteen other universities have each received between one and two hundred thousand dollars. The remainder has gone to eighty different institutions. There are now operative 511 retiring allowances and 98 widows' pensions, entailing an annual expenditure of \$1,008,000. The average retiring allowance paid is \$1,649.

The total resources of the Carnegie Foundation

amount to \$26,223,000, of which \$15,192,000 belong to the permanent general endowment; \$8,535,000 to a reserve fund to be spent in the retirement, during the next sixty years, of teachers now in associated institutions; \$1,250,000 to the endowment of the Division of Educational Enquiry, and \$612,000 to a reserve fund to be expended in aiding universities and colleges to adopt the new plan of contractual annuities.

The Teachers' Insurance and Annuity Association of America, which was established by the foundation through a gift of \$1,000,000 to provide insurance and annuity protection for college teachers without overhead charges, has written 1,095 insurance policies covering \$5,578,000 of insurance and 947 annuity contracts providing \$1,165,000 annual income at retirement.

RUSSELL SAGE FOUNDATION.

(Official statement for The Almanac, as of August 1, 1922.)

The Russell Sage Foundation, 130 East 22d Street, New York City, was organized in 1907 for the improvement of social and living conditions in the United States. The endowment, about \$15,000,000, was given by Mrs. Russell Sage in memory of her husband. The Foundation is primarily an educational institution. It does not attempt to relieve individual or family need or to duplicate the work of existing social agencies. It studies and interprets facts with regard to social conditions and methods of social work, makes this information available by publications, conferences and other means of public education.

The work of the Foundation is carried on through a central office, through nine departments and through a limited number of subsidies to other organizations. The departments of the Foundation have been developed to meet the particular social needs and opportunities or to give permanent form to investigations or undertakings begun experimentally.

The Department of Recreation has worked in co-

operation with the National Community Center Association, the Recreation Committee of New York City, the Boy Scouts, Girl Scouts, Camp Fire Girls, National University Extension Association and the New York Drama League to carry out its purpose, which is that of aiding in constructive social organization of leisure time. Assistance in promoting better motion pictures, both for commercial purposes and for school, club and army and navy service has been continued.

Advisory work has been given in many States, in Canada, China, India, Japan, Cuba, Russia, Sweden, Turkey, Serbia, Uruguay and Argentina.

A free public library containing about 20,000 books and 56,000 pamphlets on social problems, is maintained by the Foundation.

The trustees of the Foundation are: Robert W. de Forest, President; Mrs. William B. Rice, Vice President; Charles D. Norton, Treasurer; John H. Finley, Louise Lee Schuyler, Mrs. Elmer J. Shepard, John M. Glenn, who is also General Director of the Foundation, Frederick A. Delano, and Dwight Morrow.

NATIONAL SHORTHAND CONTEST.

(New London, Conn., Aug. 24, 1922.)

HELD under the auspices of the National Shorthand Reporters' Association, John R. Gregg, President.

To qualify for the World's Championship, the writers must qualify with at least 95% accuracy in the three individual speeds—200 words a minute, solid matter; 240 a minute, judge's charge to the

jury, and 280 a minute, court testimony. In the contest held in 1922 only six writers qualified for the championship, which trophy was won by Nathan Behrin. Charles Lee Swem, former official reporter and personal stenographer to President Wilson, and Albert Schneider won second and third places respectively.

| NAMES OF CONTESTANTS  | Er-rors | Er-rors | Er-rors | Total    | Aver-          |
|-----------------------|---------|---------|---------|----------|----------------|
|                       | at 200. | at 240. | at 280. | Er-rors. | age Ac-curacy. |
| Nathan Behrin.....    | 4       | 8       | 7       | 19       | 99.84          |
| Charles Lee Swem..... | 16      | 19      | 12      | 47       | 98.65          |
| Albert Schneider..... | 12      | 20      | 30      | 62       | 98.36          |

| NAMES OF CONTESTANTS. | Er-rors | Er-rors | Er-rors | Total    | Aver-          |
|-----------------------|---------|---------|---------|----------|----------------|
|                       | at 200. | at 240. | at 280. | Er-rors. | age Ac-curacy. |
| John J. Daly.....     | 3       | 25      | 38      | 66       | 98.17          |
| Solomon Powsner.....  | 19      | 30      | 26      | 75       | 97.92          |
| Neale Ransom.....     | 50      | 42      | 19      | 111      | 96.92          |

Speed certificates were awarded to all writers who qualified on any of the speeds with less than 5% of errors; forty-nine certificates were awarded

as follows: To writers of the Gregg system, 24; to writers of the Pitmanic systems, 25.

JOHN FRITZ MEDAL WINNERS.

THE John Fritz Medal Board of Award—Societies represented: Amer. Soc. of Civ. Engineers, Amer. Inst. of Mining and Metallurgical Engineers, Amer. Soc. of Mech. Engineers, Amer. Inst. of Electrical Engineers. Office, 29 West 39th St., New York.

The first award of the medal was made to John Fritz at a dinner given to him on his eightieth birthday, Aug. 21, 1902. The other awards have been as follows: 1905, to Lord Kelvin, for work in cable telegraphy; 1906, to George Westinghouse for invention and development of airbrake; 1907, to Alexander Graham Bell for invention and introduction of the telephone; 1908, to Thomas Alva Edison, for invention of duplex and quadruplex telegraph, phonograph, development of a commercially practical incandescent lamp, the development of a complete system of electric lighting, including dynamos, regulating devices, underground system protective devices and meters; 1909, to Charles T. Porter, for advancing knowledge of steam engineering and improvements in engine construction; 1910, to Alfred Noble, for

notable achievements as a civil engineer; 1911, to Sir William E. White, for notable achievements in naval architecture; 1912, to Robert W. Hunt, for contributions to early development of Bessemer steel process; 1913, no award; 1914, to Prof. John E. Sweet, for achievements in machine design, and pioneer work in construction and development of high-speed steam engine; 1915, to Dr. James Douglas, for achievements in mining metallurgy, education, and industrial welfare; 1916, to Dr. Elihu Thomson, for achievement in electrical invention, in electrical engineering and industrial development, and in scientific research; 1917, to Dr. Henry M. Howe, for his investigations in metallurgy; 1918, to J. Waldo Smith, for providing New York with water; 1918, to Gen. George W. Goethals, as builder of the Panama Canal; 1920, to Orville Wright, for development of the airplane; 1921, to Sir Robert Hadfield, for invention of manganese steel; 1922, to Eugene Schneller, for development of ordnance (75-m. gun); 1923, to Guglielmo Marconi, for the invention of wireless telegraphy.

EDISON GOLD MEDAL WINNERS.

1909, to Elihu Thomson; 1910, to Frank J. Sprague; 1911, to George Westinghouse; 1912, to William Stanley; 1913, to Charles F. Brush; 1914, to Alexander Graham Bell; 1916, to Nikola Tesla; 1917, to

John J. Carty; 1918 to Benjamin G. Lamme; 1919, to W. L. R. Emmet; 1920 to Michael I. Puplin; 1921, to Cummings C. Chesney.

## METROPOLITAN MUSEUM OF ART.

THE Metropolitan Museum of Art, in Central Park, opposite East 80th-85th Streets, New York City, was incorporated April 13, 1870, "for the purpose of establishing and maintaining a museum and a library of art, of encouraging and developing the study of the fine arts, and the application of arts to manufacture and practical life, of advancing the general knowledge of kindred subjects, and, to that end, of furnishing popular instruction." After one-half century of growth, it has to-day, through bequests, gifts, and purchases, collections of incalculable value, embracing both fine and decorative arts. They comprise objects in almost every material—marble, stone, wood, pottery, porcelain, glass, metals, lace textiles, &c.—and embody man's attempts throughout the ages to achieve his ideals of beauty. In date they range from 3000 B. C. to the twentieth century and represent the ancient world—Assyria, Babylonia, Cyprus, Egypt, Greece, and Rome; the Orient, including China, Japan, Corea, India, Persia, and Asia Minor; Europe from the Early Christian and Byzantine Art through the Romanesque, Gothic, Renaissance, and later periods; and our own country.

## TOMBS AND ANTIQUITIES.

These collections are housed in a building erected by the city, in Central Park, affording 280,000 square feet of exhibition floor space. Among the more noteworthy individual objects or collections are the mastaba tomb erected about 4,500 years ago in the Egyptian cemetery at Sakkara for a Theban dignitary named Perneb and re-erected here in its original form, with its painted scenes in low relief still preserved; six large alabaster reliefs from the palace in Nimrod of Ashur-nisir-pal, who reigned over Assyria from 885 to 860 B. C.; an Egyptian bronze chariot of the sixth century B. C., the only complete ancient bronze chariot known; the Cesnola antiquities from Cyprus; a group of Roman fresco paintings from Boscoreale, especially those on the walls of a reconstructed cubiculum (bedchamber), and a gathering of ancient glass, "one of the richest and most important in the world." In the accumulations of Near Eastern Art of special interest are the domed room from a Jain temple in India, recently installed, the gift of Robert W. and Lockwood de Forest, which represents the good carving of India and is supplemented by an extensive collection of Indian and Tibetan jewelry; the Indian miniatures in the Alexander Smith Cochran Collection, and some remarkable examples of early Indian stone carving; the Persian manuscripts and miniatures in the Cochran Collection; twenty-four manuscripts and a number of single sheets represent such masters of decoration as Behzad and Mirak, and some of the greatest names in Persian calligraphy from the fifteenth to the eighteenth century. The Far Eastern objects include the well-known Benjamin Altman gathering of Chinese porcelains and the Heber R. Bishop assemblage of jades.

The paintings, over twelve hundred in number, represent the Italian, Spanish, German, Dutch, Flemish, French, English and American schools. There is an unusual showing of the works by Rembrandt, twenty in all, thirteen received in the bequest of the late Benjamin Altman. Through the gift of J. Pierpont Morgan the Museum possesses a Raphael, the so-called Colonna Altarpiece, a Virgin and Child Enthroned with Saints. Groups of paintings kept together by the conditions under which they were received are: the George A. Hearn Collection, principally American in character; the Benjamin Altman Collection, strongest in its Dutch paintings, but including four Memlings, a Durer, a Giorgione, a Fra Angelico, two Velasquezes, and other works of rare excellence; the Michael Dreier Collection

of Italian and northern primitives, in which such artists as Memling, Roger van der Weyden, Schon-gauer, and Piero di Cosimo are represented; and the Catherine Lorillard Wolfe Collection, consisting largely of works by French artists of the early and middle years of the nineteenth century.

Others of special note are the William H. Riggs Collection of Arms and Armor, which in its scope and quality ranks with European national collections, and, with the Ellis and Dino Collections, gives an opportunity to study the development of armor from the fifteenth to the eighteenth century; the Crosby Brown collection of 3,600 specimens, including representative instruments of all nations, among them the earlier of the two existing pianos by Bartolomeo di Francesco Cristofori, the inventor of the pianoforte; the James F. Ballard Collection of rugs, Turkish, Persian, Indian, and Spanish, of the sixteenth and seventeenth centuries; and the William H. Huntington assemblage of portraits of Washington, Franklin, and Lafayette in all materials.

## THE MORGAN COLLECTION.

The Pierpont Morgan Collection, the gift of J. Pierpont Morgan, fills an entire wing and is a priceless gathering of the decorative arts of Europe from Gallo-Roman and Merovingian periods to the end of the eighteenth century. The rarest and most precious section of the collection represents the supreme work of the goldsmiths, Byzantine and mediæval enamellers, and ivory carvers. The most comprehensive gathering included in the Pierpont Morgan wing is that brought together by Georges Hoent-schel of Paris, the collector, and consisting of two parts: sculpture, furniture, textiles, ivories, woodwork, and architectural fragments of the Gothic period, chiefly of French, Flemish, Dutch, German, Spanish, and Italian origin, and French decorative arts of the seventeenth and eighteenth centuries—furniture and woodwork, many samples from historic buildings, decorative paintings, and ornamental fittings. Among the treasures of the Pierpont Morgan Collection are also five Gothic tapestries, known as the Sacrament Set because they picture in weaving the sacraments of the church; two sculptured groups, an Entombment and a Pieta, from the famous Chateau de Biron in southwestern France; superb examples of the goldsmith's craft from the fifteenth to the eighteenth century; a unique collection of snuff boxes, vanity boxes, scent bottles, and dance programmes, signed by famous jewellers of the eighteenth century; and a large collection of watches representative of the work of the best craftsmen in Europe from the sixteenth to the nineteenth century. The Dreier Collection also contains valuable examples of Gothic and Renaissance sculpture and decorative arts.

## SERVICABLE TO THE PUBLIC.

To make the museum collections servicable to the public, to manufacturers and designers, to artists and art students, and to the pupils in the public and private schools of New York City and vicinity is the constant effort of the members of the museum staff, working on behalf of the trustees.

A reference library and a collection of photographs are open to the public and a large collection of lantern slides, photographs, post cards, etc., is available on easy terms for lectures given anywhere east of the Mississippi. Opportunity to copy the objects in the collections themselves is granted with reasonable restrictions. A study room of textiles has been fitted up with every facility for the use of the large collection of laces and textiles, and other study rooms in different parts of the building are intended for the convenience of those who wish to study the various collections at length.

## THE FRANKLIN INSTITUTE OF THE STATE OF PENNSYLVANIA.

(15 South Seventh Street, Philadelphia, Pa.)

THE Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts was organized in the year 1824, to meet a demand in America for an institution similar to that founded by Count Rumford in London in 1799. The founders intended it not only as an appropriate memorial to the name of Franklin, but as a means of continuing for all time a work which throughout his long life he perhaps regarded as his best, namely, the discovery of physical and natural laws and their application to increase the well-being and comfort of mankind. Membership, 1,500.

Weekly lectures on scientific and technical subjects are given throughout the winter season; the Journal of the Franklin Institute has been published monthly

since 1826; monthly meetings are held at which re-discoveries in physical science and important engineering achievements are discussed, and major inventions described. The Committee on Science and the Arts examines and makes reports upon all new and useful machines, inventions and discoveries submitted to it. The membership is divided into the following sections, each group devoting its attention to the branch of technology for which it is organized: Chemistry, Electricity, Mining, Metallurgy, Astronomy, Photography, Physics, and Engineering.

Library.—75,912 volumes, 18,254 pamphlets, 2,292 maps and charts, and 1,349 photographs. Complete sets of over 750 of the leading scientific and technical publications of the world.

## AMERICAN MUSEUM OF NATURAL HISTORY.

THE American Museum of Natural History, located at 77th Street and Central Park West, N. Y. City, was founded and chartered in 1869 for the purpose of encouraging and developing the study of natural science, of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction. It is open free every day in the year; on weekdays and holidays from 9 A. M. to 5 P. M., on Sundays from 1 to 5 P. M.

The constitution provides for a self-perpetuating board of trustees, not to exceed twenty-five in number, who hold office for terms of five years, with the Mayor, the Comptroller and the President of the Park Board serving as trustees ex-officio.

The building, which is the property of the city, is one of the largest municipal structures in the city, and has cost over \$5,000,000. At present only eight sections of the building have been erected, which when completed will cover the entire area of Manhattan Square. The city makes an annual maintenance appropriation for heating, lighting, repainting and supervising the building, caring for its collections, the construction of cases, and other maintenance work. All the collections, however, are the property of the corporation and are acquired by gift of the trustees and members and other friends and supporters. The funds from which the trustees purchase and prepare specimens, carry on explorations in all parts of the world, publish the results of its research work and enlarge its present library of natural history of over 70,000 volumes, are raised by the museum and its friends, and derived from the income of an endowment amounting to \$9,603,952.57.

## NOTEWORTHY EXHIBITS.

The American Museum is famous as possessing the largest collection in the world of gems and gem material, the finest and most complete exhibits illustrating the evolution of the horse, the finest series of bird habitat groups, an extensive collection of meteorites, and the largest and best collections of fossil vertebrates and material showing all phases of the life of primitive man.

**First Floor**—Collections illustrating the life of the Indians of the North Pacific Coast, the Eskimo, Indians of the woodlands, plains and Southwest. Two new and large groups (Hopi and Apache) in the Southwest Hall. Forestry Hall—Sections of trees, including one from a big tree of California which measures 16 feet in diameter and is 1,341 years old. Natural woods, with specimens of their leaves and flowers, and sections of the finished woods. Exhibits in food needs and economics (temporarily placed in this hall). Darwin Hall—Specimens, models and groups showing invertebrate life, the Nahant Tide-Pool and the Wharf-Pile Groups being particularly interesting. New exhibit representing a two-inch section of sea-bottom, with its characteristic microscopic plant and animal life, magnified more than 15,000 times.

**Second Floor**—Collections from Africa. Material illustrating the life of prehistoric man of North America. Ancient monuments of Mexico and Central America. Birds of the world. Recent fishes. Mammals of North America. Akeley group of African elephants. Extensive reptile and amphibian material, including a number of beautiful groups (Lower California Lizard, Bullfrog, Great Salamander and New England Spring Groups). The most recent, finest and largest of the groups is the Florida Group. This reproduces a portion of a cypress swamp, with a stretch of sandy lowlands, teeming with characteristic animal life.

**Third Floor**—Shells. Collections from the living tribes of Asia, including Chinese bamboos, porce-

lain, basketry, inlaid work, embroidery, cloisonné enamel, agricultural implements, carvings in wood, ivory and stone and an especially valuable collection of ancient bronzes and pottery; material illustrating the mode of living, costumes and war implements of Siberia. Large and fine collections from the Indians of South America. Hall of Primates—Monkeys, apes and primitive man. Mammals of the world, including whales. Insect life. Birds of North America (the famous habitat groups). Public health exhibits dealing with problems of water supply, disposal of wastes, bacteria, insects and diseases, military hygiene.

## GEMS AND FOSSILS.

**Fourth Floor**—Collections from the Philippine Islands and the South Seas. Mineral and Gem collections. Hall of Gems, the gift of J. Pierpont Morgan—Collections including practically every variety of known gem, cut and uncut, some of remarkable size and purity of color; largest perfect crystal in the world, mounted on bronze base supported by three Chinese figures; exceptionally fine cameos, carved jade, etc. Hall of Fossil Invertebrates and Historical Geology—Large collections and models of caves and of Copper Queen Mine, showing cross sections and surrounding country. Halls of Fossil Vertebrates devoted to the great collections of the remains of creatures which lived from 30,000 to 20,000,000 years ago. These collections, by right of extent, variety, quality and methods of preparation and exhibition, are the finest in the world. The collections illustrating the evolution of the horse approach in importance and value the combined collections of this sort to be found in all other institutions. Hall of the Age of Man—Casts of prehistoric men and skeletons of the animals of their time (mammoth, mastodons and giant ground sloths). In the adjoining hall are fossil camels, giant pigs, a pigmy hippopotamus and primitive rhinoceros-like animals; fossil lemurs and monkeys which have an important bearing on the ancestry of man. Dinosaur Hall—Remains of fossil reptiles and fishes which lived from three million to ten million years ago. "Mummy" of dinosaur (trachodon) in which the texture of the skin has been preserved. Fossil aquarium reproducing a number of the earliest known fishes, with typical marine surroundings—all prepared on the basis of recovered specimens illustrating the animal and plant life of the time.

**Fifth Floor**—Public reference library. Osborn Library of Vertebrate Paleontology. Offices. Laboratories. Studios.

## EDUCATIONAL ACTIVITIES.

In addition to its work in securing and exhibiting natural history specimens, the institution maintains a Department of Public Education, which works in conjunction with the city's public schools and institutions for the blind, giving lectures, and circulating loan collections, slides and motion picture films. In 1921, 869 natural history collections were served to 477 schools and 209,451 slides were circulated. For teaching the blind, special apparatus, including relief globes and maps, are used. On December 23, 1921, the City Administration appropriated \$1,500,000 for the construction of the Southeast Wing on Central Park West, and the Southeast Court Building, and on April 21, 1922, it appropriated \$570,000 for the construction of the School Service Building.

While the institution is forced, through lack of building space, to keep the great majority of its collections in storage rooms, this material is available for study by persons interested.

## BUFFALO FINE ARTS ACADEMY.

The Buffalo Fine Arts Academy was organized November 11, 1862, and incorporated December 4 same year. The building occupied by the organization was a gift from Mr. John Joseph Albright. It is a white marble structure two hundred and fifty feet long (north and south) and one hundred and fifty feet deep (east and west). Its central feature is based on the east porch of the Erechtheum, on the Acropolis at Athens—perhaps the purest type of Ionic architecture. The City of Buffalo has been contributing toward the support of the institute since 1909. The permanent collection of the academy consists of 315 paintings, 803 engravings and etchings, and 57 sculptures, including casts.

The total membership is 610. During each year several special exhibitions are given; a semi-annual art journal is published. Lectures are given. Special efforts are made to interest the public and the school children. Several for-ign exhibits brought over by the director, Cornelia B. Sage Quinton, and passed on to other museums after being first shown at the Albright Art Gallery, have made Buffalo noted in art circles. They included: Exhibition of paintings and sculpture by the Societe Nouvelle of France, of which Rodin was President; exhibition of French textiles; exhibition of the work (sculpture) by Constantin Meunier; collections of the French artists G. La Touche and M. B. de Monvel; the exhibition of American sculpture, held at Albright Art Gallery in 1916.

**SMITHSONIAN INSTITUTION.**

The Smithsonian Institution is legally an establishment having as its members the President of the United States, the Vice President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice President, the Chief Justice, three members of the United States Senate, three members of the House of Representatives, and six citizens of the United States appointed by joint resolution of Congress. The Secretary of the Smithsonian Institution is its executive officer and the director of its activities.

The Institution at Washington, D. C., was established by statute in 1846, under the terms of the will of James Smithson, who bequeathed his fortune in 1826 to the United States to found an institution for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian Building, was erected on land given by the United States. The institution maintains a library, numbering about 300,000 volumes, which is deposited in the Library of Congress and which consists mainly of the transactions of learned societies, and scientific periodicals. While the body of the library is deposited in the Library of Congress and accessible to all its readers, a working library is maintained at the institution. The Regents are empowered to accept gifts without action of Congress in furtherance of the purposes of the institution, and to administer trusts in accord therewith.

The Institution has charge of the National Museum, the National Gallery of Art, the International Exchange Service, the Bureau of American Ethnology, the National Zoological Park, the Astrophysical Observatory, and the United States Regional Bureau for the International Catalogue of Scientific Literature.

The United States National Museum is the depository of the national collections. It is rich in the

natural history, geology, paleontology, archaeology and ethnology of America, and has collections of American history (including large war collections illustrative of the part taken by the United States in the recent conflict), as well as many series relating to the arts and the industrial arts. It is an educational and a research museum, and issues scientific publications. The National Gallery of Art consists of the collections of etchings and engravings of George P. Marsh, the collections of Charles L. Freer, containing paintings and etchings by Whistler, and examples of Oriental art; the Harriet Lane Johnson collection, including works of a number of the greatest English portrait painters, and the collection of William T. Evans, of one hundred and fifty-one paintings, representing one hundred and six American artists. The National Museum occupies two special structures, built in 1881 and 1911, containing 650,000 square feet of floor space. There are 6,274 articles in the Freer collection. The amount of the annual appropriations made by Congress for the support of the museum for the fiscal year 1920 was \$307,500. In addition there was appropriated for publications, binding of books, etc., \$37,500. The buildings are opened to the public 9 A. M. to 4.30 P. M., week days, and in addition the new building at the foot of Tenth Street is opened Sundays, 1.30 P. M. to 4.30 P. M.

Bureau of American Ethnology, for the study of the American Indian; the International Exchanges, for the exchange of governmental and scientific publications between the United States and foreign countries; the Astrophysical Observatory for the investigation of radiation phenomena; the National Zoological Park, at Washington, containing about 1,400 animals and the Regional Bureau of the International Catalogue of Scientific Literature, for the preparation of a classified index to the current scientific literature of the United States, are also branches of the institution.

**NATIONAL ACADEMY OF SCIENCES, WASHINGTON, D. C.**

THERE are 186 living members, comprising investigators in many departments of science. The geographical distribution of members covers the United States, but is not considered in their election. The National Academy has often been called into the service of the Government. Committees appointed in accordance with acts of Congress at the request of joint commissions and committees of Congress, of the President of the United States, and of the various departments of the National Government, have reported on a great variety of subjects. From time to time trust funds have been established, the incomes of which are devoted to the award of medals or to

grants for research. The will of Alexander Dallas Bache, first President of the Academy, directed that the residue of his estate, after the death of his wife, should be paid over to the National Academy of Sciences for the "prosecution of researches in physical and natural science by assisting experimentalists and observers." Other trusts have been left to the Academy. Several hundred thousand dollars have been disbursed by the academy from the income of trust funds in direct aid of scientific research. A recent gift was that of the Carnegie Corporation, \$5,000,000, for a suitable building for the academy and the National Research Council, and for the endowment of the council.

**MOUNT VERNON MUSEUM, AND TOMB OF WASHINGTON.**

"MOUNT VERNON," on the west shore of the Potomac River, 15 miles below Washington, belongs to the Mount Vernon Ladies' Association. It was built in 1743 by Lawrence, half brother of George Washington. On the death of Lawrence and of his only daughter, George Washington inherited the estate and went there to live soon after his marriage in 1759. He died and was buried there in 1799. In 1855 John Augustine Washington offered it for sale. A patriotic daughter of South Carolina, Ann Pamela Cunningham, devoted herself to raising \$200,000 required for the purpose. In 1858 the Mount Vernon Ladies' Association of the Union was organized, with Miss Cunningham as regent, and vice regents repre-

senting 12 States. Contributions were solicited and popular support was enlisted. The full sum was in hand before the end of 1859, and in 1860 Mount Vernon became the property of the association. A further fund was provided for permanent care and maintenance. Portions of the original estate that had been sold have been acquired again; buildings which had fallen into ruin have been restored; the deer park under the hill has been restocked; the mansion has been repaired; many articles of furniture and adornment have been restored to the several rooms; numbers of valuable relics and mementoes of George and Martha Washington and of their time have been deposited here.

**CORCORAN GALLERY OF ART, WASHINGTON, D. C.**

The Corcoran Gallery of Art, at Washington, D. C., founded and endowed by the late William Wilson Corcoran in 1869, solely for encouraging American genius in the fine arts, is a private corporation controlled by a self-perpetuating board of nine trustees. The original home of the institution was at Pennsylvania Avenue and 17th Street; but in 1897 its collections were transferred to the present building, designed by Ernest Flagg of New York, and located at New York Avenue and 17th Street, N. W. The value of the building and grounds connected therewith is \$1,000,000, and the present value of the col-

lections is estimated at \$1,500,000. The endowment fund amounts to \$1,000,000.

The collection of paintings is particularly representative of American artists. In addition the gallery has examples of the French, Dutch, English, and other schools. The sculptures include casts from the antique and the Renaissance, and modern works, as well as original works in marble and bronze. There are over 100 original bronzes by Antoine-Louis Barye, French sculptor of animals. It is open to the public: Mondays, 12 M. to 4.30 P. M.; other week days, 9 A. M. to 4.30 P. M.; Sundays, 1.30 to 4.30 P. M.

**THE HASKELL ORIENTAL MUSEUM**

THE Haskell Oriental Museum was erected through the generosity of Mrs. Caroline E. Haskell. Its collections, now exceeding 16,000 original objects, are intended to exhibit as systematically as possible the early civilizations of the Near East. Egypt is most largely represented. Both the Egyptian and the Assyro-Babylonian sections have been augmented in part by expeditions of the university's Oriental Exploration Fund in 1903-7 and by its

**OF THE UNIVERSITY OF CHICAGO.**

Oriental Institute in 1910-20. The latter organization is a recent expression of the interest of Mr. John D. Rockefeller, Jr. It supplements the museum not only by adding to its collections but by cataloguing and co-ordinating in research the materials there assembled, both originals and reproductions, with the library facilities of the university. The museum houses also some materials for the study of Palestine and of the religions of the Far East.

## INDEPENDENCE HALL NATIONAL MUSEUM, PHILADELPHIA.

(Data Supplied by Wilfred Jordan, the Curator.)

INDEPENDENCE HALL was at first called "The State House of Pennsylvania." It now comprises the main or central building (Independence Hall), two arcades connecting it with two two-story buildings called the Wings or Province Halls, and two separate corner buildings, one Congress Hall, the other Old City Hall, one on the corner of Fifth Street and the other on the corner of Sixth Street, facing on Chestnut Street, Philadelphia. The State House group of buildings was designed and built by Andrew Hamilton, a Philadelphia lawyer, who bought the land, for which he created a trust. Congress and City Halls were in Hamilton's original scheme of the State House group, but were not built until after the close of the Revolution. The group of buildings covers a frontage of 206 feet on Chestnut Street.

The original building (Independence Hall) in the group was begun in 1732 and was opened and first put to use in September, 1736, when William Allen, Mayor and prominent merchant of Philadelphia, gave a dinner to the citizens. In October, 1736, the Legislature, of which Benjamin Franklin was clerk, moved into the completed part of the structure, then known as the "East Room." In June, 1753, Pass & Stow placed in position in the State House steeple the Liberty Bell, weighing 2,080 pounds. In 1752 a clock was ordered, and in 1759 it was placed and paid for. The State House was practically completed in the latter year. Here are some of the historical events that have taken place in Independence Hall: June 15, 1775, Washington accepted his appointment as General of the Continental Army.

July 4, 1776, Colonies issued the Declaration of Independence.

July 15, 1776, convention to form a new Constitution for Pennsylvania met here.

September 11 and October 4, 1777, American officers captured at the Battles of Brandywine and Germantown were held prisoners in the building by the British.

Congress, which had left Philadelphia in September, 1777, and which convened in Independence Hall March 4, 1777, left again on September 18, 1777; returned July 2, 1778, and continued to sit there until the close of the Revolution.

July 9, 1778, the Articles of Federation and Union between the States were signed in Declaration Chamber by eight States. The five remaining States signed later, the last, Maryland, on March 1, 1781.

## THE CLEVELAND MUSEUM OF ART.

THE Cleveland Museum of Art, incorporated in 1913, was opened to the public on June 6, 1916. It is situated in Wade Park on land given by J. H. Wade. The building cost about \$1,250,000, was made possible through the wills of John Huntington and Horace Kelley, and the main income is derived from The John Huntington Art & Polytechnic Trust and The Horace Kelley Art Foundation. The Museum is open free on Sundays, Wednesdays, Saturdays and holidays, an admission fee of twenty-five cents being charged on other days. The hours on Sunday are 1 to 10 P. M., on Wedne day, 9 A. M. to 10 P. M., and on other week days and holidays, 9 A. M. to 5 P. M. The membership is approximately 5,000.

Exhibition space comprises a central rotunda, opening on one side into the Court of Tapestries and Armor, and on the other into the Garden Court, and around these as a central axis are arranged fourteen exhibition galleries. The collection of American Colonial art was installed in a gallery directly opposite the main entrance so that the first emphasis for the entering visitor might be on the artistic production of our own country. This has been of aid in developing in the foreign-born visitor the realization of America's traditional and cultural background. The Court of Tapestries and Armor houses an important and striking collection of arms and armor,

May 14, 1787, the Federal Convention to frame a Constitution for the United States assembled, sitting until September.

December 13, 1787, the Pennsylvania Convention met to ratify the Philadelphia Constitution.

In 1824 Lafayette was given a reception there. In December 6, 1790, the Congress of the United States occupied the County Building, now known as Congress Hall, one of the Independence Hall group, and remained there until the seat of Government was removed to Washington in 1800.

March 4, 1793, George Washington was inaugurated in Congress Hall, at the beginning of his second term as President; and John Adams was inaugurated there March 4, 1797. The House of Representatives occupied the lower floor and the Senate the second floor.

February 7, 1791, the Supreme Court of the United States held its first session on the second floor of the City Building, now known as Old City Hall, one of the Independence Hall group, and stayed there until August 15, 1800. The Supreme Court of Pennsylvania sat on the second floor of the building also. The City Building was used as the municipal headquarters until March 27, 1895.

In 1816 the City of Philadelphia bought the entire property.

There are many historic oil portraits in the National Portrait Gallery, including Washington and other early American public men.

Independence Hall was formally thrown open as a public historical museum July 4, 1876, although parts of this building were used as a museum as early as 1790. Cost of its annual upkeep is \$25,000. Its art collection, made up in the main of original pictures of celebrities of Colonial and Revolutionary times, is worth over \$500,000. The museum collection consists of furniture, manuscripts, musical instruments, water colors, medals, maps, coins, currency, weapons, metals, prints, wearing apparel, utensils, and books.

It is open to the public daily throughout the year, from 9 A. M. to 4 P. M., Sundays, 1 to 4 P. M., except Christmas and Thanksgiving. The National Museum, Independence Hall group, is located on the south side of Chestnut Street, between Fifth and Sixth Streets, and can be reached from the central hotel district and the railroad stations by trolleys or subway trains. A series of free bulletins are issued, which will be mailed upon request.

and a series of eight tapestries depicting the story of Dido and Aeneas. The museum is especially rich in its oriental collections, and has developed other important art groups illustrating the art of various countries from ancient to modern times.

The educational work of The Cleveland Museum of Art is being developed along various lines. The conference room is available at all times for clubs or groups desirous of studying art subjects or the museum's collections. Lectures and museum talks are given on request by members of the staff.

The Children's Museum is becoming an important factor of the museum's activities. An appeal is made to the child mind by exhibits of suitable works of art, including series of ethnological models and natural history groups. Drawing materials are placed at the disposal of the children and sympathetic assistance is given them by the attendants, every effort being made to create an interest in and an appreciation of beauty and art. Classes of sixth, seventh and eighth grade public school children work in the museum each day under a supervisor employed by the Board of Education. Classes from the public and private schools and from the colleges come for general tours of the galleries and for correlative study.

A department of musical arts was established in 1920. The museum's reference library contains 5,000 books on art, etc., magazines, and over 7,000 lantern slides.

## THE CITY ART MUSEUM OF ST. LOUIS.

THE City Art Museum of St. Louis was established in 1879, and became a municipal institution in 1909. The building is in Forest Park, 180x350 feet, with 44 galleries on three floors. The collections include paintings, prints, sculpture, textiles, ceramics, metal work, furniture and other objects. The modern paintings are comprehensive, by artists of America, France, Holland, Spain, England, Russia, Sweden, Belgium and other countries. There is a small group of Old Masters. In the print department are etchings, engravings and woodcuts by old and modern masters. The sculptures are chiefly examples by

American artists, supplemented by collections of casts from the antique and from masterpieces of the Renaissance. Among the Chinese ceramics are specimens from the Han Dynasty downward, and examples of the Sung, Ming, and K'ang-Hsi periods. There are groups of Chinese paintings, bronzes, jades and other carved stones, lacquer, glass, textiles, etc., as well as objects illustrative of the decorative arts of ancient Greece and Egypt, of Japan, Korea and Persia. The museum is open daily, except Christmas and New Year's Days, 10 A. M. to 5 P. M. Admission free.

## FIELD MUSEUM OF NATURAL HISTORY, CHICAGO.

FIELD Museum of Natural History, established 1893, at the close of the World's Columbian Exposition of 1893, removed June 1, 1920, to its new building in Grant Park. The founding of a scientific institution of this character in Chicago was made possible by a gift of \$1,000,000 by Marshall Field, whose name the institution bears, and who on his death, January 6, 1906, bequeathed a further \$8,000,000, of which \$4,000,000 was for the erection of a permanent building, and \$4,000,000 for endowment. The sum of \$1,200,000 has been contributed by others, and there is an annual income from other sources than endowment of approximately \$120,000.

## FIVE MAIN DEPARTMENTS.

The nucleus of the exhibition material was gathered by gift and purchase at the World's Columbian Exposition. Several departments created at the organization have been abandoned, until, after a lapse of twenty-seven years and expenditure of over \$7,000,000, the museum is now divided into five departments: Anthropology, botany, geology, zoology, and the N. W. Harris Public School Extension. Many expenditures for the purpose of obtaining study, exhibition, and exchange material and data have been dispatched to all parts of the world. The results have been published by the

museum from time to time. It has a working library of 78,000 titles, an extensive exchange system, fully equipped departmental laboratories, an herbarium of 560,000 sheets, study collections of mammals, birds, fishes, reptiles and insects reaching many thousand specimens, a large taxidermy section, a printing shop, illustration studio, assaying and lapidary rooms, etc. In North America, Philippines, Chinese and Tibetan ethnology, in meteorites, in the world's mineralogy, in economic botany, the museum is particularly prominent, while its series of mounted mammals and birds and plant reproduction furnish examples of advanced museum practice. The institution is open to the public on all days except Christmas and Thanksgiving. A small admission fee is charged except on Thursday, Saturday, and Sunday, when it is free to all. Students, scholars and teachers are admitted free at all times.

## COVERS ELEVEN ACRES.

The museum is incorporated under Illinois State law, and the administrative control rests in a board of twenty-one trustees. The building is 750 feet by 350 feet, but with the exterior outer lines, including entrances and terrace. The structure covers about eleven acres of ground. President, Stanley Field; Secretary and Director, D. C. Davies.

## THE ART INSTITUTE OF CHICAGO.

THE institute is on the lake front at the foot of Adams Street, facing Michigan Avenue. Building constructed of Bedford limestone in Italian Renaissance style, 320 feet long with 120,000 square feet of floor space. The institute has about 150 galleries, school rooms, offices and studios; also Fullerton (lecture) Hall, with seating capacity of 500; the Burnham Library of 3,000 volumes on architectural subjects, and the Ryerson Library, 14,500 volumes on art, one of the few libraries in the world devoted exclusively to art. During the fall, winter and spring months 80 to 100 lectures on art and related subjects are given in Fullerton Hall, also an orchestra concert each Sunday afternoon and evening, and occasionally a pageant or dramatic presentation.

## 1,800 PAINTINGS, 1,100 SCULPTURES.

The museum contains more than 1,800 paintings, 1,000 casts of sculpture, 100 original marble statues and fragments of all periods, 3,500 prints, etchings, engravings and lithographs, 1,500 textiles of ancient and modern times, Peruvian and Egyptian to the Eighteenth Century, and extensive collections of potteries, porcelains, china, etc., a great part of the last named being assembled in Gunsaulus Hall, among them the Blaxius collection of English potteries and porcelains, one of the finest extant. The institute was incorporated in 1879 and achieved international importance with the purchase of fifteen old Dutch Masters of the Demidoff collection, in 1890. These paintings, with other important canvases of these school, hang in the Charles Lawrence Hutchinson Gallery of Old Masters, named in honor of Mr. Hutchinson, who has been President of the institute for over forty years. Rembrandt, Rubens,

Van Dyck, Hans Holbein, Hobbema, Von Ostade, ter Borch, Jan Steen, Teniers, Ruysdael, Van de Velde, are represented in this gallery. The Henry Field, A. A. Munger and Nickerson memorial collections include painters of the Barbizon school, the earlier American painters of landscape and figures, the Potter Palmer collections, paintings of modern European impressionists.

## MODERN AMERICAN ART.

Modern American art is chiefly represented in the collection now numbering over one hundred canvases and other works presented by The Friends of American Art. One of the features of the institute is the series of temporary exhibitions of paintings, sculpture, architecture and applied arts which are held during the year. Annual and special exhibitions and collections of various kinds from America and abroad to the number of six to ten at a given time keep the constituency of the Art Institute aware of current achievement in art. Attendance (1921), 1,224,894. Free days for public—Wednesdays, Saturdays, Sundays and public holidays. The institute's sources of income are bequests, gifts, membership dues (total paid membership, Jan. 1, 1922), 18,196. Income from its endowment of about \$3,000,000 both restricted and free, and a small tax from the South Park Board of the City of Chicago. The building has a value between a million and a half and two million dollars. The collections have a commercial worth far beyond five million dollars. The art school of the institute has an annual attendance of about 4,600 students; often referred to as the largest art school in the world. It has a faculty of about two score teachers and instructors.

## THE CINCINNATI MUSEUM OF ART.

(By the Director, J. H. Gest.)

THE Cincinnati Museum Association, organized in 1880, and incorporated in 1891, gives exhibitions during the year, and has collections of modern American art which include the pictures, sculpture and etchings of Frank Duveneck; paintings, studies, drawings and etchings by Robert Blum; as well as a representation of the other leading American painters and sculptors; and a considerable number of modern French paintings. Casts of Greek sculpture and of carved ivory from the Roman to the Renaissance period are installed in the Schmidlapp Building,

and there is a large group of American archaeology. The decorative arts are represented, the department of metal work including, besides the Elkington reproductions, a group of original armor and the Conner collection of original silver. The museum holds also the Doane collection of musical instruments, the Longworth historical exhibition of India shawls, and the exhibition of Rookwood pottery, the Cincinnati art industry with which the museum and its school, the Art Academy of Cincinnati, are closely connected. There is a reference library.

## BROOKS MEMORIAL ART GALLERY, MEMPHIS, TENN.

THE Brooks Memorial Art Gallery, a gift to Memphis by Mrs. Samuel Hamilton Brooks, in memory of her husband, was dedicated May 25, 1916. It is of pure Grecian architecture, of Georgian marble, costing \$115,000. Situated in Grant Park, it is under the supervision of the Park Commission, one of which body is chairman of the Art Gallery.

The extension work in the schools is one of the important activities of the Gallery, and is supported by the Memphis Art Association. There is an annual exhibit of local artists' work and students from the schools and studios, every spring. Prizes

are given by the Art Association, including one for the best essay by any one from the English classes. The Junior Art Association is the centre of school interest. Several of the schools have already begun to buy good pictures. There are also garden clubs, etc. Each school has a branch of the Junior Art Association with its own officers and plan of work. There are three joint meetings a year, the chairman of which makes a report to the Senior Art Association, thereby forming a circle of work around the Art Gallery. At stated times lecturers are brought to the city.

**TELFAIR ACADEMY OF ARTS AND SCIENCES, SAVANNAH, GA.**

FOUNDED 1875, under will of Mary Telfair (daughter of Edward Telfair, revolutionary patriot, signer of the Articles of Confederation, and early Governor of Georgia), and last of her name. She devised to a Trustee the Telfair residence and contents, and an endowment of \$100,000. By additions and alterations, the residence was converted into an art gallery, containing: (1) Specimens of Colonial furniture and

furnishings of the Telfair family, displayed in the dining room, which is unchanged; (2) Old books and manuscripts found in the residence; (3), a collection of casts of classical statues; (4), about seventy modern paintings by artists of America, England, France, Germany, Holland, Belgium and Italy. Open seven days a week; no day days. Gives miscellaneous art exhibitions, chiefly from American Federation of Arts, exhibitions of individual painters and etchers, and lectures.

**ISAAC DELGADO MUSEUM**

THE Isaac Delgado Museum of Art was dedicated on December 16, 1911. The building was the gift of Isaac Delgado to the City of New Orleans, and is maintained by the city. The Museum is free to the public; except Fridays, 25 cts. The Curator, C. W. Boyle. It is open on Sundays, but closed every Monday. Mr. Delgado was born in 1839, at Kingstons, Jamaica, and came to New Orleans when a young man, and became associated with his uncle,

**OF ART, NEW ORLEANS.**

Samuel Delgado, in the sugar and molasses business. He died January 4, 1912. Permanent collection includes the Chapman H. Hyams collection of paintings and statuary; the Morgan Whitney collection of jade and other hard stones; the Alvin Howard collection of Etruscan glassware and Greek pottery; the B. M. Harrod collection of paintings and old silverware; the John G. Agar collection of paintings, bronzes and ceramics; and the Eugene Lacoste collection of bronzes and ceramics.

**UNIVERSITY OF PENNSYLVANIA MUSEUM.**

(At the University, Philadelphia.)

Director, George Byron Gordon. The collections include Egyptian, Babylonian, Graeco-Roman, Chinese, Mohammedan, Aboriginal America, Africa, the South Seas, Primitive Asia, Ancient Art, Industrial Art the Decorative Arts. There is a library of 10,000 volumes relating to subjects illustrated in the exhibits.

The most important accessions during the year have been an ancient royal feather clove and cape from Hawaii; a collection of South Sea Island carvings; a collection of ancient Benin carved elephant tusks and bronzes; a Chinese gilt bronze statuette of the period of the Six Dynasties. The number of visitors during the year was 94,056. The expenses of administration amounted to \$83,742.03 and the sum of \$151,092.95 was spent for expeditions and collections. The interest on the Eckley B. Cox, Jr. Endowment of \$500,000 is available for Egyptian explorations. The city appropriated \$30,000. The

entire income of the museum, including sales of photographs, publications, etc., was \$324,854.47.

The museum maintains expeditions in Alaska, Central America, South America, Egypt and Palestine. Open daily throughout the year from 10 A. M. until 5 P. M. Sundays 2 until 6. Organized 1889. First section of the museum opened in 1889, second section opened in 1916. Annual meeting December. Board meets third Friday of each month, except July and August. Expert guidance is free to all visitors. The Museum Journal is published quarterly, giving accounts of expeditions in the field and of exhibits in the museum. Four series of publications are issued containing studies and investigations in archaeology and ethnology: Anthropological Series, Babylonian Series, Egyptian Series, Mediterranean Series. The public schools are especially looked after in the way of lectures at the institution.

**MUSEUM OF HISTORIC ART**

THE Museum of Historic Art was founded in the year 1889. It contains the notable T umbull-Prime collection of pottery and porcelain, a few Assyrian, Greek and Roman sculptures, Cypriote and later Greek pottery, and a quantity of Syrian glass from the Princeton expeditions. In the mediæval and Renaissance field there are sculptures and paintings, few but of good quality. The cast collection comprises the history of sculpture in epitome from early Egyptian times through the Italian Renaissance.

**AT PRINCETON UNIVERSITY.**

A new hall of architectural casts is in preparation under the care of the School of Architecture. A distinctive and probably unique exhibition is the series of full size architectural casts taken from Syrian buildings of late classical and early Christian periods by Prof. Howard Crosby Butler.

The museum, which for a year will be in process of rearrangement, is regularly open to the public from 2 to 5 P. M. Sunday afternoons, and generally on week days during the term on application to the custodian.

**BOSTON MUSEUM OF FINE ARTS.**

THE Museum of Fine Arts, Boston, was incorporated February 4, 1870. The first section of the Museum building in Copley Square was dedicated July 3, 1876, and the next day it was opened to the public. The original building was twice enlarged. The first section of the present building on Huntington Avenue was opened November 15, 1909. The total cost of land, building, and installation was \$2,900,000. The second section of the proposed completed building, the Robert Dawson Evans Galleries for paintings, the gift of Mrs. Evans, was opened February 3, 1915. It cost \$1,000,000. The annual running expenses are about \$200,000. The Museum receives no city or State aid, its funds for running expenses and for purchases being derived entirely from private gifts and bequests. Admission is free whenever the Museum is open: 10 A. M. to 5 P. M.

week days (Nov. 1 to March 1, 4 P. M.), 1 P. M. to 5 P. M. Sundays.

The Museum possesses collections illustrating the art of Ancient Egypt, Greece, and Rome, the art of mediæval, Renaissance and modern Europe, American art, and the art of Asia. Its collection of Egyptian and Greek sculpture and Greek vases and terra cottas is the finest in this country; its collection of the art of China and Japan is unrivalled; its collection of the art of India is the only one in this country; and its collection of paintings and drawings from India is superior even to the one in the British Museum; the textiles, numbering over 7,000 pieces, are recognized as the best comprehensive representative collection in this country; the paintings, of which over 700 are exhibited, include, besides examples of the old masters, a large collection of French paintings of the nineteenth century and also of early American paintings.

**WORCESTER ART MUSEUM.**

(By the Director,

Raymond Wyer.)

THE Worcester, Mass., Art Museum was founded and incorporated in 1896. It was a gift from the late Mr. Stephen Salisbury who left his entire estate for its maintenance and the formation of a permanent collection. One of the significant collections of early Italian paintings and sculpture in the country has been assembled as well as important examples of painting and sculpture of other schools and periods. Collections of textiles, furniture, ceramics, woodwork, silver and bronzes are being made. Also of

special note are the Bancroft Collection of Japanese Prints and the Goodspeed Collection of Engravings by American Artists. Another important feature is the Educational Department, which gives courses of instruction in color and design to school children and lectures on the same subject to adults. It has an important art library. A series of free concerts is given each year to the public as well as a number of transient exhibitions. There is a Worcester Art Museum Arts and Crafts School in a separate building.

## THE MUSEUMS AT HARVARD UNIVERSITY.

The William Hayes Fogg Art Museum was founded by Mrs. Elizabeth Fogg of New York in memory of her husband, whose name it bears. Mrs. Fogg bequeathed for this purpose \$220,000, of which \$150,000 was expended on the fireproof building, completed in 1895, in the College Yard. The building is two stories high with a lecture room. Admission to the Museum is free. The hours of opening are: week-days, 9 A. M. to 5 P. M.; Sundays during the college year 12 M. to 5 P. M. The Museum is closed on legal holidays and on Saturday afternoons during the summer vacation of the University.

The collections include original works of ancient sculpture, among them a marble statue of Meleager (possibly a fourth century copy of the original by Scopas; moulds and fragments of Arretine pottery; Greek vases, coins and figurines; a series of Gandhara sculptures; a notable collection of Romanesque sculpture, principally composed of 16 capitals representing the finest type of twelfth century French work; Oriental works of art, including Chinese, Japanese and Thibetan paintings, Persian miniatures and calligraphy, pottery, jade and bronze; textiles; a few American paintings, among them works by Sargent, Winslow Homer and Dodge MacKnight; about one hundred Byzantine, Italian, Spanish, Flemish, and German paintings of the fourteenth, fifteenth and sixteenth centuries; original drawings and water color drawings by masters of the French, Italian, Northern and English schools; and a large collection of prints, chiefly the work of the German and Italian wood and metal engravers and etchers. The Museum also has a library and a collection of photographs and slides.

## SEMITIC AND GERMANIC MUSEUMS AT HARVARD UNIVERSITY.

The Semitic Museum at Harvard University was founded by Jacob H. Schiff, Esq., in 1899. The objects aimed at have been to aid the regular instruction given in the departments; to furnish the means of research; to illustrate the manners, customs and history of the Semitic peoples and thus to show, as far as may be, what the Semites have contributed to civilization. The Museum building on Divinity

Avenue, Cambridge, completed in 1902, is likewise the gift of Mr. Schiff.

The Germanic Museum is to illustrate by means of plaster casts and other kinds of reproduction the outward aspect of the development of Germanic Culture. The new Museum building, erected in 1916 at the corner of Kirkland Street and Divinity Avenue, Cambridge, is called, in honor of its donor, Adolphus Busch Hall.

## PEABODY MUSEUM AT

The Peabody Museum of American Archaeology and Ethnology of Harvard University was founded by George Peabody in 1866. Its purpose was the forming and preserving of collections of antiquities and objects relating (1) to the native people of the American continent, and (2) to the various primitive peoples of the world in general. The collections are housed in the Peabody Museum building of five stories which forms the southern wing of the University Museum structure. The five stories have more than 53,000 square feet of floor space for exhibition purposes, and about 18,000 square feet for offices, laboratories and storage.

The collections relating to prehistoric American tribes have been brought together largely by explorations under the auspices of the Museum, those relating to Middle America being unusually complete. In the halls devoted to the Mayan region are grouped the reproductions of the great stone stelae and altars which adorn the plazas and stand before the

## HARVARD UNIVERSITY.

ruined temples of the great Maya cities. Collections relating to historic American tribes contain rare objects obtained by well-known early explorers.

The material relating to prehistoric Europe contains collections by Gabriel de Mortillet, Lartet and Christy, and Clement, the pioneer archaeologists of the century just past. The primitive people of Oceania are represented, also both the historic and prehistoric tribes of Africa. The osteological collections contain examples of skeletal remains from nearly all sections of the world.

The laboratories of the Museum are open (under proper restrictions) to all specialists and students in anthropology. The collections are also made use of by many of the institutions of higher education in Central New England, in connection with the study of the origin and development of design, architecture, and the various minor arts, as well as of mankind in general. The publications of the Museum consist of papers, memoirs, annual reports and special publications.

## PEABODY MUSEUM OF NATIONAL HISTORY, YALE UNIVERSITY.

The Peabody Museum of Natural History at Yale University was founded by George Peabody in 1866. Ten years later the first wing of the museum was built, but the complete plan was never carried out, and the building was removed in 1917 to make way for the Harkness Memorial Quadrangle. Since then the greater part of the collections have been in storage pending the erection of a new building, which, it is hoped, will be begun before the end of 1922.

The museum has the following collections: Mineralogy, built up around the Gibbs collection purchased by the University as far back as 1825 and containing, besides an abundance of minerals, one of the largest assemblages of meteorites in the country; Zoology, brought together largely by Yale's distinguished naturalists, the late Professor J. D. Dana and Professors A. E. Verrill and S. I. Smith, and including a vast amount of marine invertebrates accumulated through co-operation with the U. S. Fish Commission; Anthropology, much of which was presented by the late Prof. O. C. Marsh; Invertebrate Paleontology, with material from all parts of this country and representing all geologic ages; Osteology, the gift of Prof. Marsh; and finally the Marsh collection of Vertebrate Paleontology, surpassed by perhaps but one other in the world, and particularly rich in type material from the western part of the United States.

## SCHOOL OF FINE ARTS.

The School of the Fine Arts at Yale University contains the Jarvis collection of Italian art, numbering 120 paintings from the fourteenth to the seventeenth centuries; the Trumbull Gallery of Historical American Paintings; the Alden collection of Belgian wood carvings of the seventeenth century, comprising 120 feet of wainscoting, including three confessionals, from a chapel in Ghent; the Frederick Wells Williams loan collections of Chinese porcelains and bronzes, and a number of other valuable objects of art; sketches by old masters, examples

of contemporaneous work, casts and marbles representative of various periods of ancient and Renaissance art; bronzes; and Braun autotypes and Arundel prints to the number of about four hundred. These are from time to time supplemented by special collections and exhibitions.

The William A. Speck Collection of Goethe Literature, 26 Linsly Hall, includes many first and other important editions of Goethe's works, numerous books dealing with the Faust legend before Goethe's time, and most of the Faust dramas by other authors; also a very full representation of the translations into other languages of Goethe's *Faust*, a large body of commentaries, many portraits of Goethe and his friends, manuscript letters by and about Goethe, views of Weimar during Goethe's time, and an assemblage of medals struck in his honor.

## BABYLONIAN COLLECTION.

The Babylonian Collection at Yale University consists of about 10,000 original tablets belonging to the various epochs in Babylonian history, from about 4000 to 150 B. C. and includes literary texts (epics and liturgies), syllabaries or dictionaries, mathematical treatises and different kinds of exercises from temple schools, divination texts, legal and business transactions, administrative documents from the archives of Babylonian temples, personal and official letters and records of various kinds, seal cylinders, inscribed bricks, votive objects, reliefs, royal building inscriptions, incantation bowls, etc. The original inscriptions are augmented by the William Hayes Ward Collection of seal-cylinder impressions, and by a large number of casts from museums in Europe and America which illustrate the life and customs of the ancient Babylonians and Assyrians. In addition to the Babylonian and Assyrian material, the beginning has been made of a collection of other Semitic monuments, including both casts and originals. The Whiting Collection of Palestinian pottery and terracotta, numbering 940 pieces, acquired through the generosity of the late Mrs. Francis Wayland, is also available for study.

## THE LIBRARY OF CONGRESS.

THE Library of Congress was established in 1800, destroyed in 1814, by the burning of the Capitol, afterward replenished by the purchase by Congress of the library of ex-President Jefferson, 6,760 volumes (cost, \$23,950); in 1851, 35,000 volumes destroyed by fire; in 1852, partially replenished by an appropriation of \$75,000; increased (1) by regular appropriations by Congress; (2) by gifts and exchanges; (3) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress with the stipulation that future accessions should follow it. One hundred sets of Government publications are at the disposal of the Librarian of Congress for exchange, through the Smithsonian, with foreign Governments, and from this source are received about 12,000 volumes annually. Other special accessions have been: The Peter Force collection (22,529 volumes, 37,000 pamphlets), purchased 1867, cost \$100,000; the Count de Rochambeau collection (manuscript), purchased 1883, cost \$20,000; the Toner collection (24,484 volumes, numerous pamphlets), the gift in 1882 of Dr. Joseph M. Toner; the Hubbard collection (engravings).

The collection is now the largest in the Western Hemisphere, and third in the world. It comprises over 2,918,256 printed books and pamphlets (including the law library, which, while a division of the Library of Congress, still remains at the Capitol), maps and charts, pieces of music, and photographs, prints, engravings and lithographs numbering about two million.

The collection is rich in history, political science, in official documents, National, State, and foreign, and in Americana, including important files of American newspapers and original manuscripts (Colonial, Revolutionary, and formative periods). Many of the rare books and manuscripts belonging to the library are exhibited on the second floor.

Among the special book collections are the Yudin, of Russian literature (80,000 volumes); the Schiff, of Judaica (about 20,000); the Weber, of India; the Hultfeldt-Kaas (Scandinavian); the John Boyd Thacher of Incunabula (930 titles). The Orientalia include some 5,000 volumes (fascicules) of Japanese books and about 40,000 volumes (fascicules) of Chinese. The Division of Prints includes certain collections, given or loaned, besides a large mass of material received by copyright, named by purchase. The manuscript collections are especially noteworthy for material on American history, some of the most distinguished of which has been received by transfer from the executive departments, the library being now regarded as the main custodian of the historical archive material in the possession of the Government. It has the papers of seventeen Presidents and of various American statesmen, Franklin, Morris, Hamilton, &c.

The library is copying largely documents in foreign archive offices and other institutions of concern to American history. It has already a large body of transcripts from such sources. This policy of transcribing and copying, where necessary by facsimile, is applied also to maps and to music. Through it the collection of music, in bulk one of the largest in the world, is especially strengthened in full scores of orchestral and operatic music.

In 1897 the main collection was removed from the Capitol to the building erected for it under the Acts of Congress approved April 15, 1886, October 2, 1888, and March 2, 1893, at a cost of \$6,347,000 (limit by law, \$5,500,000), exclusive of the land, which cost \$585,000. The architects who furnished the original designs were John L. Smithmeyer and Paul J. Pelz. By the act of October 2, 1888, before

the foundations were laid, Thomas L. Casey, Chief of Engineers of the Army, was placed in charge of the construction of the building, and the architectural details were worked out by Paul J. Pelz and Edward P. Casey. Upon the death of Gen. Casey, in March, 1896, the entire charge of the construction devolved upon Bernard R. Green, Gen. Casey's assistant, and under his superintendence the building was completed in February, 1897, and opened to the public November, 1897. The building occupies three and three-quarter acres upon a site ten acres in extent at a distance of 1,270 feet east of the Capitol, and is the largest and most magnificent library building in the world. In the decorations—some forty painters and sculptors are represented—all American citizens. The floor space is 326,195 square feet, or nearly eight acres. The book stacks, including the new stack built over the southeast interior court, contain about 100 miles of shelving, affording space for 3,540,000 of travel volumes and 84,000 volumes of newspapers.

The library is maintained by annual appropriations by Congress for various purposes, including the purchase of books. Total appropriation (1922) \$711,120. For service and contingent expenses, \$484,155; purchase of books, \$98,000; building and grounds, \$128,265.

*Library Service*.—Library proper, 276 employees; copyright, 91; other, 149; distribution of cards, 58; legislative reference, 30. Total, 450. By virtue of the act of 1897, employees in the library proper are appointed by the Librarian of Congress, "solely with reference to their fitness for their particular duties." Custody and care of the building is under the Superintendent of the Library Building and Grounds, who is also the disbursing officer and appoints the 147 employees of his office.

Entitled by statute to draw books for home use are various officials at Washington. In addition, special permits are freely issued by the Librarian to persons engaged in research.

*Inter-Library Loans*.—While not a lending library but primarily a reference library, the Library of Congress maintains an inter-library loan system by which special service is rendered to scholarship by the loan to other libraries for the use of investigators engaged in serious research of books which it is not within the power or duty of the library in question to supply and which at the time are not needed in Washington.

*Copyright Office*.—The Copyright Office is a distinct division of the Library of Congress and is located on the ground floor, south side, open 9 to 4.30. It is under the immediate charge of the Register of Copyrights, who, by the acts of February 19, 1897, and March 4, 1909, is authorized "under the direction and supervision of the Librarian of Congress" to perform all the duties relating to copyrights. Copyright registration was transferred to the Librarian of Congress by the act of July 8, 1870. Of most articles copyrighted two copies, and of some one copy, must be deposited in the Library of Congress to perfect copyright.

*Hours*.—The library building is open to the public all days in the year excepting 4th of July and Christmas. The hours are from 9 A. M. to 10 P. M. weekdays, from 2 P. M. to 10 P. M. Sundays and Holidays and 9 A. M. to 1 P. M. on Saturdays from June 15 to September 15.

*Librarians Since the Inception of the Library*.—1800-1815, the Clerk of the House of Representatives (for the time being): 1815-1829, George Watterston; 1829-1861, John S. Meehan; 1861-1864, John G. Stephenson; 1864-1897 (June 30), Ainsworth R. Spofford; 1897-January 17, 1899, John Russell Young; 1899 (April 5), Herbert Putnam, *Chief Assistant*; Appleton P. C. Griffin, *Chief Clerk*; Allen R. Boyd, *Secretary*; Jessica L. Farnum.

## PAN-AMERICAN UNION.

THE Pan-American Union is the international organization and office maintained in Washington, D. C., by the twenty-one American republics, as follows: Argentina, Bolivia, Brazil, Chili, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Hayti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, United States, Uruguay, and Venezuela. It is devoted to the development and advancement of commerce, friendly intercourse, and good understanding among these countries. It is supported by quotas contributed by each country, based upon the population. Its affairs are administered by a Director-General and Assistant Director, elected by and responsible to a Governing Board, which is composed of the Secretary of State of the United States and the diplomatic representatives in Washington of the other American Governments. These two

executive officers are assisted by a staff of experts, statisticians, commercial specialists, editors, translators, compilers, librarians, clerks and stenographers. The Union publishes a monthly bulletin in English, Spanish, and Portuguese, which is a record of Pan-American progress. It also publishes numerous special reports and pamphlets on various subjects of practical information. Its library, the Columbus Memorial Library, contains 50,000 volumes, 25,000 photographs, 180,000 index cards, and a collection of 1,600 maps. The Union is housed in a building erected through the gifts of Andrew Carnegie and the contributions of the American republics.

*Director-General*.—Dr. L. S. Rowe; *Assistant Director*.—Francisco J. Yanes; *Counselor*.—Franklin Adams; *Trade Adviser*.—W. A. Reid; *Chief Statistician*.—William C. Wells; *Chief Clerk*.—Wm. V. Griffin.

**MUSEUM OF ANTHROPOLOGY, UNIVERSITY OF CALIFORNIA.**

The Museum of Anthropology of the University of California was founded by Mrs. Phoebe Apperson Hearst in 1901. The collections gathered through her generosity cost more than \$1,000,000. The Museum is temporarily located at Parnassus and Second Avenues, San Francisco. It is open daily (except Monday) to the public without charge.

The hours are 10 A. M. to 4 P. M. on week days, 10 to 5 on Sundays.

Although the Museum was founded in 1901 it was not opened for public exhibition until 1911. The collections which have been placed on view represent the ancient cultures of the following regions: California, Southwestern United States, the Great Plains, the North Pacific Coast, Peru, Oceania, Asia, Greece, Italy and Egypt.

**NATIONAL ACADEMY OF DESIGN.**

(Founded 1825. Headquarters, 100th Street and Amsterdam Avenue, New York.)

The National Academy of Design, and the Society of American Artists (founded 1877) were united, April 7, 1906. All members of the latter organization then became members of the former.

**Council**—Edwin H. Blashfield, President; Harry W. Watrous, Vice President; Charles C. Curran, Corresponding Secretary; Douglas Volk, Recording Secretary; Francis C. Jones, Treasurer. W. Granville-Smith, Robert I. Aitken, Herbert Adams, Emil Carlsen, Charles A. Platt, Hobart Nichols.

1916; Cass Gilbert, 1908; Thomas Hastings, 1909; William Rutherford Mead, 1910; Charles A. Platt, 1911.

**Engravers and Etchers**—Timothy Cole, 1908; Joseph Pennell, 1909.

**ASSOCIATES.**

**Painters**—Wayman Adams, Ernest Albert, Thomas Allen, Karl Anderson.

William J. Baer, Hugo Ballin, Reynolds Beal, E. A. Bell, Frank A. Bicknell, Charles Bittinger, Ernest L. Blumenschein, Mary Green Blumenschein, George H. Bogert, Adolphe Borie, Joseph H. Boston, Hugh H. Breckenridge, R. Sloan Bredin, Miss Fidella Bridges, Roy Brown, George Elmer Browne, K. A. Buehr (elect), Bryson Burroughs.

George W. Maynard, 1885; Garl Melehers, 1906; Richard E. Miller, 1915; Louis Moeller, 1894; F. Luis Mora, 1906; Thomas Moran, 1884; H. Siddons Mowbray, 1891.

Hobart Nichols, 1920; Leonard Ochtman, 1904; Ivan G. Olinisky, 1919.

Walter Palmer, 1897; Maxfield Parrish, 1906; DeWitt Parrshall, 1917; Edward H. Potthast, 1906; Henry Prellwitz, 1912.

Robert Reid, 1906; William Ritschel, 1914; William S. Robinson, 1914; Charles Rosen, 1917.

Carl Rungius, 1920; Chauncey F. Ryder, 1920.

John S. Sargent, 1897; W. Elmer Schofield, 1907; Aaron D. Shattuck, 1861; Henry B. Snell, 1906.

Robert Spencer, 1920; Gardner Symons, 1911.

Edmund C. Tarbell, 1906; William Thorne, 1913; Louis C. Tiffany, 1880; D. W. Tryon, 1891; Helen M. Turner, 1921.

Robt. W. Van Boskerck, 1907; Elihu Vedder, 1865; Douglas Volk, 1899; Robert W. Vonnoh, 1906.

Henry O. Walker, 1902; Horatio Walker, 1891; Harry W. Watrous, 1895; Frederick J. Waugh, 1911; John F. Weir, 1896; C. D. Weldon, 1897; Carlton Wiggins, 1906; Irving R. Wiles, 1897; Frederick Ballard Williams, 1909; Charles H. Woodbury, 1907.

Cullen Yates, 1919; George H. Yewell, 1880.

**Sculptors**—Herbert Adams, 1899; Robert I. Aitken, 1914; Paul Wayland Bartlett, 1917; A. Stirling Calder, 1913; James Earle Fraser, 1917; Daniel Chester French, 1901; Charles Grafty, 1905; Anna Vaughn Hyatt, 1922; Isidor Kont, 1909; Evelyn Beatrice (Bathelder) Longman, 1919.

Frederick W. MacMonnies, 1906; Hernon A. MacNeil, 1906; Paul H. Manship, 1916; Charles H. Nichols, 1906; Edward C. Potter, 1906; A. Phimister Proctor, 1904; Frederick G. R. Roth, 1906; Lorado Taft, 1911; Bessie Potter Vonnoh, 1921; Adolph A. Weinman, 1911.

**Architects**—Henry Bacon, 1917; Arnold Brunner,

**AMERICAN ACADEMY OF ARTS AND LETTERS.**

The first seven members of the American Academy of Arts and Letters were selected by the National Institute of Arts and Letters from its own body in 1904 by ballot. The seven were William Dean Howells, Augustus Saint-Gaudens, Edmund Clarence Stedman, John La Farge, Samuel L. Clemens, John Hay and Edward MacDowell. In order to become eligible to the American Academy one must first be a member of the National Institute of Arts and Letters. This society was organized at

a meeting of the American Social Science Association in 1898. The qualification for membership is stated in the constitution, "It shall be notable achievement in art, music or literature." The number in the institute is limited to 250, and the election is by ballot.

The American Academy of Arts and Letters numbers fifty members and the officers are: William Milligan Sloane, President; Brander Matthews, Chancellor; Thomas Hastings, Treasurer; Robert Underwood Johnson, 15 West 81st St., New York City, Secretary.

The following are the living members of the academy, as of November 7, 1922.

John Singer Sargent  
Daniel Chester French  
James Ford Rhodes  
William Milligan Sloane  
Robert Underwood Johnson  
George Washington Cable  
Henry van Dyke  
William Crary Brownell  
Basil Lanneau Gildersleeve  
Woodrow Wilson  
Arthur Twining Hadley  
Henry Cabot Lodge  
Edwin Howland Blashfield  
Thomas Hastings  
Brander Matthews  
Elihu Vedder  
George Edward Woodberry

George Whitefield Chadwick  
George DeForest Brush  
William Rutherford Mead  
Bliss Perry  
Abbott Lawrence Lowell  
Nicholas Murray Butler  
Paul Wayland Bartlett  
Owen Wister  
Herbert Adams  
Augustus Thomas  
Timothy Cole  
Cass Gilbert  
William Roscoe Thayer  
Robert Grant  
Frederick MacMonnies  
William Gillette  
Paul Elmer More

Gari Melchers  
Elihu Root  
Brand Whitlock  
Hamlin Garland  
Paul Shorey  
Charles Adams Platt  
Maurice Francis Egan  
Archer M. Huntington  
Childe Hassam  
David Jayne Hill  
Lorado Taft  
Booth Tarkington  
Henry Bacon  
Charles Dana Gibson  
Joseph Pennell

The directors of the academy are: N. M. Butler, Hamlin Garland, Cass Gilbert, Thomas Hastings, A. M. Huntington, R. U. Johnson, Brander Matthews, W. M. Sloane, and Augustus Thomas.

In 1923 the academy will move into its new building at 155th Street, between Broadway and Riverside Drive, the cornerstone of which was laid by Marshall Poch in 1922.

**NATIONAL COMMISSION OF FINE ARTS.**

(1729 New York Ave., Washington.)

*Chairman*—Charles Moore; *Vice Chairman*—John Russell Pope; James L. Greenleaf, James E.

Fraser, Henry Bacon, Louis Ayres, H. Siddons Mowbray; *Sec. and Exec. Officer*—H. P. Caemmerer.

THE ALFRED B. NOBEL PRIZES.

THE Swedish scientist Alfred B. Nobel, the inventor of dynamite, died in 1896, bequeathing his fortune, estimated at \$9,000,000, to the founding of a fund, the interest of which should yearly be distributed to those who had mostly contributed to the benefit of mankind improvement during the

year immediately preceding that of the award. The Board of Directors of the Nobel Foundation, exclusively consisting of Swedes, must reside in Stockholm. The board has in its care the funds of the institution, and hands yearly over to the awarders of the prizes the amount to be given away. The value of each prize is on an average \$40,000.

| YEAR.   | Physics.                                        | Chemistry.                           | Medicine.                              | Literature.                              | Peace.                                            |

THE FRENCH ACADEMY.

The French Academy, founded in 1630 and incorporated in 1637, was abolished by the Revolution, but was revived in 1795 as one of the sections of the Institute of France.

The Academy, when full, consists of 40 regular members. There are, in addition, ten members at large (from whom the regular members are selected by the Academy to fill vacancies), eight foreign members, and seventy corresponding members.

| YEAR ELECTED | Names of Members.                                 | Born.                 | YEAR ELECTED | Names of Members.                    | Born.                        |

## ATTENDANCE IN HIGH SCHOOLS.

One-fourth of the high schools in the United States enroll from 2 to 27 students; another fourth, from 27 to 50 students; another fourth, from 50 to 100 students, and the last fourth, over 100 students.

Similarly, one-half of the 14,000 high schools in the country have an enrollment between 27 and 100 students. Out of every 1,000 students entering high schools, 725 stay into the second year, 525 into the third year, 449 into the fourth year; and 418 graduates.

The public high schools have greater influence in keeping the girls in school than they do in holding the boys. Of the 665,000 secondary students enrolled in the first year, only 45.3 per cent. are boys, indicating that more girls than boys enter high school. In the second year the percentage of boys is still smaller, viz., 42.7. In the third year the corresponding percentage of boys reduces to 41 and in the fourth year to 38.8.

This condition does not exist in the private high schools, where the boys constitute 45.8 per cent. of the first-year enrollment, 45.6 per cent. of the second-year enrollment, 46 per cent. of the third-year enrollment, and 44.6 per cent. of the fourth-year enrollment.

Of the students enrolled in a four-year high school, nearly one-half (47.3 per cent.) are in schools maintained longer than 180 days annually. Almost all of the other one-half of this group of students (48.8 per cent.) are found to be enrolled in schools running from 161 to 180 days each year, only 3.9 per cent. being enrolled in the four-year high schools having a term of 160 days or fewer.

In the three-year high schools over one-third (39.2 per cent.) of the students have a term as short as 160 days. Over one-half (56.6 per cent.) of the students enrolled in these three-year high schools have a term of 161 to 180 days. Only a few (4.2 per cent.) of these students are enrolled in high schools which are in session longer than 180 days.

## SUMMARY OF PUBLIC SCHOOL WORK IN UNITED STATES.

(Source: Bureau of Education, Department of the Interior. Reprinted from the Statistical Abstract of the U. S. Private schools not included, nor are public schools in American colonies.)

| SCHOOL YEAR. | Population 5 to 18 Years. | PUPILS.          |                         | TEACHERS. |         |         |                              | Total Expenditure. |

Financial loss due to irregular attendance is estimated on the basis of each State's total expenditure for public schools, compared with time lost, measured by vacant seats.

Enrolment (1890) 12,722,581; (1900) 15,503,110; (1910) 17,813,852.

Expenditures on public school libraries in the year ended June 30, 1919, totalled \$1,292,725, of which States contributed \$1,130,054. In New York State the expenditures were \$155,745 by the State, and \$38,754 from other sources. The next largest contributor was California, \$94,179, and \$5,286 from other sources.

In the cases of public schools, both elementary and secondary, there is no definite information as to the actual number of "schools," but only as to the number of school buildings.

## EDUCATION PROLONGS THE LIVES OF WOMEN.

(From School Life, Published by U. S. Bureau of Education.)

College women live longer than other women, according to a study by Myra M. Hulst, of the American Red Cross, published in the Quarterly Publication of the American Statistical Association. Among 15,561 graduates of three women's colleges, the death rate between the ages of 20 and 64 years is only 3.24 per 1,000. For college women between 25 and 34 years, the death rate was 2.77 per 1,000, while for women in the general population, it was more than twice as high, namely, 6.10 per 1,000.

Such favorable figures for college graduates are not surprising when it is considered that as a rule only the physically fit continue through the four years to graduation. Physical and medical examinations given to all students bring to light remediable defects and lead to improvement. Favorable living conditions such as college women are likely to encounter, prescribed physical exercise, and general physical education add to the high level of health.

College women as a rule come from high-class

homes, where the environment gives them a good start in life. Judging by the names of the women considered in this study, the majority of them are from American stock. Such women, of good financial condition, well fed and clothed, and with opportunity for leisure are likely to have better health than the average woman, whose living conditions are less favorable.

Professional occupations, such as college women usually engage in, have fewer risks than the industrial and other occupations of non-college women. It was found that 58 per cent. of the college graduates had been engaged in teaching.

In this connection, a study was made of the death rate of women teachers in New York City as reported by the City Pension Commission. For ages between 25 and 34, the death rate was 2.95, almost as low as that of the college women for the same ages. The death rates for teachers were found to be the lowest existing in the New York City service.

Clearly education and professional life have a good effect on women's health.

## ILLITERACY IN BIG UNITED STATES CITIES.

(U. S. Census, 1920 returns. Illiterates are those 10 years old and over who cannot read or write.)

NOTE.—All the figures in the table relate to persons 10 years old or over.

| CITY.                     | WHOLE POPULATION. |              | NATIVE WHITE POP. |              | FOR-BORN WHITES |              | NEGROES. |              |

The pronounced differences between the percentages of illiteracy for the total population and for native whites which appear for many cities are due to the large proportions of illiterates among the foreign-born whites and the Negroes, the former having a considerable effect upon the average percentages in the Northern cities, and the latter in the Southern cities. For example, in Fall River, Mass., where the illiteracy in the population 10 years of age and over was 11.9 per cent. for all classes combined, it was only 1 per cent. for the native whites, but was 25.5 per cent. for the foreign-born whites. Again, in Birmingham, Ala., the percentage of illiteracy was 8.4 for the total population, 0.7 for the native whites, and 18.4 for the Negroes.

## AMERICAN COLLEGES AND UNIVERSITIES.

This list is based on the 1921-1922 Education Directory of the United States Bureau of Education, Dept. of the Interior.

Where the name of the institution is in italics, the figures are from the 1922 ALMANAC. In other cases the data are from questionnaires returned by the institution in the year 1922.

## RHODES SCHOLARSHIPS.

Two Rhodes Scholarships to the University of Oxford are assigned to each State in the Union. The scholarships are tenable for three years and have must be (a) A male citizen of the United States. (b) Over 19 and not over 25 years of age. (c) Above sophomore standing in some recognized degree-granting university or college in the United States. Candidates may apply either from the State in which they have their ordinary private domicile, home, or residence, or from the State in which they have received at least two years of their college education.

Selections are made on the basis of the candidate's record in school and college supplemented by references of persons who know him and by a personal interview with the Committee of Selection. There is no written examination. Elections are made on the basis of—(1) Qualities of manhood, force of character, and leadership. (2) Literary and scholastic ability and attainments. (3) Physical vigor, as shown by interest in outdoor sports or in other ways. No restriction is placed on a Rhodes scholar's choice of studies. He may read for the Oxford B. A. in any of the Final Honor Schools, he

may enter for any one of the so-called Diploma Courses, or, if qualified by previous training, may be admitted to read for advanced degrees such as the B. Sc., B. Litt., B. C. L., or Ph. D.

An election is held each year in two-thirds of the States of the Union. In 1923 one scholar will be elected in the following States: Ala., Ariz., Ark., Calif., Colo., Del., Fla., Ga., Idaho, Iowa, Kan., La., Mich., Minn., Miss., Mo., Mont., Neb., Nev., N. M., N. C., N. D., Okla., Ore., S. C., S. D., Tex., Utah, Wash., W. Va., Wis., Wyo. Applications will be due on or before Oct. 21, 1923; the election will be held on Dec. 1, 1923; and the Rhodes scholars so elected will enter Oxford in October, 1924. Application blanks and further information may be obtained from the officers of any college or university in the United States or from President Frank Aydellotte, American Secretary to the Rhodes Trustees, Swarthmore College, Swarthmore, Pa. The Secretary of the Committee of Selection for New York State is Dr. Augustus S. Downing, State House, Albany.

The 1922 Rhodes scholar from New York is Jas. A. Ross, Jr., (Princeton University) 85 Schaeffer St., Brooklyn, N. Y.

## WORKERS' COLLEGE AT KATONAH, N. Y.

(From a 1922 bulletin of the U. S. Department of Labor.)

Brookwood, the first resident college for workers in this country and located at Katonah, N. Y., has been in operation for some months. This experiment in adult education is being carried out under the supervision of two committees, one of which consists of the Presidents of the federations of labor of several States and representatives of several trade unions, including the teachers' union of New York City, and endeavors to enlist the co-operation of labor organizations in the work and to see that the courses offered are applicable to the needs of the labor movement.

The other committee, composed of professors from Columbia University, the University of Pennsylvania, and Amherst College, is an advisory body which assists in so planning the courses offered as to make

them valuable to the class of students for whom they are intended.

About 20 students, 7 of whom are women, are in attendance. The students, most of whom are from positions of some sort in labor organizations, are older than those in colleges generally, the average age being 25 years. The government of the college is democratic, each member—student or teacher—having one vote in its management. All students are carrying the same work during the first year of the operation of the college, namely, history of civilization, economics, statistics, English literature, grammar for those who need it, and a course in debate and argumentation.

Once a week a debate is held and the following day a period of two hours is devoted to criticism of the "effectiveness of the argument and the soundness of presentation."

## COLLEGES WITH \$1,000,000 ENDOWMENT OR OVER.

| INSTITUTION.          | Location.            | Amount.     | INSTITUTION.          | Location.            | Amount.    |

## BEGINNINGS OF FAMOUS FOREIGN UNIVERSITIES.

The University of Oxford is said to have been founded by King Alfred in 872.

The first college of the University of Cambridge was founded by Hugo, Bishop of Ely, in 1257.

The University of Paris was founded by King Philip II. about 1200.

The first university in the German Empire was at Prague, Bohemia, 1348.

Czar Alexander I. founded the Universities of St. Petersburg and Moscow in 1802.

The oldest Spanish university is that of Salamanca, founded in 1240.

The University of Copenhagen, Denmark, was founded in 1479.

The oldest Italian universities are Bologna, founded 1200; Padua, 1222; Naples, 1224; Genoa,

1243; Perugia, 1276; Macerata, 1290. There were nine more founded between 1300 and 1550. Italy was the greatest resort of students for the higher education in the middle ages.

Trinity College, Dublin, was incorporated by royal charter in 1591.

The University of Edinburgh was founded in 1582 by a charter granted by King James VI. of Scotland.

The University of Jagiellie, of Cracow, Poland, where Copernicus received his education, was founded in 1364 by the Polish King Kazimiers the Great, and endowed by a later Polish King, Jagiellie, in 1400.

Note.—The dates of founding of the higher institutions in the United States and Canada will be found in the tables of American colleges and universities.

## INCOME AND EXPENSES OF YALE UNIVERSITY.

Yale University has sent to its alumni the following analysis showing the sources from which it gets its income and the way that income is spent. The item "alumni fund" is the yearly voluntary contribution of its alumni, and "annuities and adjustments" covers the money used in bringing the salaries of professors up somewhere near the high cost of living.

The figures show that the two sources of income, "tuition and fees" and "dormitory," which constitute the ordinary revenues of a business concern, together make up less than one-third of the amount required to run the university.

| INCOME.               | Pct.  | Expense.            | Pct.  |
|-----------------------|-------|---------------------|-------|
| Investment.....       | 46.9  | Instruction.....    | 43.3  |
| Tuition and fees..... | 25.6  | Property.....       | 20.7  |
| Alumni fund.....      | 12.0  | Annuities, etc..... | 9.3   |
| Dormitory.....        | 7.1   | Administration..... | 8.5   |

## CATHOLIC BOYS' BRIGADE OF THE UNITED STATES.

Founded in 1916, by the late Cardinal Farley, New York City—a national official organization for Catholic boys. National office: National Catholic Welfare Council, 1312 Massachusetts Ave., N. W., Washington, D. C. General Executive Headquarters, 128 West 37th Street, New York. This movement aims to improve, it is announced, the religious and civic character of boys. It has a program of athletics, sports, military exercises,

signaling, first aid, civics, music, entertainments, hikes, camping, parades, contests and employment; it aims to promote patriotism, religious practices and higher education. Membership is open to all many boys 10 years of age or over. Junior and Senior division branches all over the country and has its own uniform. Executive officers, N. Y. General headquarters, 130 West 37th St., New York City: Rev. Thomas J. Lynch, Director General; Rev. Fr. Kilian, O. M. Cap., Chief Commissioner; Michael F. Loneragan, Executive Secretary.

## THE KNIGHTS OF COLUMBUS.

(By John B. Kennedy of K. of C. Headquarters.)

The Knights of Columbus—the leading Catholic laymen's organization in the world—was founded by Rev. M. J. McGivney in 1882 in St. Mary's parish, New Haven, Conn. From an original membership of eleven it grew from city to city in Connecticut and then from State to State and beyond national boundaries, until its membership is more than 800,000, and it operates in the United States and its possessions, in Canada, Newfoundland, Mexico and Cuba. It has more than 2,000 councils, many of which own club buildings and are governed by State jurisdictions, of which there are 55, and by a Supreme Council, composed of elected State representatives, while executive power is vested in a board of directors. The primary object of the Knights of Columbus is to associate Catholic men for religious and civic usefulness. There are four degrees of membership, none of which has any secret or oathbound stipulation—the competent ecclesiastical and civic authorities being empowered to demand and receive the degree work of the order.

The Knights have maintained since their inception an insurance feature for members. Insurance on members now in force approximates \$250,000,000. The solvency of the order, as measured by actuarial standards, is over 126 per cent. Non-insurance members are associates. The order was originally made up of only insurance members. Previous to their emergence into general public notice as an agency of war welfare work the Knights had done educational and social work. They founded the first chair of American history in this country—at the Catholic University, Washington—and they endowed the same university with \$500,000 for fifty scholarships in perpetuity. State and local councils also supported educational and social work. The Knights aided the victims of many castrations.

An important work of the Knights has been their nine-year fight against extreme radicalism through the medium of public forums. Lecturers have been sent through the country to combat materialistic Socialism. This work has met with success and is being continued. The K. of C. first entered war welfare work in the Spanish-American War. When the

war with Germany started they raised \$1,500,000 among their members and began at the cantonments at home. Later, on Gen. Pershing's invitation, the Knights went overseas and there, as well as at home, supported by a fund of \$14,000,000 donated by people of all classes, they carried on an intensive and extensive work.

In all, the Knights received approximately \$40,000,000 from the American people. With the balance remaining at the conclusion of active war work, they financed a Nation-wide chain of employment bureaus, finding work for 500,000 former service men at a minimum wage of \$20 per week; they awarded 416 free college scholarships to former service men in institutions like Yale and Georgetown, and inaugurated a Nation-wide chain of free night schools for service men and women, with nominal charges for civilians. These schools graduated over 40,000 pupils last year. There are more than 100 of them in operation teaching technical, business and citizenship courses. The balance of the war camp fund on hand is for use in continuing the educational work in hand and in conducting hospital relief work for the ex-service men in the public health service hospitals, the Knights of Columbus having been specially designated to co-operate with the Red Cross in providing for the comfort and entertainment of these men for whom the war is not yet over.

The most recent national activities of the Knights of Columbus have been the conduct of an American history movement for the improvement of history teaching, in which the K. of C. offered prizes in a monograph contest, both prizes being won by non-Catholics; the institution of the K. of C. National Correspondence School at New Haven for war veterans of America, which in its first year of existence enrolled 55,000 men in 30 free technical and clerical courses, and the expansion of K. of C. hospitalization service so that in 411 hospitals, 165 K. of C. workers, all of war experience, serve some 29,000 war veterans in the same manner in which they were served overseas.

In round figures, the Knights are spending at the rate of \$2,500,000 per year in behalf of the American war veterans.

## ELKS, BENEVOLENT AND

Grand Lodge officers (elected at Atlantic City, N. J., July 11, 1922)—*Grand Exalted Ruler*—J. Edgar Masters, Charleroi, Pa. *Grand Esteemed Leading Knight*—Frederick A. Morris, Mexico, Mo. *Grand Esteemed Loyal Knight*—Harry A. Ticknor, Pasadena, Cal. *Grand Esteemed Lecturing Knight*—Fred O. Nuetzel, Louisville, Ky. *Grand Secretary*—Fred C. Robinson, Congress Hotel, Chicago. *Grand Treasurer*—P. J. Brennan, Denison, Tex. *Grand Trustee* (five-year term)—Robert A. Scott, Linton, Ind. *Grand Tyler*—Clement Scott, Vancouver, Wash. *Grand Inner Guard*—Albert E. Hill, Spartanburg, S. C.

The Elks Support Fund has provided vocational training, at a cost of \$69,000 to 106 disabled American boys. The total receipts of the War Relief Commission, June 5, 1920, to June 15, 1921, were \$428,010; disbursements, \$191,734. The membership, as of July 1, 1922, was approximately 850,000. Members by States, as of April 1, 1922—Guam, 189; Ala.,

Disbursements for charity in the last three years: (1919) \$1,258,560; (1920) \$1,566,234; (1921) \$2,044,218.

## THE SALVATION ARMY.

(Prepared by That Organization.)

National headquarters, 122 West 14th Street, New York City.

In 1920 the United States branch of the movement underwent a thorough reorganization. Three territories were created, with headquarters respectively in New York, Chicago and San Francisco. Separate editions of the War Cry were published in each territory. Commander Evangeline Booth was, up to the time of going to press, in general charge of the work in the entire country.

International officials—William Bramwell Booth, eldest son of the founder of the Salvation Army, is General of the entire organization, the international headquarters being in London, England. His wife, Mrs. Bramwell Booth, has charge of the work in the British Isles. Next in rank comes Commissioner Edward J. Higgins, Chief of the Staff, who some years ago was Chief Secretary for the work in the United States of America.

## DOMESTIC STATISTICS.

The Salvation Army in the United States has (as of year ending Sept. 30, 1921) 1,117 corps and outposts, 3,728 officers and cadets, 67 hotels for men, 2 for women and 11 boarding houses for young women, with total accommodation, 7,386; beds supplied, 1,711,118, meals supplied 704,819; 88

industrial homes with accommodations for 2,103 and 1,714,505 meals and 529,437 beds supplied; 6 children's homes with accommodations for 670, and 206,600 beds and 634,123 meals supplied; 12 slum posts and nurseries, with 76,615 children sheltered in a year; 23 rescue homes and maternity hospitals, with accommodations for 1,709, and 4,393 girls and 2,491 children admitted; Christmas dinners for 293,171, and toys for 108,846 children; 1,383,943 persons afforded temporary relief outside industrial homes and hospitals; outside employment found for 27,340 men and 8,089 women; 336,478 lbs. of ice and 3,274,591 lbs. of coal distributed.

## INTERNATIONAL STATISTICS.

(Year ending December 31, 1921.)

Countries and colonies occupied, 73; languages in which Gospel is preached, 46; corps and outposts, 12,211; social institutions, 1,286; day schools, 752; naval and military homes, 35; officers and cadets engaged in social work, 3,697; persons without rank employed wholly in S. A. work, 5,941, local officers (senior and junior), 74,469; bandsmen (senior) 26,017, bandsmen, (junior) 7,419; songsters, 30,943, corps cadets, 18,846; periodicals issued, 83; total copies per issue, 1,461,880.

## YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF NORTH AMERICA.

General offices, 347 Madison Avenue, New York City. Officers: *Chairman*—Alfred R. Marling. *Vice Chairmen*—James W. Speers, Roger H. Williams, William D. Murray, Abner Kingman. *Treasurer*—B. H. Fancher. *General Secretary*—John R. Mott. *Consulting General Secretary*—Richard C. Morse. The International Committee was incorporated April 16, 1883. It is now composed of an authorized membership of 200 representative business men scattered throughout North America. It is the agent of the International Convention of Young Men's Christian Associations, charged with encouraging, promoting and supervising Christian welfare work among men and boys.

The International Committee in its organization includes the Home Division with its five regions and eleven departments, its Foreign Division, and its continued work among soldiers in warring countries where armies are not yet done away with.

Forty-two State Committees and the National Council of Canada, co-operating with both the local and international work, maintain closer relations with the local associations in the States and Provinces of North America. These State organizations have 196 secretaries, \$1,319,000 of association property and promote the State-wide interests of the movement.

Under the combined co-operative interests of the General Agencies of Supervision there are (Sept. 1, 1922) 1,978 local associations and specific organizations, 6,464 employed officers; 95,795 committee-men, directors and volunteer leaders; 883,169 members, of which 228,860 are boys. The net property of the movement, including State work and international, is \$160,400,000; total contributions from friends toward the operating expenditures of the movement, \$11,561,100, and total operating expenditures of the movement, \$47,682,400. These figures do not include any war work data. The service of the association to men and boys includes a great variety of activities, among the more important of which are 69,892 socials and entertainments; 67,922 more or less permanent positions found for men; over 56,000 beds in Y dormitories used by men over

15,000,000 times during the year; 68,556 men and boys in Y summer camps; 1,679 industrial plants served physically, educationally, and otherwise; 14,000 foreign-born men taught to speak and write English, and 13,000 trained in citizenship; 110,639 in regular standard educational classes; 303,434 men and boys in regular gymnasium classes; 201,182 enrolled in the regular Bible study classes; over 8,000,000 attending domestic religious meetings; 37,131 decisions for the Christian life, and 11,664 united with the church of their choice.

The foreign work of the North American associations has been brought more helpfully than ever under more careful review. It includes work in 21 different countries where, at the expense of the North American associations, secretaries from North America are allocated to aid in the development of both the national work of a country like China, as well as in the local associations of such country. In this foreign work there are 357 different associations with 767 employed officers, 214 of which are from America and the rest native; 15,905 members with correspondingly large social, physical, educational and religious activities. Among the most notable gatherings on the foreign field the past year was that of the World's Student Christian Federation at Peking, attended by over 800 delegates from 32 nations. The \$4,000,000 foreign association building programme, which was interrupted by the great war, has been resumed, and, it is hoped, will soon be carried to a successful issue.

While the Armistice was signed over 4 years ago, yet large areas overseas are still in war conditions. The National War Work Council was dissolved in March, 1922, after it had passed the remaining part of its work over to a special group of the International Committee. There are still a number of American workers in charge of the association welfare work among from 1,000,000 to 1,500,000 men in such countries as Poland, Greece, Turkey, Italy, Czecho-Slovakia. The reducing process of this war work is being made as fast as possible. Less than a dozen American secretaries are left in connection with the A. F. G. on the Rhine.

## YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF THE STATE OF NEW YORK.

The State Executive Committee of the Young Men's Christian Associations of the State of New York has its general office at 2 West 45th Street, Room 1001, New York City. *Chairman*—William M. Kingsley. *Treasurer*—Samuel Woolverton. *State Secretaries*—Frank W. Pearsall and Fred I. Eldridge. This committee was incorporated under the laws of New York, April 14, 1886. Included in the regular activities the State Committee owns and

operates Camp Dudley at Westport-on-Lake Champlain as a summer camp for boys. The membership in the State is 101,940, divided as follows: *General*, 80,507, of which 18,400 are boys; *Railroad*, 17,900; *Student*, 2,245; *county and small town*, 1,252; *colored*, 766. Property holdings and funds paid in amount to \$21,296,635. A meeting of the State association, comprising the 171 associations in the State, is held in February.

## YOUNG MEN'S CHRISTIAN ASSOCIATION OF THE CITY OF NEW YORK.

General office, 2 West 45th Street, Room 1402, New York City. Officers: *President*—William M. Kingsley. *Treasurer*—Cleveland E. Dodge. *General Secretary*—Walter T. Diack. *Comptroller*—Henry M. Orne. The association maintains work for men and boys at 37 points; 19 general, 9 student, 5 railroad, 1 merchant seamen's and army. Branches of the association: 1. Twenty-third Street, 215 West 23d Street. 2. West Side, 318 West 57th Street. 3. Harlem, 5 West 126th Street. 4. East Side, 153 East 86th Street. 5. Institute, 222 Bowery, near Prince Street. 6. Washington Heights, temporarily without a building. 7. Bronx Union, 470 East 161st Street, corner Washington Avenue. 8. Intercollegiate, office, 2 West 45th Street. 9. French, 109 West 54th Street. 10. Army, Forts Jay and Bleecker; office 2 West 45th Street. (Work also for sailors, National Guard, and soldiers in hospitals). 11. West 135th Street, for colored men, 181 West 135th Street. 12. Bowery, 8 East Third Street, near the Bowery. 13. Railroad, New York Central and New Haven Lines, 309 Park Avenue, corner 49th Street. West 72d Street and North River, Mott Haven, 179 East 150th

Street, and New Durham, N. J., Railroad Men's Building. 14. Railroad, Pennsylvania Railroad, Eighth Avenue and 32d Street. 15. Merchant Seamen's, 525 West 23d Street.

College associations affiliated with the Intercollegiate Branch: Club House, 346 West 57th Street. Rooms for college students at 410 East 26th Street. Office, 2 West 45th Street. 1. College of the City of New York. 2. College of Physicians and Surgeons. 3. Columbia University. 4. Cornell University Medical College. 5. New York University. 6. Union Theological Seminary. 7. University and Bellevue Hospital Medical College.

The total membership of the city is 380,389, including 3,143 boys. There are 917 employees, including 191 paid teachers. There are 14,843 gymnasium members, and 8,726 physical examinations were given, 3,062 members served on committees. 8,813 students in evening educational classes, 174,500 books drawn from libraries, lodgings furnished, 809,149, 2,329,105 meals supplied, 7,660 situations secured, 4,553 religious meetings attended by 380,389, sleeping accommodations for 2,202 and men directed to rooms outside of buildings, 10,878.

## THE NATIONAL HEALTH COUNCIL.

The National Health Council is an organization composed of the ten leading national voluntary health agencies of this country, together with the United States Public Health Service as a conference member.

The members are as follows: American Public Health Association, American Red Cross, American Social Hygiene Association, American Society for the Control of Cancer, Conference of State and Provincial Health Authorities of North America, Council on Health and Public Instruction of the American Medical Association, National Child Health Council, National Committee for Mental Hygiene, National Organization for Public Health Nursing,

National Tuberculosis Association, United States Public Health Service (conference member).

The officers of the council are: *Chairman*, Dr. Livingston Farrand; *Vice Chairman*, Dr. L. K. Frankel; *Recording Secretary*, Dr. S. J. Crumblin; *Treasurer*, Dr. Wm. F. Snow; *Executive Officer*, Dr. D. B. Armstrong.

Each member organization elects a representative and alternate to serve on the council. The Surgeon General represents the United States Public Health Service.

The American Child Health Association and the National Child Labor Committee are indirectly members through their affiliation with the National Child Health Council.

## YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF THE U. S. OF AMERICA.

(Contributed by that organization.)

The purpose of the Young Women's Christian Association is to advance the physical, social, intellectual and spiritual interest of young women, and to promote growth in Christian character and service, and to become a social force for the extension of the Kingdom of God. The Convention is held biennially in April. The officers of the Association are: President, Mrs. Paist, of Philadelphia, Pa.; Vice-Presidents, Mrs. John Hanna, of Dallas, Texas; Mrs. C. R. Wilson, of Detroit, Mich.; Secretaries, Mrs. E. B. Kinsworthy, of Little Rock, Ark., and Miss Marjorie Collier, of Colorado College.

The National Board of the Young Women's Christian Associations is the Executive Committee of the organization, to which the work of the organization is intrusted during the interim of conventions. The officers of the National Board are: President, Mrs. Robert E. Spear; Chairman of the Executive Committee, Mrs. John Branch; Secretary, Miss Katharine Lambert; Treasurer, Mrs. Samuel J.

## THE Y. W. C. A. IN

There are in the United States 1,152 affiliated Young Women's Christian Associations, with 280 branches. The Young Women's Christian Association of the United States has a membership of 584,000, real property amounting to over \$25,000,000, and gross budgets of local Associations, approximately, for 1921, of \$22,000,000, about 75 per cent. of which is met by earnings from cafeterias, boarding homes, etc. The National Board during 1921 expended upon its regular work \$2,679,245, of which

## THE Y. W. C. A. IN

It has in New York City thirteen Association residences, offering comfortable, clean and "homey" rooms at a moderate price. These have 1,114 beds and during 1921, 27,479 girls were housed; 6,186 known placements were made through the Young Women's Christian Association room registry service during the year 1921. There are eleven cafeterias and dining rooms, including those connected with the residences, which furnish wholesome, inexpensive food. Young Women's Christian Association Bureaus for Employment and Vocational Advice in 1921 placed 13,070 girls in positions; 10,665 girls attended Young Women's Christian Association educational classes covering more than forty-five subjects as varied as stenography, Spanish,

Broadwell. The General Secretary is Miss Maboi Cratty. It operates through its headquarters and five regional offices. The headquarters building and National Training School are located at 600 Lexington Ave., New York City. The regional offices are in New York; St. Louis, Mo.; Chicago, Ill.; Denver, Col.; San Francisco, Cal.; Atlanta, Ga.

The National Board of the Young Women's Christian Associations interests itself in the city, student town and country Associations throughout the United States and its territories, and through its Foreign and Overseas Department. It works with other members of the World's Committee of the Young Women's Christian Association in carrying on Association work for the women and girls in Europe, the Near East, the Orient, and South America. Work in the Oriental countries is undertaken by the Association only upon the invitation of the Mission Boards already working in the country. At present work is being carried on under this department in fifteen countries, with a staff of 224 Secretaries.

## THE UNITED STATES.

\$299,821 was for promoting work in China, Japan, India and South America. The National Board has endowment yielding, approximately, \$100,000 annually and income producing features which in 1921 brought in \$813,524. Contributions from Associations and individuals totalled \$1,242,572.

Under the Continuation Committee of the National War Work Council there was still going on during 1921 certain war work of post-war significance, financed by the balance of sums originally appropriated for this work from war work funds.

## NEW YORK CITY.

domestic science and costume designing; foreign-born women and girls of sixty nationalities availed themselves of the service of the baby clinics and employment departments and joined language classes and recreational activities of International Institutes. Attendance in gymnasium classes was 31,970; total swimming pool attendance, 101,631; total attendance at religious service, 103,931.

Officers of the Metropolitan Board: President, Mrs. William Feltows Morgan; First Vice-President, Mrs. William W. Rossiter; Second Vice-President, Mrs. Dwight Morrow; Secretary, Mrs. William Sloane Coffin; Treasurer, Mrs. William Henry Hays; Assistant Treasurer, Mrs. Warren A. Ransom; Chairman of Finance, Mrs. E. P. Townsend.

## THE AMERICAN LEGION.

(National Headquarters, Indianapolis, Indiana.)

The American Legion, composed of men and women who served honorably in the armed forces of the United States in the World War, was organized in Paris, France, in 1919. The 1922 convention was held at New Orleans, Oct. 16-20.

## NATIONAL OFFICERS.

Commander—Alvin Owsley, Denton, Tex. Vice Commanders—Edward J. Barrett, Sheboygan, Wis.; Watson B. Miller, Washington, D. C.; E. Eric Cooke, Dawson, Ga.; Robert O. Blood, Concord, N. H.; O. P. Plummer, Casper, Wyo. Chaplain—Father William P. O'Connor, Cincinnati, O. Adjutant—Lemuel Bolles, Indianapolis, Ind. Treasurer—Robert H. Tyndall, Indianapolis, Ind. Judge Advocate—Robert A. Adams, Indianapolis, Ind. Historian—Eben Putnam, Wellesley Farms, Mass. Assistant Adjutant—Russell G. Creviston, Indianapolis, Ind.

Among the distinguished guests of the Legion at the convention were: Gen. John J. Pershing, Kenesaw Mountain Landis, Samuel Gompers, Charles Bertrand, member of the Chamber of Deputies, Paris, France, and President of the International Veterans' Federation; Major J. B. Brunnell Cohen, representing the British Legion; Gen. James Dinkins, Assistant Adjutant of the United Confederate Veterans; Gen. E. K. Russ, National Vice-Commander-in-Chief of the Grand Army of the Republic; M. Reni-Mel, France; Admiral Magruder, U. S. N. There were Legion delegates not only from every State in the Union, but from Argentina, Brazil, Great Britain, Chile, China, Cuba, Guatemala, India, Japan, New Zealand, Porto Rico, Portuguese West Africa, Venezuela, Panama, and Mexico.

Among the resolutions adopted by the Legion in the convention was one that the American Legion stand for the carrying out of its obligations to the disabled of war and that should another war arise "when the American people are aware of the extent of war profiteering, a national determination will have developed that in any future war there shall be a draft not only of service men, but of the laboring

man and capitalist as well. Had there been such a draft, the fundamental basis of adjusted compensation now temporarily thwarted by executive action would never have arisen."

THE AMERICAN LEGION AUXILIARY—  
NATIONAL BODY.

The following officers were elected by the second annual convention of the American Legion Auxiliary at New Orleans: President—Dr. Kate Waller Barrett, Alexandria, La.; Vice Presidents—Mrs. Frank E. Fleming, Augusta, Ga.; Mrs. Flora Spaulding, Manchester, N. H.; Mrs. Margaret Simon, Denver, Col.; Mrs. Jennie R. Neeley, Tacoma, Wash.; Mrs. Donald McCrear, Jr., Council Bluffs, Ia.; Secretaries—Katherine R. Lewis, Indianapolis, Ind. Treasurer—Miss M. I. McCoy, Toledo, Ohio. Historian—Mrs. Belle Ney, Albuquerque, N. M. Chaplain—Mrs. F. O. Burdick, Wichita Falls, Tex.

AMERICAN LEGION AUXILIARY—  
N. Y. STATE BODY.

President—Mrs. William G. Keens, Albany, N. Y.; Secretary—Mrs. Arthur A. Ransom, Hall of Records, New York City; Executive Committee—woman—Mrs. William G. Keens, Albany.

(Note: For other officers communicate with Mrs. Arthur A. Ransom, Hall of Records, New York City.)

THE AMERICAN LEGION—DEPARTMENT  
OF NEW YORK.

Officers: Commander—Albert S. Callan, Chatham, N. Y.; Vice Commander—C. W. A. Cannon, Richmond Hill, L. I., N. Y.; Adjutant—John R. Schwartz, 305, Hall of Records, New York City, N. Y.; National Executive Committee—E. B. McLean, Binghamton, N. Y.; Finance Officer—William T. Hulke, Westchamilton Beach, L. I., N. Y.; Chaplain—Rev. Arthur A. LeMay, Soldiers and Sailors' Home, Bath, N. Y.; Service Officer—Carl W. Sudhoff, 302, Hall of Records, New York City, N. Y.

Washington, F. W. Lewis, Tumwater.  
West Virginia, F. M. Brown, Pliny.  
Wisconsin, J. G. Seyfert, Eagle River.  
Wyoming, Miss Margaret Bundy, Hillsdale, Box 157.

**THE FEDERAL COUNCIL OF THE CHURCHES OF CHRIST IN AMERICA.**

The Federal Council of the Churches of Christ in America was established in 1908 by the official action of thirty Protestant denominations in the United States to represent them and act for them in matters of common interest. The bodies thus composing the Federal Council are:

Baptist Churches, North; National Baptist Convention; Free Baptist Churches; Christian Church; Christian Reformed Church in North America; Churches of God in N. A. (General Eldership); Congregational Churches; Disciples of Christ; Friends; Evangelical Synod of N. A.; Evangelical Association; Methodist Episcopal Church; Methodist Episcopal Church, South; African M. E. Church; African M. E. Zion Church; Colored M. E. Church in America; Methodist Protestant Church; Moravian Church; Presbyterian Church in the U. S. A.; Presbyterian Church in the U. S. (South); Primitive Methodist Church; Protestant Episcopal Commissions on Christian Unity and Social Service; Reformed Church in America; Reformed Church in the U. S.; Reformed Episcopal Church; Reformed Presbyterian Church, General Synod; Seventh Day Baptist Churches; United Brethren Church; United Evangelical Church; United Presbyterian Church; United Lutheran Church (consultative member).

The work of the Federal Council is carried on through several important commissions, interdenominational in membership, dealing with various fields of the churches' interest. Through the Commission on Evangelism the evangelistic agencies of the various denominations co-operate in organizing united evangelistic efforts by the churches in communities throughout the country. The Commission on the Church and Social Service carries on extensive educational and research work concerning the church and social questions, particularly emphasizing better industrial relations and organizing conferences between churches and representatives of employers and labor to promote co-operation and a Christian spirit in industry. The Commission on International Justice and Goodwill is pursuing a vigorous programme in behalf of Christian inter-

nationalism, stressing at the present time a campaign for the reduction of armament and better relations with the Orient. The Commission on Councils of Churches is responsible for organizing and developing local federations or councils of churches in the larger communities, with a view of making the churches more effective forces in the community life. Among the important developments of the past year were the creation of the Commission on the Church and Race Relations, for the purpose of working for co-operation between the white and the Negro races in securing better conditions for the Negro people; and the establishment of the Committee on Mercy and Relief, as a central agency of the churches in the relief of the Russian famine and other similar appeals. Other important commissions deal with Christian Education, Temperance, Relations with France and Belgium and Relations with Religious Bodies in Europe.

The Central Office of the Council is at 105 East 22d Street, New York City. Offices are also maintained in the Woodward Building, Washington, D. C., and at 19 South La Salle Street, Chicago, Ill. The officers of the Council are: *President*, Robert E. Speer; *Treasurer*, Alfred R. Kimball; *General Secretaries*, Charles S. Macfarland and Samuel M. Cavert. The officers and secretaries of the Commissions are as follows: On *Evangelism and Life Service*, Rev. J. Ross Stevenson, Chairman; Rev. Charles L. Goodell, Executive Secretary; on *Christian Education*, Rev. William Adams Brown, Chairman; on the *Church and Social Service*, Shelby M. Harrison, Acting Chairman; Rev. Worth M. Tippy, Executive Secretary; Rev. F. Ernest Johnson, Research Secretary; on the *Church and Race Relations*, John J. Eagan, Chairman, Dr. George E. Haynes and Rev. W. W. Alexander, Executive Secretaries; on *Temperance*, Carl E. Milliken, Chairman; on *International Justice and Goodwill*, Dr. John H. Finley, Chairman; Rev. Sidney L. Gulick, Secretaries; on *Relations with France and Belgium*, William Sloane Coffin, Chairman; on *Relations with Religious Bodies in Europe*, Bishop James Cannon, Jr., Chairman; on *Councils of Churches*, Fred B. Smith, Chairman; Rev. Roy B. Guild, Executive Secretary.

women of Mooseheart Legion, 32,570; Junior Order of Moose, 5,178; total, 595,805.

New York Lodge, No. 15: *Dictator*—P. A. Shanor, 1465 Broadway. *Secretary*—E. H. Thels, 101 W. 127th St.,

# AMERICAN FEDERATION OF LABOR.

**Executive Council**—President, Samuel Compers; Secretary, Frank Morrison; Treasurer, Daniel J. Tobin, 222 E. Michigan St., Indianapolis, Ind.; First Vice-President, James Duncan, 25 School Street, Quincy, Mass.; Second Vice-President, Jos. F. Valentine, Commercial Tribune Bldg., Cincinnati, Ohio; Third Vice-President, Frank Duffy, Carpenters' Bldg., Indianapolis, Ind.; Fourth Vice-President, William Green, 1102-8 Merchants' Bank Bldg., Indianapolis, Ind.; Fifth Vice-President, W. D. Mahon, 104 East High Street, Detroit, Mich.; Sixth Vice-President, T. A. Rickert, 175 West Washington Street, Chicago, Ill.; Seventh Vice-President, Jacob Fischer, 222 East Michigan Street, Indianapolis, Ind.; Eighth Vice-President, Matthew Woll, 6111 Bishop Street, Chicago, Ill.

Headquarters, A. F. of L. Building, Washington, D. C.

In the Federation are 111 national and international unions, representing 34,000 local unions, 5 departments, 40 State branches, 983 city centrals, and 799 local trade and Federal labor unions.

The building trades, metal trades, mining, railroad and union label trades departments are all at Washington.

## STATE BRANCHES, A. F. OF L.

State branches and central bodies of the A. F. of L. are maintained for legislative and educational purposes, and they have no power to call strikes or negotiate wages or working conditions. Following are the chief officers of the State branches:

Alabama. Lewis Bowen, Birmingham.  
 Arizona. Thos. A. French, Phoenix.  
 Arkansas. L. H. Moore, Fifth and Scott Streets, Little Rock.  
 California. Paul Scharrenberg, 525 Market Street, San Francisco.  
 Colorado. Ed. Anderson, Denver.  
 Connecticut. I. M. Ornburn, 215 Meadow Street, New Haven.  
 Delaware. Fred W. Stierle, Wilmington.  
 Florida. W. P. Mooney, Miami.  
 Georgia. Louie P. Marquardt, Atlanta.  
 Idaho. Al Reynolds, Labor Temple, Boise.  
 Illinois. Victor A. Olander, 164-166 W. Washington Street, Chicago.  
 Indiana. Adolph J. Fritz, United Building, Indianapolis.  
 Iowa. Earl C. Willey, Sioux City.  
 Kansas. William Howe, Topeka.  
 Kentucky. Peter J. Campbell, Louisville.  
 Louisiana. Ernest H. Zwally, Shreveport.  
 Maine. H. B. Brown, Augusta.  
 Maryland-District of Columbia. Henry Broening, American Building, Baltimore.  
 Massachusetts. Martin T. Joyce, Emberton Building, Boston.  
 Michigan. John J. Seannell, Detroit.  
 Minnesota. George W. Lawson, 75 West Seventh Street, St. Paul.  
 Mississippi. Jos. W. Jones, Meridian.  
 Missouri. R. T. Wood, Springfield.  
 Montana. J. T. Taylor, Helena.  
 Nebraska. Frank M. Coffey, Labor Bur., Lincoln.  
 Nevada. E. C. Mulcahy, Sparks.  
 New Hampshire. Chas. H. Bean, Jr., Franklin.

New Jersey. Henry F. Hilfers, 16 Clinton Street, Newark.

New Mexico. Jas. J. Votaw, Albuquerque.

New York. Edw. A. Bates, Jones Building, Utica.

North Carolina. C. G. Worley, Asheville.

North Dakota. N. M. Aune, Grand Forks.

Ohio. Thomas J. Donnelly, Ferris Building, Columbus.

Oklahoma. Victor S. Purdy, Oklahoma City.

Oregon. W. E. Kimsey, Portland.

Pennsylvania. C. F. Quinn, Commonwealth Trust Company Building, Harrisburg.

Porto Rico. Free Federation of Workmen, Rafael Alonso, San Juan.

Rhode Island. Lawrence A. Grace, 37 Weybosset Street, Providence.

South Carolina. T. B. Cooper, Columbia.

South Dakota. H. A. Tripp, Sioux Falls.

Tennessee. W. C. Birthwright, Nashville.

Texas. Robert McKinley, Temple.

Utah. J. J. Sullivan, Labor Temple, Salt Lake City.

Vermont. Nelson A. Malmgren, Rutland.

Virginia. J. Gribben, Newport News.

Washington. W. M. Short, Seattle.

West Virginia. H. L. Franklin, Charleston.

Wisconsin. J. J. Handley, Milwaukee.

Wyoming. Ward Hudson, Cheyenne.

## THE RAILWAY BROTHERHOODS.

Brotherhood of Locomotive Engineers, President, Warren S. Stone, B. of L. E. Building, Cleveland, Ohio.

Brotherhood of Locomotive Firemen and Engineers, President, W. S. Carter, 901 Guardian Building, Cleveland, Ohio.

Brotherhood of Railroad Trainmen, President, W. G. Lee, American Trust Building, Cleveland, Ohio.

Order of Railway Conductors of America, President, L. E. Sheppard, Masonic Temple, Cedar Rapids, Iowa.

## ORDER OF RAILWAY CONDUCTORS.

**Officers of the Grand Division**—L. E. Sheppard, President, Cedar Rapids, Iowa; A. B. Garretson, Advisory Counselor, Cedar Rapids, Iowa; S. N. Berry, Senior Vice-President, Cedar Rapids, Iowa; C. E. Whitney, General Secretary and Treasurer, Cedar Rapids, Iowa; E. P. Curtis, Vice-President, Crystal City, Tex.; W. M. Clark, Vice-President, 5927 Wabash Avenue, Chicago, Ill.; W. C. Turner, Vice-President, 3111 Eads Avenue, St. Louis, Mo.; M. C. Carey, Vice-President, Apt. 30, Algonquin, Port Huron, Mich.; J. A. Phillips, Vice-President, 1332a Shawmut Place, St. Louis, Mo.; J. M. Larisey, Vice-President, 4 Liberty Street, Charleston, S. C.; J. T. Hughes, Vice-President, 1157 Portland Avenue, St. Paul, Minn.; F. H. Nemitz, Argonaut Hotel, San Francisco; P. Elkins, Grand Inside Sentinel, 3915 De Tonty, St. Louis, Mo.; W. P. Sheahan, Grand Outside Sentinel, Commercial Hotel, Springfield, Ill.

**Trustees**—J. D. Condit, Chairman, West Hotel, Minneapolis, Minn.; J. H. Mooney, 3532 N. Grant Street, Philadelphia, Pa.; A. Anderson, 237 S. Chautauqua Avenue, Wichita, Kan.

**Insurance Committee**—C. F. Bishop, Chairman, 307 N. Walnut Street, Danville, Ill.; H. S. Hopkins, Vice-President, 43 High Street, Skowhegan, Me.; M. J. Land, 212 N. Irving Street, Cartersville, Ga.

The order was organized July 6, 1869, and on Sept. 1, 1920, it had 54,344 members.

## INTERNATIONAL SEAMEN'S UNION OF AMERICA.

Established April 22, 1892.

Andrew Furuseth, President, A. F. of L. Bldg., Washington, D. C.; Patrick Flynn, First V. P., 58 Commercial St., San Francisco; V. A. Olander, Second V. P., 166 W. Washington St., Chicago; Thos. Conway, Third V. P., 71 Main St., Buffalo, N. Y.; F. B. Gill, Fourth V. P., 84 Seneca St., Seattle, Wash.; Percy J. Eryou, Fifth V. P., 1½ Lewis St., Boston; Wm. H. Brown, Sixth V. P., 202 Atlantic Ave., Boston; Oscar Carlson, Seventh V. P., 70 South St., New York, N. Y.

Thos. A. Hanson, Secretary-Treasurer, 355 No. Clark St., Chicago.

Affiliated with American Federation of Labor and International Seafarers' Federation.

Italic dioceses are archdioceses. Cardinals, 2; Archbishops, 17; Bishops 93; secular clergy, 16,026; religious clergy, 6,023; total clergy, 22,049; churches with resident priests, 10,994; missions with churches, 5,621; total churches, 16,615; seminaries 113; seminary students, 8,698; colleges for boys, 222; academies for girls, 718; parishes with schools, 6,258; orphan asylums, 304; orphans, 48,721; homes for the aged, 119.

Population and other figures in the above table cover dioceses and archdioceses, and not merely the cities named.

ROMAN CATHOLIC HIERARCHY.

At the head of the Roman Catholic Church is the SUPREME PONTIFF, PIUS XI., Achille Ratti, born at Desio, Italy, May 30, 1857, made Archbishop of Milan, April, 1921; Cardinal, in pectore, June 14, 1921; elected Pope, as successor of Benedict XV., Feb. 6, 1922; crowned Feb. 12, 1922. The Pontiff is, in orders, a Bishop. His ecclesiastical

title is: His Holiness, the Pope; Bishop of Rome and Vicar of Jesus Christ; Successor of St. Peter, Prince of the Apostles; Supreme Pontiff of the Universal Church; Patriarch of the West; Primate of Italy; Archbishop and Metropolitan of the Roman Province; Sovereign of the Temporal Dominions of the Holy Roman Church.

NEW RULE AS TO ELECTION OF A POPE.

The American Cardinals reached Rome too late to cast their ballots for a successor to Benedict XV. In consequence, the new Pope, Pius XI., has made a change in the regulations, extending the interval

between the death of a Pope and the election of his successor, so as to give the foreign Cardinals a chance to take part.

THE COLLEGE OF CARDINALS.

NOTE—The College of Cardinals, when complete, is made up of 70 members, of whom 6 are Cardinal-Bishops, 50 are Cardinal-Priests, and 14 are Cardinal-Deacons. The College is the Senate of the Roman Church. They advise the Pope and

elect his successor. The Cardinal-Bishops take their titles from the Suburban Sees of Rome: Porto and Santa Rufina, Albano, Palestrina, Sabina, Frascati, and Velletri.

## UNITED STATES BUREAU OF FISHERIES—DEPARTMENT OF COMMERCE.

(From data supplied by the Bureau.)

THE work of the Bureau of Fisheries comprises (1) the propagation of food fishes and their distribution to suitable waters; (2) the inquiry into the causes of decrease of food fishes in the lakes, rivers and coast waters of the United States, the study of the waters of the coast and interior in the interest of fish culture and the investigation of the fishing grounds of the Atlantic, Gulf, and Pacific Coasts, with the view of determining their food resources and the development of the commercial fisheries; (3) the collection and compilation of the statistics of the fisheries; (4) the study of the methods and apparatuses of the fisheries, preservation of fishery products and the development of uses for the little used or neglected products. The bureau also has jurisdiction over the fur seal herds and the salmon fisheries of Alaska. Office, Sixth and B Streets, Washington, D. C. The official force of the bureau is as follows: **Commissioner**—Henry O'Malley; **Deputy Commissioner**—Henry F. Moore; **Chief Clerk**—I. H. Dunlap. Assistants in charge of division: **Inquiry Respecting Food Fishes**—Willis H. Rich. **Fish Culture**—Glen C. Leach. **Statistics and Methods**—vacant. **Alaska Service**—Ward T. Bower.

**SOLDIERS' HOMES.****NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.**

*President of the Board of Managers.*.....George H. Wood, National Military Home, Dayton, Ohio.  
There are branches of the National Home at Dayton, Ohio; Milwaukee, Wis.; Togus, Me.; Hampton Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn. and Hot Springs, S. D. The aggregate number of members cared for is about 25,000.

**UNITED STATES SOLDIERS' HOME FOR THE REGULAR ARMY.**

The United States Soldiers Home in the District of Columbia was established by an Act of Congress, approved March 3, 1851, for the relief and support of invalid and disabled soldiers of the Army.

Blank applications for admission may be obtained from the Board of Commissioners, U. S. Soldiers' Home, Washington, D. C.

There were on June 30, 1922, 1,016 resident beneficiaries; 49 on outdoor relief, 45 in St. Elizabeth's Hospital; 205 on furlough; and 71 at the

Fitzsimons U. S. A. General Hospital, Denver, Col., for the treatment of tuberculosis, making a total of 1,166.

*Governor*—Major Gen. Tasker H. Bliss (retired).  
*Dep. Governor*—Major Parker W. West (retired).  
*Secretary-Treasurer*—Col. Robt. H. C. Kellon (retired).  
*U. S. A. Attending Surgeon*—Col. H. P. Birmingham (retired).  
*U. S. A. Quartermaster and Purchasing Officer*—Col. Walter C. Babcock (retired), U. S. A.

**UNITED STATES COAST GUARD.**

The United States Coast Guard was created by an act of January 28, 1915, which combined the Revenue Cutter Service, organized by act of Congress approved August 4, 1790, and the Life Saving Service, which latter was originally operated under the Revenue Cutter Service, but on June 20, 1874, created a separate service under the Treasury Department.

The Coast Guard operates: (a) Twenty-seven seagoing cutters engaged in the assistance of vessels in distress, the enforcement of the navigation laws, the protection of the seal fisheries in Alaska, the destruction of derelicts, the conduct of the International Ice Observation and Ice Patrol Service off the Grand Banks of Newfoundland, and other maritime duties. (b) A number of inshore patrol and harbor tugs, inland water patrol vessels, and

launches engaged in the service of the customs. (c) 277 Coast Guard stations, of which 227 are in active commission, engaged in saving life and property along the coast, and 8 in part commission. (d) A coast patrol system guaranteeing early assistance to vessels and persons in distress. (e) A communication system linking by telephone all Coast Guard stations and practically all compass stations. (f) One aviation station for the protection of life and property along the coast and at sea contiguous thereto.

The commissioned line officers of the service are appointed by the President, by and with the advice and consent of the Senate, from cadets who have completed a three-year course at the Coast Guard Academy, New London, Conn., similar to the course given at Annapolis. Engineer officers are appointed similarly from those who have completed a special course of one year at the academy.

**UNITED STATES STEAMBOAT INSPECTION SERVICE.**

(By George Uhler, Supervising Inspector General of that Bureau of United States Department Commerce.)

The Steamboat Inspection Service, by Act of Congress, approved Feb. 14, 1903, was transferred from the Treasury Department to the Department of Commerce. The transfer went into effect July 1, 1903. The Supervising Inspector General of the Steamboat Inspection Service, George Uhler, reported to the Secretary of Commerce for the fiscal year ended June 30, 1922:

Number of annual certificates of inspection issued to domestic steam, motor vessels and barges, 7,206; decrease from previous year, 547. Number of annual certificates issued to foreign steamers, 337; decrease from previous year, 5. Total number of annual certificates of inspection issued to domestic

and foreign, 7,543; decrease from previous year, 552.

Gross tonnage of domestic vessels, all kinds inspected, 10,875,357; decrease from previous year, 2,163,673. Gross tonnage of foreign steamers inspected, 2,956,520; decrease from previous year, 135,451. Total gross tonnage of domestic and foreign vessels inspected, 13,931,877; decrease from previous year, 2,299,124.

Number of officers' licenses issued, 26,044; increase over previous year, 47. Number of new life preservers inspected, 160,894, of which number 3,356 were rejected. Decrease in number of new life preservers inspected from previous year, 145,767. Number of marine boiler plants inspected at the mills by assistant inspectors, 2,259.

**THE UNITED STATES GOVERNMENT PRINTING OFFICE.**

In this establishment practically all the printing and binding for the Government is performed, with the exception of postage stamps, stamped envelopes, paper money and bonds. The Public Printer is the executive officer of the Government Printing Office, is appointed by the President, and receives a salary of \$6,000 a year. Directly, or through his principal officers, he purchases all the materials, paper and machinery, subject to provisions of certain laws; disburses all moneys; appoints all officers and employees under civil service rules and exercises general supervision over all affairs of the office. George H. Carter of Iowa is the Public Printer.

The Government Printing Office was established in 1860, at which time Cornelius Wendell sold his printing plant to the Government. That plant has gradually grown by additions and new buildings, until at the present time it contains approximately 15 acres of floor space and is well equipped with

modern machinery for the rapid production of all classes of printing and binding. Congress now appropriates \$2,000,000 as a working capital for this office and is entitled to that amount of printing. In addition, each department and independent establishment of the Government orders printing and makes payment of cost thereof to the Public Printer out of appropriations under their control.

Work is performed at cost, and the output runs in value to over \$10,000,000 a year. During one year the compensation of employees amounts to \$6,500,000, and the value of paper used to \$3,100,000; about 80,000 different jobs are handled, ranging from envelopes and blanks to sumptuously bound volumes in large editions; two billion ems of type are set; 162,000 forms are sent to press; 2,100,000,000 chargeable impressions are run from presses; about one billion postal cards are printed; 200,000,000 sheets are folded; 75,000,000 signatures are sewed, and 33,000,000 copies are ruled.

Besides the 282,965 widows on the roll in 1922, there were 4,102 dependents, 2,106 minors, and 925 helpless children; of the 256,918 invalids 90 were army nurses of the Civil War. Of the total number of pensioners on June 30, 1922, there were 193,791 Civil War soldiers, as against 218,775 a year before. Of the widows 269,245 were of the Civil War as against 278,098 a year before. To pensioners in foreign countries were paid \$1,319,231.39, as against \$1,842,022.37 the year before. In the year ended June 30, 1922, there were 25,082 Civil War soldiers who died, as against 24,775 in the previous year.

The largest number of Civil War soldiers on the

## WORLD WAR PENSIONS.

World War pensions, &c., are handled by the U. S. Veterans' Bureau, formerly the Bureau of War Risk Insurance, Treasury Dept., Washington, D. C.

The rate of pay given veterans depends upon the degree of disability and the number of dependents. The following section from the War Risk Insurance Act as amended by Act of Congress, December 24, 1919, gives the rate of compensation paid for death or disability resulting from personal injury suffered, or disease contracted in the line of duty.

Section 302. That if the disability results from injury;

1. If and while the disability is rated as total and temporary, the monthly compensation shall be the following amounts: a. If the disabled person has neither wife nor child living, \$80; b. If he has a wife and no child living, \$90; c. If he has a wife and one child living \$95; d. If he has a wife and two or more children living, \$100; e. If he has no wife but one child living, \$90; with \$5 for each additional child. f. If he has a mother or father, either or both dependent on him for support, then in addition to the above amounts \$10 for each parent or dependent.

2. If and while the disability is rated as partial and temporary, the monthly compensation shall be a percentage of the compensation that would be payable for his total and temporary disability equal to the degree of the reduction in earning capacity resulting from the disability but no compensation shall be payable for a reduction in earning capacity rated less than 10 per centum.

3. If and while the disability is rated as total and permanent the rate of compensation shall be \$100 per month: Provided, however, that the loss of both feet or both hands, or the sight of both eyes, or the loss of one foot and one hand, or one foot and the

pension roll, 745,822, was in the year ended June 30, 1898. On June 30, 1922, there were surviving 49 widows of the War of 1812, 73 soldiers and 1,878 widows of the War with Mexico, 3,867 soldiers and 2,748 widows of the Indian Wars, as well as 55,153 pensioners of the War with Spain.

On June 30, 1922, there were 61 World War soldiers and 29 widows and other dependents of that war on the pension roll. For all information as to pensions other than World War, apply to the Commissioner of Pensions, Washington, D. C.

Congress, in May, 1922, passed an act making pensions (except civil) payable monthly.

## PENSIONS.

sight of one eye, or one hand and the sight of one eye, or becoming helpless and permanently bedridden shall be deemed to be total permanent disability: Provided, further, that for double total permanent disability the rate of compensation shall be \$200 per month.

4. If and while the disability is rated as partial and permanent the monthly compensation shall be a percentage of the compensation that would be payable for his total and permanent disability equal to the degree of the reduction in earning capacity resulting from the disability, but no compensation shall be payable for a reduction in earning capacity rated at less than 10 per centum.

The Veterans' Bureau, by the Act of August 9, 1921, took over from the Federal Board for Vocational Education, the work of providing for the vocational rehabilitation of disabled persons discharged from the military or naval forces, and also for their hospital care. The bureau also took over the work for veterans done by the U. S. Public Health Service.

Number of claims filed to July 1, 1922, 838,549; number of claims allowed, death, 58,875; number of claims allowed, disability, 351,940; total disbursements covering claims allowed as of July 1, 1922, \$359,564,738.

The above figures cover compensation activities of the bureau since its creation.

For the fiscal year ended July 1, 1922, payments were made on 77,195 claims, of which 70,379 were disability claims and 6,816 death claims. The total disbursements for this fiscal period were \$123,494,216.

On July 1, 1921, there were being hospitalized in all hospitals 26,869 patients of the bureau, classified as follows: tuberculosis, 10,849; neuro-psychiatric, 9,231; general medical and surgical 6,789.

## WHAT THE U. S. DOES TO HELP EX-SERVICE MEN.

The following bulletin is sent out by the Government with premium notices to ex-service men who have retained their war risk insurance:

THE UNITED STATES VETERANS' BUREAU is: 1. Paying out over \$1,000,000 in cash every day, including Sunday, directly into the hands of the ex-service man or his dependents.

2. Providing, without cost, hospital care and treatment to 30,000 veterans. This care includes board and lodging and represents an expenditure by the Government of \$60,000,000 per annum.

3. Giving vocational training, without cost, to over 100,000 disabled ex-service men at an expenditure for tuition and supervision of \$30,000,000 per annum.

4. Mailing out 650,000 checks every month, representing \$42,000,000.

5. Conducting an insurance business for over 600,000 ex-service men without any cost of administration to them. Insurance in force, \$3,500,000,000.

6. Conducting over 50,000 medical examinations every month.

7. Giving outside treatment in cases where hospitalization is not required to 20,000 ex-service men every month.

8. Receiving 1,000 new claims every day, in addition to the 1,200,000 already on file, employing 4,000 ex-service men and women in carrying out the work.

9. Requiring for 1922 expenditures in behalf of the disabled ex-service man, \$510,000,000—more than the entire expenditure of the whole United States in 1897.

10. The United States of America is already doing more for its disabled veterans than any other country in the world, despite the fact that their losses were far heavier than ours.

11. Do these facts indicate that the disabled ex-service man is being neglected?

C. R. FORBES, Director.

## THE CIVIL SERVICE OF THE UNITED STATES.

Classified employees upon reaching certain ages are automatically retired from the service unless certified for continuance. The requirement age for railway mail clerks is 62 years; for mechanics, post office clerks and carriers, 65 years, and for others 70 years. Those who have served 15 years or more are entitled to annuity based on length of service and salary received during the ten years preceding retirement. The minimum annuity is \$180 and the maximum \$720 per annum. Deduction of  $2\frac{1}{2}\%$  is made from salaries to provide for this annuity,

which will be returned with 4% interest to persons leaving the service before retirement. In case of separation by death the deduction is returned to the person's heirs. If an annuitant dies before he receives annuity equal to the deductions made from his salary, with interest, the difference is paid to his heirs.

The number of positions both classified and unclassified on June 30, 1922, was 69,980 in Washington, and 490,833, outside Washington. This made a reduction of 356,857 since the peak of the War.

## UNITED STATES COAST AND GEODETIC SURVEY.

The Coast and Geodetic Survey of the Department of Commerce is charged with the survey of the coasts of the United States and coasts under the jurisdiction thereof, and the publication of charts covering said coasts.

The results obtained are published in annual reports and in special publications; charts upon various scales, including sailing charts, general charts of the coast, harbor charts, tide tables and current tables issued annually in advance; coast pilots with sailing directions covering the navigable waters; notices to mariners issued weekly as a joint publication of the Coast and Geodetic Survey and the Bureau of Lighthouses, and containing current information necessary for safe navigation; magnetic charts and publications; catalogues of charts and publications and such other publications as may be required to carry out the organic law governing the survey.

## STATISTICS AS OF JULY, 1922.

There are about 340,000 square miles of precise triangulation and 3,300 linear miles of precise traverse completed in the United States. Nearly as much again of this precise control work remains to be done before it is brought within fifty miles of every place in the United States. This is the minimum amount required to give adequate control to local surveys. There is tertiary triangulation along the whole coast of the United States proper, but this needs constant revision due to changes in the shore line and to the loss of stations. The necessary triangulation in the Philippine Islands is nearly completed. Alaska, however, has only about one-third of its coast covered by tertiary triangulation. Precise triangulation in the interior of Alaska has just been started.

About 45,000 miles of precise levels have been completed in the United States, and there are about 24,000 miles still to be done to bring the levels within fifty miles of every place in the United States. This is considered the minimum amount necessary to give adequate control for local level lines. There were about 20,000 square miles of precise triangulation, about 400 linear miles of precise traverse and about 900 linear miles of precise levels completed during the past fiscal year.

The first magnetic survey of the United States is nearly finished. Constant revision is needed because of loss of stations from various causes. Observations must be repeated at many stations on account of changes in value of the magnetic elements.

There remains yet to be surveyed 166,000 square miles of water area off the Atlantic and Gulf coasts, besides 5,000 square miles to be developed by dragging close to the shore and such resurveys from time to time in shallow waters as may be necessitated by changes. On the Pacific Coast 67,800 square miles have yet to be done, in addition to 1,400 square miles of dragging and repeated resurveys of shallow water subject to changes. The hydrographic survey of all Alaska is not more than 10 per cent. completed, but a large part of the most frequented waters is surveyed. In the Philippine Archipelago the surveys are 72 per cent. complete. Around the Hawaiian, Porto Rican and Virgin Islands much hydrographic surveying has been accomplished, but there yet remains about three years' work for a surveying vessel in each locality.

The foregoing statement refers to the first surveys. Resurveys will at all times be necessary along many parts of the coasts and in harbors, due to changes that are always going on.

## SMILE, POSTMAN! SMILE!

Postmaster General Work, in the Daily Postal Bulletin, April 21, 1922, issued the following rules to Post Office employees:

"1. Smile, use courtesy to all—equals and subordinates, as well as superiors. It requires the use of about thirty-six muscles to smile and of ninety-seven to frown. Why work overtime?

"2. Respect the authority of others and the personal dignity and feelings of subordinates; we are all human beings, not machines.

"3. Criticize constructively. Show how to improve conditions and how to correct and avoid error.

"4. To a patron accept blame for the mistakes of the office; do not air inside differences. If you are doing your best, assume that your fellow workers are doing theirs.

"5. Don't encourage gossip, belittle or adversely criticize a fellow worker. We all have good points, and like credit for good performance.

"6. Be generous when another gets it 'in the neck.' Fortune's wheel is always turning and you may be on the under side some day.

"7. Don't hide behind cryptic statements and take advantage of the double meanings of words. Cultivate clearness, come clean. Let others know where you stand and what you mean. The old order of secrecy and stealth is gone; speed, analysis, plain speaking and publicity serve better.

"8. Let us have co-operation, intelligent effort, team work and understanding. The old days where only the heads were presumed to have intelligence and the workers were supposed to obey orders blindly and implicitly are gone. The executive or supervisor who can get the work out through loyalty and team work rather than direct force of authority is by far the most valued man.

"All things whatsoever ye would that men should do unto you, do ye even so unto them."

## UNITED STATES PATENT OFFICE STATISTICS SINCE 1838.

(By the Com. of Patents. Appl. Inc. patents, designs, and reissues. Caveat Law repealed June 25, 1910.)

| YEAR. | Applica-<br>tions. | Caveats<br>Filed. | Pat-<br>ents. | Cash<br>Received. | YEAR. | Applica-<br>tions. | Caveats<br>Filed. | Pat-<br>ents. | Cash<br>Received. |

Of the interments, 238,337 are those of known, 153,243 those of unknown dead.

About 10,700 of the bodies are those of Confederates, being mainly in the National Cemeteries at Arlington, Camp Butler, City Point, Cypress Hills, Flinn Point, Fort Smith, Hampton, Jefferson Bar-  
racks, Little Rock, Philadelphia, Springfield and Woodlawn.

## THE UNITED STATES CENSUS.

(From data supplied by the Bureau.)

The Constitution requires a census of the United States decennially. The first was in 1790 under the supervision of the President; subsequent censuses, to and including that of 1840, were under the Secretary of State. In 1849 the census work was transferred to the newly organized Department of the Interior, where it remained until the passage, in 1903, of the act creating the Department of Commerce and Labor, by which the Census Bureau was transferred to the new department. Meanwhile Congress, March 6, 1902, had made the Census Office a permanent bureau. Since March 4, 1913, when the Department of Commerce and the Department of Labor were separately organized, the Bureau of the Census has been attached to the former. The work is divided into two branches, the decennial census and special statistical inquiries, the latter mostly made between the decennial censuses.

The Fourteenth Decennial Census was taken as of January 1, 1920. It covers: (1) population, (2) agriculture (including irrigation and drainage), (3) manufactures, (4) forestry and forest products, and (5) mines, quarries, and oil and gas wells. The cost of this census is estimated at \$20,179,000, in addition to which \$2,371,000 will be spent in carrying on the annual investigations of the bureau during the three-year census period (July 1, 1919, to June 30, 1922). Of the first named amount, \$12,500,000 covers the cost of collecting the data through approximately 87,000 enumerators, in addition to supervisors, clerks, and special agents.

The permanent work of the bureau is provided for by the act of Congress approved March 6, 1902, and amendatory and supplemental acts, and in-

clude the gathering and publishing of statistical facts pertaining to the dependent, defective, and delinquent classes; wealth, public indebtedness, and taxation; births and deaths; financial and other activities of cities; finances of States; religious bodies; marriages and births; transportation by water; electrical industries; Federal employees; cotton and tobacco stocks, and business conditions. These inquiries are made at intervals ranging in length from ten years to two weeks. The census of manufactures, in addition to forming part of the decennial census, is taken in each mid-decennial year; and a biennial census of products of manufacturing industries and a quinquennial census of agriculture will also be taken hereafter. Special inquiries are made from time to time at the direction of the President, the Secretary of Commerce, or Congress.

The Director of the Census is appointed by the President and receives \$7,500 per annum during the three-year decennial census period and \$6,000 during the seven "intercensal" years. The Director is the seven "intercensal" years. The Director is William M. Stewart, of Michigan; Assistant Director, Joseph A. Hill, of New Hampshire. The permanent organization includes five chief statisticians—for Population, William C. Hunt; for Manufactures, Eugene F. Hartley; for Statistics of States and Cities, Starke M. Grogan; for Agriculture, Cotton and Tobacco, William L. Austin; and for Vital Statistics, William H. Davis. The permanent employees of the bureau of Washington number approximately 700, and in addition about 700 special agents are employed intermittently in the South for the collection of cotton statistics. The total office force of the bureau, including temporary employees, during the three-year decennial census period reached a maximum of about 6,000.

## THE NATIONAL PARKS AT A GLANCE.

(Number, 19; total area, 11,304 square miles.)

| NATIONAL PARKS IN ORDER OF CREATION. | Location.                  | Area in Sq. Miles | Distinctive Characteristics.                                                                                |
|--------------------------------------|----------------------------|-------------------|-------------------------------------------------------------------------------------------------------------|
| Hot Springs, 1832...                 | Middle Arkansas...         | 1½                | 46 hot springs possessing curative properties.                                                              |
| Yellowstone, 1872...                 | No'western Wyoming.        | 3,348             | Geysers; boiling springs; mud volcanoes; petrified forests; Grand Canyon of the Yellowstone.                |
| Sequoia, 1890.....                   | Middle eastern California. | 252               | 12,000 sequoia trees over 10 feet in diameter, some 25 to 36 feet in diameter; cave.                        |
| Yosemite, 1890.....                  | Middle eastern California. | 1,125             | Valley of world-famed beauty; lofty cliffs; many waterfalls of extraordinary height; 3 groves of big trees. |
| General Grant, 1890.                 | Mid. east'n California.    | 4                 | Created to preserve Gen. Grant Tree, 35 ft. in diam.                                                        |
| Mount Rainier, 1899.                 | W. central Washington      | 324               | 28 glaciers; 48 sq. miles of glacier, 50 to 500 ft. thick.                                                  |
| Crater Lake, 1902...                 | Southwestern Oregon..      | 249               | Lake of extraordinary blue in crater of extinct volcano; slides 1,000 feet high; lava; fishing.             |
| Wind Cave, 1903....                  | South Dakota.....          | 17                | Miles of galleries and chambers containing peculiar formation.                                              |
| Platt, 1904.....                     | Southern Oklahoma...       | 1½                | Many sulph. and oth. springs possess medicinal value.                                                       |
| Sullys Hill, 1904....                | North Dakota.....          | 1½                | An important wild animal preserve.                                                                          |
| Mesa Verde, 1906...                  | So'western Colorado...     | 77                | Most notable, best preserved prehistoric cliff dwellings.                                                   |
| Glacier, 1910.....                   | No'western Montana.        | 1,534             | 250 glacier-fed lakes; 60 small glaciers; precipices thousands of feet deep.                                |
| Rocky Mount'n, 1915                  | North middle Colorado      | 397½              | Heart of the Rockies; snowy world, peaks 11,000 to 14,255 feet altitude.                                    |
| Hawaii, 1916.....                    | Hawaii.....                | 118               | Kilauea & Mauna Loa on Hawaii, Haleakala on Maui.                                                           |
| Lassen Volcano, 1916                 | Northern California...     | 124               | Only active volcano in U. S. proper; hot springs; mud geysers.                                              |
| Mt. McKinley, 1917                   | South central Alaska..     | 2,645             | Highest mountain in North America.                                                                          |
| Grand Canyon, 1919                   | North central Arizona.     | 958               | Greatest example of erosion in the world.                                                                   |
| Lafayette, 1919.....                 | Maine coast.....           | 8                 | Group of granite mountains on Mt. Desert Island.                                                            |
| Zion, 1919.....                      | Southwestern Utah....      | 120               | Zion Canyon, 800 to 2,000 feet deep.                                                                        |

There are also seven national military and other parks under the jurisdiction of the Secretary of War. They are as follows: Chickamauga and Chattanooga, Georgia and Tennessee; Shiloh, Tennessee; Gettysburg, Pennsylvania; Vicksburg, Mississippi; Antietam Battlefield, Maryland; Lincoln's birthplace, Kentucky; Guilford Court House, North Carolina.

The national parks and national monuments, unless otherwise stated, are under the supervision

## NATIONAL MONUMENTS.

Under the Act of Congress, approved June 8, 1906, interdepartmental regulations governing the excavation, appropriation, etc., of prehistoric ruins or objects of antiquity have been promulgated by the Secretaries of the Interior, Agriculture, and War. Application for permits to make excavations on the public lands, Indian reservations, or the national monuments named below should be addressed to the Secretary of the Interior. The following have been preserved from entry and set aside as national monuments: Devils Tower, Wyoming; Montezuma Castle, Arizona; Petrified Forest, Arizona; El Morro, New Mexico; Chaco Canyon, New Mexico; Muir Woods, California; Natural Bridges, Utah; Lewis and Clark Cavern, Montana; Tumacacori, Arizona.

of the Secretary of the Interior. Congress, by act of August 25, 1916, created a National Park Service, and placed the administration of the national parks and monuments under the Department of the Interior in charge of a director of such service. General information, the annual administrative reports and copies of the rules and regulations relating to the parks may be obtained from the Director of the National Park Service, Washington, D. C., or the Superintendents of the parks.

Navajo, Arizona; Shoshone Cavern, Wyoming; Gran Quivira, New Mexico; Katmai and Slicka, Alaska; Rainbow Bridge, Utah; Pinnacles, California; Colorado, Colorado; Papago Saguaro, Arizona; Capitol Mountain, New Mexico; Dinosaur, Utah; Verendrye, North Dakota; Casa Grande, Arizona; Scott's Bluff, Nebraska; Yucca House, Colorado.

Eleven other national monuments in national forests have also been set aside under this act and placed under the jurisdiction of the Secretary of Agriculture, to whom inquiries in regard thereto should be addressed. Two other national monuments (Big Hole Battlefield, in Montana, and Cambrillo, in California) are under the jurisdiction of the Secretary of War.

## NATIONAL FORESTS.

The original forests of the United States covered about 822,000,000 acres and contained 5,200,000,000,000 board feet of timber. There are left (June 30, 1922) 463,000,000 acres of forest land, containing 2,215,000,000 board feet. Of this, 137,000,000 is in virgin timber, 112,000,000 acres is culled and second-growth timber large enough for sawing, 133,000,000 acres is partially stocked with smaller growth, and 81,000,000 acres is devastated and practically waste land. The present rate of timber consumption is more than four times the annual growth on the forests. Of the standing timber, 344,000,000,000 feet is in the New England, Mid-Atlantic,

Central and Lake States; 1,141,000,000 feet is in the Pacific Coast States.

The National Forests include 156,837,282 acres (net). The annual revenue for the fiscal year ending June 30, 1922, was \$5,068,527. Of this amount \$1,646,996 was for grazing fees pertaining to the fiscal year 1921 authorized by Congress to be paid subsequent to June 30, 1921. The receipts collected in the fiscal year 1922, which properly pertained to that year, were \$3,421,531. Cost of administration averages \$4,000,000 a year. Thirty-three States have their own forestry departments.

The forest fire losses in 45 States for the six-year period, 1916-1921 inclusive, were \$98,546,076. This damage was occasioned by 200,096 forest fires, which burned over 65,172,066 acres.

## The United States of America.

(FEDERAL REPUBLIC.)

|                              | Continental. | Total.      |
|------------------------------|--------------|-------------|
| AREA, square miles . . . . . | 3,026,789    | 3,743,510   |
| POPULATION, 1920: . . . . .  | 105,710,620  | 117,859,495 |

The United States of America, oldest republic, is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexico, and on the west by the Pacific Ocean. It comprises 48 States and the Federal District of Columbia. This is called for convenience in reference "Continental United States." Its non-contiguous areas are the Territories of Alaska and Hawaii; Porto Rico, the Philippine Islands, the Virgin Islands of the United States, American Samoa, Guam, Wake and scattered islands in the Pacific; and the Panama Canal Zone, all aggregating 716,721 square miles, which, added to the 3,026,789 square miles of continental United States, give a total of 3,743,510 square miles.

The population of continental United States, Census of 1920, was 105,710,620; of the non-contiguous areas (partly estimated) 12,148,875, the grand total being 117,859,495. (See pages 321 et seq. for population tables).

The general topography of the continental United States is so varied, and the climate, natural resources and racial elements also, that the country may be said to be several countries articulated in one national body. In the eastern part, excepting on the south, are several mountain ranges of the Appalachian system, rising never to more than 6,000 to 7,000 feet of altitude, and ranging north and south. The Adirondacks, in northern New York State, are declared by the United States Geological Survey to have been the first land that rose from the original chaos in the western world, being, therefore, the oldest mountains in the United States.

Sweeping westward from the eastern mountains is a vast, fertile plain, the valley of the Mississippi River, a thousand miles wide and about as long, to where the mountain formation again is found, the Rocky Mountain range, highest in North America, beyond which westwardly is a tableland of mean elevation of 3,000 to 5,000 feet, and still further to the westward are other mountain ranges of lesser altitudes, with a low coast range skirting the shores of the Pacific Ocean.

The United States has seven great rivers—the Hudson, entering the Atlantic at the harbor of New York City in the northeastern corner of the country; the Delaware, entering the Atlantic through Delaware Bay, midway down the coast; the Potomac, entering the Atlantic through Chesapeake Bay, just south from Delaware Bay; the Mississippi, greatest of North American rivers in its relationship to civilization, rising in Minnesota, near to Canada, entering the Gulf of Mexico on the southern side of the country; the Ohio, flowing from the eastern mountains westwardly to join the Mississippi in the East Central part of the country; the Missouri, which flows from the northwestern mountains eastwardly to the Mississippi, being confluent with that stream just north of where the Ohio joins it; the Columbia, which rises in British territory, and flows across a vast tableland west of the Rocky Mountains, into the Pacific Ocean one-third of the way down that coast; the Colorado, non-navigable which rises in the State of Colorado, flows in general course southwestwardly through Utah and Arizona, and between Arizona and California, into the Gulf of California, in Mexico.

Besides these streams, there are many of considerable and navigable size in the areas east from the Rocky Mountains, and the great St. Lawrence River, as the outlet of the Great Lakes on the northern border between the United States and Canada, skirts the northeastern boundary of the United States.

The Great Lakes, Superior, largest inland body of fresh water in the world; Huron, Erie, Michigan, and Ontario, are a striking phase of the geological formation, and carry immense passenger and freight tonnage. The Mississippi, Potomac, Delaware, Hudson and Columbia Rivers are navigable for considerable distances inland from the sea, and the

Missouri for light-draught craft quite a distance up from the Mississippi.

Of the lesser rivers, the most important are the Connecticut, Susquehanna, James, Cumberland, Tennessee, Tombigbee, Warrior, Arkansas and Red in the eastern half of the country, and the Sacramento on the Pacific Coast; while the Rio Grande, rising in Colorado, non-navigable, save for 61 miles from its mouth, is the eastern half boundary between the United States and Mexico. (See pages 718-19.)

The largest river under the American flag is the Yukon in Alaska, which rises in small lakes in the Dominion of Canada, flows northwestwardly into Alaska, then westwardly and then southwestwardly into Norton Sound, which in turn makes into Bering Sea. It is navigable for more than 2,000 miles inland.

The climate of the United States is of every gradation, from the north temperate, with rather cold winters and pleasant summers, to the sub-tropical, with every variety of flora suitable to so wide a range of latitude. Eastwardly and westwardly, even greater variation is found. For there are regions of normal moisture precipitation in the northeast, of excessive precipitation in the southeast, of normal precipitation in the central tablelands, and then of varying degrees of aridity and moistness as one proceeds westwardly, until on the coast of Oregon, at Tillamook, is the heaviest average precipitation in the United States—120 inches a year. (See tables 76-77.)

The Southwestern United States is marked by several almost deserts, susceptible of reclamation by irrigation, some of which were the beds of great inland salt water seas, at some points the present surface elevation being lower than the surface of the ocean.

The area of continental United States was acquired by various purchases, treaties and in wars, from England, France and Mexico, and the dependencies from Russia, Spain, Panama, the former Hawaiian Government, and Denmark. (See tables following.)

The thirteen Original States included about 900,000 square miles, and were colonies when the War of the Revolution was fought against England, 1776-83.

In natural resources, the United States is one of the richest countries in the world. Its coal, oil, timber and precious metals exist in vast natural stores, and practically every base mineral known to civilization is deposited in its areas. The timber resources have been depleted seriously; but the Federal Forest Service has begun reforestation, and has matured plans to make the natural timber lands perpetual by replanting.

Improvement also of the rivers and harbors has proceeded to a large extent, although by no means as extensive as similar development in Europe. The great navigable rivers mentioned heretofore have been treated by the engineers for removal of obstructions in many places, great jetties have been built at the mouths of the Columbia and Mississippi, large terminal facilities provided at many of the ports, and plans are working out for the perfection of all of them according to modern standards. The most important domestic canal is the New York State Barge Canal; many others were permitted to lapse into non-use when railway transport absorbed attention so exclusively in the last half of the last century. (See pages 721-22.) The natural conditions, however, would permit of almost limitless canal development if more artificial waterways are needed.

Originally an agricultural people, the presence of so vast natural stores of minerals and timbers, together with increased "pressure of population on land," has operated to induce great industrial development, until the United States is to-day one of the world's greatest merchants on the high seas, its steel, rubber goods, timber, cotton, machinery, foodstuffs and many other commodities going to the ends of the earth.

The increase of industrial interest has been coincidental with and in large part the cause of the very heavy immigration which came in before the present immigration restriction law was enacted. Many came to work in the mines and factories and in construction of railways and industrial works. Up to the latter part of the last century,

the population of the United States was in a majority rural—that is, dwelt on farms or in communities of fewer than 2,500 inhabitants. The increase of industrial concerns has attracted so many to the towns and cities that the 1920 census indicated town dwellers as 51.4 per cent. of the whole population. (See tables following.)

The agricultural interests of the country are very large. The Census Bureau reported for 1920 that of the approximate land area of 1,903,215,360 acres, all farm lands contained 955,863,715 acres; improved lands, 503,073,067 acres; or 50 per cent. of all the land in the farm lands classification; that the value of all farm property was \$77,924,100,338; of land alone, \$54,829,563,059; of buildings, \$11,486,439,543; of implements, \$3,594,772,928; and of livestock, \$8,013,324,808; the value of all farm crops in 1919 being \$14,755,364,894, against \$9,523,514,211 in 1909, the increase having been due largely to very much higher prices.

On Sept. 1, 1922, the Department of Agriculture reported that the principal crops of the country would bring to the farmers \$1,250,000,000 more than in 1921, prices having been lower in 1921 than before. (See pages 274 et seq.)

The value of mining products in 1921 was given by the United States Geological Survey as \$4,056,000,000. (See tables following.)

The total value of the products manufactured in the United States returned in the Census of 1919 was \$14,793,902,563. (See tables following.)

The United States has been known as a melting-pot of the peoples of the earth, its population, at first of the ancient races such as the Aztecs, then of the American Indian, and, in the first days of settlement by white people from Europe, English predominating. From the beginning, immigration has been numerous, and attained a million persons a year up to the beginning of the World War, Chinese and Japanese being rigidly restricted. (See tables on pages 354 et seq.) At the present time, other admissible aliens may come in at the rate of only 3 per cent. of their own nationality already here as shown in the 1910 census. (See pages 200-2.)

In the industrial centres, large numbers of Austrians, Italians, Germans and not a few Britons, with very many Slavs, have settled; and in the agricultural sections Scandinavians are numerous in the North Central States, and Germans from the Great Lakes to the border States.

The 1920 census assigned of the total 105,710,620 of population, native white, 81,108,161; native parentage, 58,421,957; foreign parentage, 15,694,539; with 6,991,665 of mixed parentage. Those of foreign parentage and of recently immigrated foreign blood number more than 30,000,000. (See tables on pages 321 et seq.)

By gradual increase of power, as well as increase of legal authority, the President of the United States is the most potent governmental head in the world. Under the Constitution, as originally interpreted, the President had relatively little initiative, but received direction by the Congress in all important matters, especially when they touched foreign affairs. In the last 50 years the balance has changed to a large degree, until the Executive establishment now exercises power little dreamed of when the Republic was established.

The army of the United States has been reduced by 100,000 men by recent reorganizations, leaving it, infantry, 46,423; cavalry 9,871; field artillery 17,173; coast artillery, 12,026; engineers, 5,020; air service, 8,500; signal corps, 2,184; quartermaster corps 8,000; ordnance, 2,807; finance, 399; chemical warfare, 445; medical, 6,850. Camps for the training of a citizen army for reserve are maintained in several places.

A small contingent of the army is still in Germany, and its early withdrawal is contemplated. Surplus war materials valued at \$139,773,926 have been transferred to the Department of Agriculture for the use of the Bureau of Public Roads, including 29,325 motor vehicles.

The volume of actual circulating medium in this country, as of Sept. 10, 1922, was \$4,392,300,000, or \$39.93 per capita, the general stock of money being \$8,303,549,241. More than a third was in gold and bullion, \$3,858,548,202, held in the Federal Treasury or in reserve banks. Private holders have in their possession \$416,387,032 of gold. This gold is about one-half the world's known store, it being estimated that since the world began there has been mined a total of \$18,000,000,000 of gold, that \$10,000,000,000 has been used in the arts or lost, and that \$8,000,000,000 remains in the possession of Governments in the several countries. (See tables.)

The money of the United States is accepted at its gold par anywhere in the world. The circulating medium varies with the needs of business, by reason of the operation of the quasi-public Federal Reserve System, which provides a flexible method of expansion and contraction according as conditions change, and a co-ordination of the business credit of the country in a reservoir, precluding, it is held, the possibility of the former periodic panics.

The United States, having had to conquer so large an area and bring its material resources into use, has not developed its artistic life as have some older peoples; however, lately there has been much more attention to art, the phase being the bringing here of a vast accumulation of art treasures, purchased by wealthy Americans, while schools of the several arts are developing rapidly. (See pages 361 et seq.)

Scenically, the United States and its non-contiguous areas possess almost every variety of landscape and mountain view, Mt. McKinley, Alaska, the highest elevation in North America, 20,300 feet, being visible from sea level on Cook Inlet, probably the highest spot on earth to be seen from the surface of the ocean; Mt. Whitney, California, next, 14,501 feet. The scenic attractions are more and more appreciated, and six transcontinental railway routes and the developing automobile routes are thronged nowadays with tourists from all over the world. (See the several States and Territories following.)

The United States is now the second largest in merchant marine in the world, Great Britain leading. (See United States Shipping Board article elsewhere, also tables on pages 716-17.)

In naval strength it equals any. (See article on Washington Conference on Disarmament.)

The United States is not a member of the League of Nations.

| South Atl'c.....      | 5                   | 282,910                    | 9.3                    | 8              | 35,355                        |                       |                     |                            |                        |                |                               |

The North, with 60.2 per cent. of the total population of the United States in 1920, comprises only 30.9 per cent. of the total area. The corresponding proportions for the South are far less divergent, being 31.3 per cent. for population and 29.8 per cent. for area. For the West, in which only 8.4 per cent. of the total population of the United States was

enumerated in 1920, the proportion of the total area is 39.3 per cent. The region east of the Mississippi River, with 70 per cent. of the population in 1920, occupies only 29.1 per cent. of the area of the country, whereas the region west of the Mississippi, with 30 per cent. of the population, comprises 70.9 per cent. of the area.

## TERRITORIAL EXPANSION OF THE UNITED STATES.

The area of the original thirteen States (1790) was 892,135 square miles.

Payments for above were made by the United States as follows: Louisiana purchase, \$15,440,000; Gadsden purchase, \$10,000,000; Alaska, \$7,200,000; Florida, \$5,000,000; Hawaiian Islands, public debt assumed to the amount of \$4,000,000; Mexican cession, \$8,250,000.

The Treaty of Paris, of December 10, 1898, terminating the Spanish-American War, provided for a money payment to Spain (for relinquishing claim to Porto Rico, Guam, and Philippine Islands) of \$20,000,000, and a subsequent treaty of November 7, 1900, provided for a further payment of \$100,000 for other Philippine Islands.

By the first treaty the Philippine Islands were ceded to the United States, and the later treaty of

November 7, 1900, ceded certain outlying islands of the Philippines not included in the first cession.

The United States did not acquire, by the Isthmian Canal Convention of November 18, 1903, any title to territory in the Republic of Panama, but merely a perpetual right of occupation, use, and control of and over a zone of land ten miles in width. For this privilege it paid to the Republic of Panama the sum of \$10,000,000, and undertook to pay the sum of \$250,000 annually so long as such occupancy continued, such payments beginning on February 26, 1913.

## TREATY WITH COLOMBIA.

The United States and the Colombian Congresses ratified, in 1921, a treaty of the United States with Colombia by which Colombia is to receive \$25,000,000 (in yearly instalments of \$5,000,000) as compen-

sation for the loss of territorial sovereignty over Panama and the Canal Zone. Ratifications of the two countries were exchanged at Bogota, Colombia, on March 1, 1922. The first payment of \$5,000,000 to be made six months thereafter.

For the Danish West Indies, consisting of the

islands of St. Croix, St. Thomas and St. John, the United States paid \$25,000,000, and took possession on March 31, 1917. They then had 32,000 population.

No money payments were made upon the acquisition of the other Territories mentioned in the list.

### DIMENSIONS AND AREA OF THE UNITED STATES.

The gross area of the United States is 3,026,789 square miles. The land area amounts to 2,973,774 square miles, and the water area—exclusive of the area in the Great Lakes, the Atlantic, the Pacific, and the Gulf of Mexico, within the three-mile limit—amounts to 53,015 square miles.

The southernmost point of the mainland is Cape Sable, Fla., which is in latitude 25° 07' and longitude 81° 05'. The extreme southern point of Texas is in latitude 25° 50', and longitude 97° 24'. Cape Sable is therefore 49 miles further south than the most southern point in Texas.

A small detached land area of northern Minnesota at longitude 95° 09' extends northward to latitude 49° 23'.

The easternmost point of the United States is West Quoddy Head, near Eastport, Me., in longitude 66° 57' and latitude 44° 49'; the westernmost point is Cape Alva, Wash., in latitude 48° 10', which

extends into the Pacific Ocean to longitude 124° 45'.

From the southernmost point in Texas due north to the forty-ninth parallel, the boundary between the United States and Canada, the distance is 1,598 miles. From West Quoddy Head due west to the Pacific Ocean the distance is 2,807 miles. The shortest distance from the Atlantic to the Pacific across the United States is between points near Charleston, S. C., and San Diego, Cal., and is 2,152 miles.

The length of the Canadian boundary line from the Atlantic to the Pacific is 3,898 miles. The length of the Mexican boundary from the Gulf to the Pacific is 1,744 miles.

The average elevation of Delaware is only 60 feet above sea level, according to the United States Geological Survey, less than that of any other State in the Union, although its highest point, at Centerville, New Castle County, is 440 feet above sea level, higher than the highest points in Florida, Louisiana and the District of Columbia.

### POSITION OF THE CENTRE OF UNITED STATES POPULATION, 1790 TO 1920.

"The centre of population," says the U. S. Census Bureau, "may be considered as the centre of gravity for the population of the United States, that is to say, if the surface of the United States be regarded as a rigid, level plane, without weight, but having the population distributed thereon as at present, each individual inhabitant, being assumed to have the same weight as every other inhabitant, would exert a pressure on any given point in the plane directly proportional to his distance from that point. The centre of gravity for this plane, or the pivotal point on which it would balance, is the point referred to by the term 'centre of population.' That being the case, the cities of Seattle, San Francisco and Los Angeles, with a combined population of 1,398,661,

exert a greater influence on the location of the centre of population than the cities of Baltimore, Boston, Buffalo, Cleveland, Philadelphia and Pittsburgh, with a combined population of 5,197,624."

The "centre of area," or geographical centre, of the United States, which has nothing to do with the centre of population, is determined by drawing lines across the country's greatest width and greatest length. Ten years ago this intersection was located in Northern Kansas, ten miles north of Smith Center, the county seat of Smith County.

Besides the "centre of population" and the "centre of area," there is still another definition used by the Census Bureau—the "median lines." These lines divide the population evenly north and south of a parallel of latitude and east and west of a meridian of longitude.

## COAST LINE OF THE UNITED STATES.

(By the U. S. Coast and Geodetic Survey.)

**General Coast Line.**—The figures under this heading give the length in statute miles of the general outline of the seacoast. The measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1-1,200,000 as possible. The shore line of bays, sounds and other bodies of water whose entrance width is greater than the unit measure is included to a point where such waters narrow to the width of the unit measure, and the distance across at such point is included. Where the entrance width of such waters is less than the unit measure, the distance across is included, but the shore line inside is not.

**Tidal Shore Line, Unit Measure 3 Statute Miles.**—The figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of 3 statute miles. The figures for Louisiana do not

include the shore line of Lakes Maurepas and Pontchartrain, and the delta of the Mississippi River was measured as mainland. The measurements were made on charts of 1-200,000 and 1-400,000 scale when available.

**Tidal Shore Line, Unit Measure 1 Statute Mile.**—The figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of one statute mile, and include the shore line of those bodies of tidal waters more than 1 mile wide which lie close to the main waters, even though the entrance width is less than the unit measure. The measurements were made on charts of 1-80,000 scale for the Atlantic and Gulf coasts, on charts of 1-200,000 scale for the Pacific coast, and on charts as near those scales as available for the other regions.

**The Panama Canal Zone.**—Islands outside the 3 nautical mile zone were not included.

LENGTHS, IN STATUTE MILES, OF GENERAL COAST LINE AND TIDAL SHORE LINE OF UNITED STATES AND OUTLYING TERRITORY.

## THE CONTINENTAL DIVIDE.

THE Rocky Mountain range is known as the Continental Divide.

Triple Divide Peak—the only mountain in the United States whose drainage flows into the Atlantic and Pacific Oceans and Hudson Bay—is located in Glacier County, Glacier National Park, Montana, in Township 33 North, Range 15 West. The United

## AND TRIPLE DIVIDE PEAK.

States Geographic Board has named the small creek flowing southwest from Triple Divide Peak, and tributary to Nynack Creek, Pacific Creek; the small creek flowing a little north of east and tributary to Cut Bank Creek, Atlantic Creek; and has changed the name of the creek flowing north from Norris Creek to Hudson Bay Creek.

The altitude of Triple Divide Peak is 8,001 feet.

## THE CAPITOL AT WASHINGTON.

The Capitol is situated in latitude 38° 53' 20" 4 north and longitude 77° 00' 35" 7 west from Greenwich. It fronts east, and stands on a plateau eighty-eight feet above the level of the Potomac. The entire length of the building from north to south is 781 feet 4 inches, and its greatest dimension from east to west 350 feet. The area covered by the building is 153,112 square feet. The dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865. The entire weight of iron used is 8,900,200 pounds. The dome is crowned by a bronze Statue of Freedom, which is 19 feet 6 inches high and weighs 14,985 pounds. It was modelled by Crawford. The height of the dome above the base line of the east front is 287 feet 5 inches. The height from the top of the balustrade of the building

is 217 feet 11 inches. The greatest diameter at the base is 135 feet 5 inches.

The rotunda is 97 feet 6 inches in diameter, and its height from the floor to the top of the canopy is 180 feet 3 inches. The Senate Chamber is 113 feet 3 inches in length by 80 feet 3 inches in width, and 86 feet in height. The galleries with accommodation 1,000 persons. The Representatives' Hall is 139 feet in length by 93 feet in width, and 36 feet in height. The cornerstone of the north wing of the original building was laid September 18, 1793, by President Washington with Masonic ceremonies. The foundation of the centre was laid March 24, 1818. The cornerstone of the extensions was laid July 4, 1851, by President Fillmore. The room now occupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the room immediately beneath, now used as a law library.

## NICKNAMES OF THE STATES.

## ORIGIN OF THE NAMES OF THE STATES AND TERRITORIES.

- ALABAMA**—Alabama was the Indian name of a tribe in Southern Alabama—a Mushogean tribe of the Creek Confederacy. Alibamu is from the Choctaw words *alba aya mule*, meaning "I open or clear the thicket."
- ALASKA**—From "Al-ay-es-ka," a native Eskimo or Inuit word, meaning Great Country.
- ARIZONA**—From Ariconac, "few springs." Papago name of a ranch in Sonora.
- ARKANSAS**—Algonkin name of the Quapaw Indians.
- CALIFORNIA**—Spanish "Calida formax," a hot furnace.
- COLORADO**—Spanish, meaning red.
- COLUMBIA, DISTRICT OF**—A poetical adoption of the name of Columbus; applied to the territory in 1791 by the Federal Commissioners who laid it out.
- CONNECTICUT**—Indian, "Quonecktaut," Long River or River of Pines.
- DELAWARE**—Named after Lord De La War, of England, Governor of Virginia, who entered the Bay in 1610.
- FLORIDA**—Spanish words, "Pascua Florida," Feast of Flowers (Palm Sunday), on which day it is said to have been named, in 1512, by Juan Ponce de Leon.
- GEORGIA**—Named after King George II of England.
- HAWAII**—English spelling of Ohwyhee, where Capt. Cook was killed by the natives in 1779.
- IDAHO**—Indian words, "Edah hoe," Light on the Mountains.
- ILLINOIS**—Indian word, by some translated "The River of Men. A form of the word *iliniwek*, "ilini" meant "man," "iw" meant "is," and "ek," was a plural signification.
- INDIANA**—Named after Indians, State of Indians.
- IOWA**—The Ioways, or Alaouez, or Alacuas were a Sioux tribe. The word means "sleepy ones." They called themselves "Pahoja," gray snow.
- KANSAS**—Name of a tribe of the Sioux.
- KENTUCKY**—From Wyandot (Iroquoian) name "Ken-tah-ten," meaning to-morrow, or Land of To-morrow.
- LOUISIANA**—Named by the Mississippi River navigator Robert de la Salle, in 1682, after King Louis XIV of France.
- MAINE**—From Maine, an ancient province of France, south of Normandy, owned by Queen Henrietta Maria of England, wife of King Charles I.
- MARYLAND**—Named in honor of the foregoing, Queen Henrietta Marie.
- MASSACHUSETTS**—An Algonkin Indian name from *Massadchu-es-et*, meaning "great-hill-small place," indicating a place at or about the big little hills.
- MICHIGAN**—The Mishigamaw or Mishawiguma were Indians. The word means "big lake" and was applied to Lake Michigan. "Michi" meant "great," and "gama" meant "water."
- MINNESOTA**—Sioux word for cloudy or smoky water.
- MISSISSIPPI**—Indian words "Sipu," Algonquin word for river; "Maesl," fish—Fish-River.
- MISSOURI**—The Missouri were Sioux of that name.
- MONTANA**—Spanish for mountainous; used now by Peruvians as a name for their Andean districts.
- NEBRASKA**—An Omaha Indian name for the "wide river," Platte.
- NEVADA**—A Spanish word, meaning "snow clad."
- NEW HAMPSHIRE**—Named, in 1629, after the County of Hampshire, England, by the patentee, Capt. John Mason of the Plymouth Council.
- NEW JERSEY**—In 1664 the Duke of York, of England, granted to Lord John Berkeley and Sir George Carteret a patent or deed to the present boundaries to be called Neva Caesaria, or New Jersey. Caesaria, or Caesaria, was the ancient name of the island of Jersey of which Carteret had been administrator.
- NEW MEXICO**—Mexico is a word derived from the Aztec word "mexitli," title of their national war god.
- NEW YORK**—So called in honor of the Duke of York (1664), who got the patent from his brother, King Charles II of England, and sent an expedition and took possession of New Netherlands.
- NORTH CAROLINA**—The Carolinas were originally named, it is said, in honor of King Charles IX.
- of France by Jean Ribault, whose expedition (1562) was financed by Admiral Coligny. "Carolus" is the Latin word for Charles. In 1663, King Charles II. granted a patent to the land under the name of Carolina.
- NORTH DAKOTA**—"Dakota" means "alliance of friends," and is a Sioux Indian word. Koda in Santee dialect and Kola in Teton dialect are the root words.
- OHIO**—Iroquois name, denoting great.
- OKLAHOMA**—Choctaw word for "red people."
- OREGON**—The Oregon State Librarian, Cornelia Marvin, says various origins of the name have been suggested as follows: *Origanum*, a wild sage found on the coast; *Oregon*, or *Oregones*, a Spanish name for big-eared (Indian) men; *Orgon*, a river in Chinese Tartary; *Oyer-un-gen*, a Shoshone Indian word for "place of plenty;" *Aura aqua*, Spanish word meaning gently falling waters; *Caragan*, a French word for hurricanes; *Waw-re-gan*, an Algonkin word for "beautiful water."
- PENNSYLVANIA**—Penn-sylvania, from Penn; and Sylva, Latin word for grove or woods. Groves of Penn; so called in honor of William Penn, who, in 1681, got a deed for the State from King Charles II of England, in settlement of a debt which the British Government owed Penn's father. William called the country Sylvania, and the King prefixed it with "Penn."
- PHILIPPINES**—Spanish, "Islas Filipinas," discovered in 1521 by Magellan, whom the natives killed in a skirmish; named in honor of King Philip II of Spain by a colonizing expedition from Mexico.
- PORTO RICO**—From the Spanish "Puerto Rico," Rich Port.
- RHODE ISLAND**—"Isles of Rhodes" was the name, chosen by the General Court of the colony, in 1644. The name of one of the islands had been Aquedneck. The name of Providence Plantations then gradually lapsed.
- SOUTH CAROLINA**—(See North Carolina).
- SOUTH DAKOTA**—(See North Dakota).
- TENNESSEE**—Called, from 1784 to 1788, the State of Franklin. "Tennessee" is an Anglicized Indian word—*Ten-as-se*, said to mean "a curved spoon."
- TEXAS**—According to Elizabeth H. West, State Librarian at Austin, "Texas is an Indian word meaning Friends or Allies. So far as I know, it has not an Aztec origin. It applied, originally, in the Indian usage to the Indian tribes about the early Spanish missions around Eastern Texas; and later to tribes ranging as far west as the Rio Grande, to designate a large number of tribes who were ordinarily allied against the Apaches."
- UTAH**—Named after the Utes, an Indian tribe.
- VERMONT**—From Verd and Mont, two French words meaning Green Mountains. The name is said to have been bestowed by Samuel de Champlain when he saw from the lake, later called after him, green hills to the East.
- VIRGINIA**—Named in honor of Elizabeth, daughter of Henry VIII, sometimes called by her courtiers the "Virgin Queen" of England. The name was bestowed by one of the courtiers, Sir Walter Raleigh, who fitted out the expedition of discovery in 1584.
- WASHINGTON**—Named after George Washington. When the bill creating the Territory of Columbia was introduced in the 32nd Congress, second session, the name was changed in the bill to Washington because of the existence of the District of Columbia.
- WEST VIRGINIA**—(See Virginia).
- WISCONSIN**—An Indian name which, according to Reuben Gold Thwaites, was originally spelled "Ouisconsin" by the French missionaries and in old French-American documents; also was spelled "Misconsin," "Ouisconching," "Ouiskensing." The Yankee settlers spelled it "Wiskonsan," then "Wiskonsin;" but Congress changed it to "Wisconsin."
- WYOMING**—(By the State Historian, Eunice G. Anderson)—What we would determine to be the most authentic publication upon the derivatives of the name of our State gives the following: "The word Wyoming was taken from Wyoming Valley, Pennsylvania, rendered famous from Campbell's beautiful poem, 'Gertrude of Wyoming.' The word means 'mountains and valleys alternating.' Or, as we construed it, 'Here God has bent down the backs of His mountains for man to make his habitations.'" This is given by Gen. Freeman.

## MOTTOES OF THE STATES OF THE UNION.

| STATE.              | When Adopted.  | Motto.                                                                                             |

From time to time Congress has been asked to adopt a national flower, but has taken no step to that end.

## The States of the Union.

## ALABAMA.

Area, square miles.....61,998.....28th in rank  
Population, 1920.....1,449,661.....28th in rank

Alabama, one of the States of the Old South, is in the heart of the cotton belt, in the East South Central group, on the Gulf of Mexico, bounded on the north by Tennessee, on the east by Georgia, on the south by the Gulf and Florida, and on the west by Mississippi.

It is level and largely alluvial along the seashore and for a considerable distance inland, rising to hilly or low mountainous elevations in the north-east. Forests originally covered most of the area, but have been materially reduced by non-conservation methods of lumbering. The State is well watered, river navigation being available, notably the Tombigbee and Warrior Rivers together for 400 miles inland, and ocean carriage on the Gulf.

On the Tennessee River rapids at Muscle Shoals are the nitrate fixation plants built by the Federal Government in the World War, but not carried to point of production. Henry Ford of Detroit, automobile, tractor, railroad and steel works magnate, seeks possession of the plants for nitrate making and development of latent water power, the contract therefor being before the Federal Government.

Agriculture is the chief interest, although in the past thirty years the mineral industries have been wonderfully developed. Birmingham being known as "the Pittsburgh of the South." In 1920, 2,392,962 tons of pig iron were produced, the State ranking sixth. Alabama, as one of the 16 cotton States, raises normally about one-fifteenth of the country's cotton on about one-thirteenth of the cotton land areas of the Nation. Corn, white and sweet potatoes, oats, tobacco, sugar, hay and fruits abound.

The Census of 1920 showed the iron and steel industries, in value of products, \$121,998,000, was second to agriculture, \$304,348,638, and ahead of lumber and timber products, \$55,139,000, yellow pine being 91.3 per cent. of the cut, with 1,642,588,000 board feet, the oak cut being 61,189,000. Gum, maple, ash, hickory, cypress and tupelo also supply lumber. Cotton mills are becoming important. Coal production is large.

Practically all of the State's foreign commerce passes through Mobile, that Gulf port having been in past years relatively unimportant, but having attained, rapidly, commercial prestige since the mineral industry development began.

Railroad mileage in 1921 was 5,378.

A feature of Alabama is the high proportion of Negro population. Two of each five persons are black. Alabama is intensely American, there being only about 20,000 foreign-born. In some portions of the State, known as "the black sections," however, the Negro population is about 80 per cent. of the total. The rate of illiteracy, by the 1920 census, was 16.1 per cent. of the total population. Of the 1,038,692 native whites, 65,394 were illiterate, or 6.3 per cent.; and of the 674,004 Negroes, 210,690 were illiterate, or 31.3 per cent. Excellent progress, however, is making toward a higher standard, the percentage of illiterates having been reduced from 22.9 in 1910.

A famous agency for this improvement is the Tuskegee Normal and Industrial Institution, founded in 1880 by the late Dr. Booker T. Washington, a Negro acknowledged as leader of his race. The enrolment was 1,736. The enrolment at the University of Alabama, a State endowed and controlled institution, at which only whites matriculate, was 1,860, with 1,315 students in other higher educational institutions.

## ARIZONA.

Area, square miles.....113,966.....5th in rank  
Population, 1920.....354,163.....45th in rank

Whereas Alabama has 45 persons and Massachusetts 479 to the square mile, Arizona, a mountain State, has only 3—and of the 334,162 of population, there are 60,325 Mexicans, which fact, together with the warm climate and the ease of life there, made Arizona one of the picturesque States in the frontier days. Although then precisely characteristic of "the West," it is now modernized, with every agency of civilization.

It is situate in southwestern United States, west from New Mexico, east from California, and south from Utah and Colorado, and is on the boundary between the United States and Mexico.

Arizona prides itself on being a man-made State. Vast reaches of arid and semi-arid lands, useless before irrigating water was turned on, have been made highly productive. Agriculture has greatly increased, and new irrigation projects promise further enrichment. The topography is broken, being mountainous in portions of every section: the northern plateau is 4,000 to 7,000 feet in altitude, and the southern from 500 to 2,500. On the broad plains the mountain sides livestock graze, and through the valleys the irrigating waters are led. Long staple cotton has been developed as a principal crop, other products being wheat, corn, barley, oats, hay, potatoes and immense quantities of sub-tropical fruits. Dates thrive. Ostich farming is a feature.

Mining is extremely important. Copper mines in the State are among the greatest in the world, the most famous being the United Verde, owned by former United States Senator W. A. Clark, now a resident of New York. In 1919 the value was \$84,217,141, Michigan being second. Gold, silver, lead and zinc are also produced. Manufacturing is unimportant, excepting for the large smelting interests.

Railroad mileage in 1921 was 2,478. Apart from the generally picturesque character of the State, tourists are attracted by the Roosevelt Dam, supplying irrigating waters for the Salt River Valley, one of the two greatest dams in the world, and the Grand Canyon of the Colorado River, one of the scenic wonders of the world, 200 miles long, and averaging 12 miles wide and one mile deep.

Livestock raising lends both economic value and the element of the picturesque to life in Arizona, the industry having caused the development of many very large ranches, some of which comprise hundreds of thousands of acres, with the "cowboy" an essential factor.

On the lower areas the surface of the earth is low, since they were the bed of a primal sea, in which are immense deposits of the several kinds of salts, such as potash, nitrates and others, from which at time it is expected that there will be extractions of great mineral value.

Illiteracy among the native whites is low—2.1 per cent., while among the foreign-born, mostly Mexicans, it is 27.5.

Tucson is the seat of the University of Arizona, and Flagstaff has the Lowell Observatory. Phoenix, the capital and largest city, is the centre of the richest agricultural district, the Salt River Valley.

Arizona has a large population of Indians, 42,400 (1920), mostly Apaches, Navajos, Hopis, on reservations, a number exceeded only in Oklahoma. They occupy 18,653,014 acres, valued at \$61,343,402, and with an income of \$5,482,039.

## ARKANSAS.

Area, square miles.....53,355.....26th in rank  
Population, 1920.....1,752,804.....26th in rank

Arkansas (pronounced Ar-kan-saw) is of the Old South, situate inland, in the West South Central group, Missouri bounding it on the north, Tennessee and Mississippi on the east, Louisiana on the south, and Oklahoma on the west, and is on the Mississippi River, down which much of its traffic flows. Its topography is mostly level, but in the west rise the mountainous elevations of the Ozarks.

Agriculture is the chief source of wealth. The 1920 census gave \$340,813,256 as the value of all crops; lumber and timber products are next with \$84,000,000, and there is considerable coal, lead and manganese mining. There are important phosphate deposits, later to become very valuable for land fertilization.

Arkansas produced one-thirteenth of the Nation's cotton on one-thirteenth of the cotton lands, being thus an average for per acre productivity. Its cotton mills are of growing importance.

Wheat, corn, oats, potatoes, white and sweet, hay, tobacco and fruits are produced. Roses are grown extensively for the making of perfumes.

The State is richly endowed with forest wealth, every sort of tree which grows in the temperate zone abounding, with much of the rapidly-disappearing hardwood which forms an important article of Arkansas commerce.

Railroad mileage in 1921 was 5,052.

The Negro represents one-third of the population; with the inevitable consequent illiteracy of 21.8 per cent. among them, that of the native-born whites being 4.5, and the average for the whole population 9.4. As in all Southern States, keen effort is exerted to improve this matter, average illiteracy having fallen from 12.6 per cent. in 1910.

Likewise, as in most of the Southern States, the

Baptist Church comes first with communicants, the Methodist being second, and Roman Catholic and Presbyterian following in that order.

The Southern custom is followed by providing separate schools for black and white, about 500,000 pupils attending. Besides the State University at Fayetteville, with 650 students, there are several church colleges with about 750 students each.

The Hot Springs, a national reservation in the western part of the State, are world famed and support thousands who attend the wants of tourists.

### CALIFORNIA.

Area, square miles.....158,297.....2d in rank  
Population, 1920.....3,426,861.....8th in rank

California, in the Pacific group, occupies about one-half of the Pacific coastline of the United States; is bounded on the north by Oregon, on the east by Nevada and Arizona, and on the south by Mexico. It is 1,000 miles long. Its topography is most varied and its climate as well. Every phase of surface character is presented, and the geological peculiarity of the North and South American Continents is here seen—the aged mountain ridge that runs from the Arctic Circle southward through the States into Mexico parallel to and near the seashore. There is much plains land, too, and every kind of soil that marks the temperate and sub-tropical zones, with practically all climates which are found in such regions. The State has no navigable rivers, except the lower Sacramento, but abundant waters in smaller streams enable immense irrigation of lands otherwise virtually useless. California is the leading State in irrigation, its enormous fruit, garden and, much of the grain output being attributable largely thereto.

Californians especially pride themselves in the climate, which has such fame as to attract visitors from all corners of the earth, particularly in the winter. For their accommodation, numerous luxurious hotels are maintained. Touring is so general also that there are thousands of miles of excellent roads, and ownership of automobiles is so great as to give California second place in per capita relationship to the total number of motor cars.

Railroad mileage in 1921 was 8,356.

Agriculture is enormously developed. There are about 100,000,000 acres in the State, and the farms, which include orchards and vineyards, take up 29,365,667 acres, according to the 1920 census, of which 11,878,339 are improved, some highly so, the value of all being \$3,431,021,861.

Literally every product of the temperate and sub-tropical zones is grown there—all cereals, forage crops, vegetables, fruits and nuts. Crops in 1920 were valued at \$689,757,377, dairy products, \$276,424,216, livestock, \$204,378,445, with other large agricultural production.

Mining interests are extensive, in gold, silver, copper, lead and quicksilver.

The stores of petroleum are very large; California produces about the same amount as Texas, and is exceeded only by Oklahoma in output. The product in 1920 was 193,377,361 barrels. A peculiar sight is the oil derricks rising amid the comfortable homes of Los Angeles, and those set in the sea waters below Santa Barbara. The State produces all the borax mined in the United States, 120,320 tons being produced in 1920.

Enormous shipping is carried on, San Francisco being the chief port, the others being Los Angeles and San Diego.

The forests, in common with all States of the Pacific group, are very extensive, comprising every variety of tree which grows north of the purely tropical zone. Copiferous trees are most numerous. The giant redwood groves are the destination of many tourists. California no longer is an exporter of ordinary lumber, being compelled to buy from Oregon and Washington.

It is a State of romance in history. Acquired from Mexican political control in 1846, gold was discovered in 1848, and in 1849, the most remarkable "gold rush" ever known began, it being said that the gold produced thereafter enabled the United States to withstand so well the economic strain of the Civil War which began in 1861. The gold output in 1921 was \$15,961,300; silver, \$3,696,708.

Illiteracy is low—3.3 per cent. in 1920; it was 3.7 in 1910. Of the 2,075,467 native whites, only 8,747, or 4-10ths of 1 per cent., were illiterate, illiteracy among the foreign-born being 10.5. They are Orientals and Europeans, with some Mexicans.

The Japanese population in 1920 was 71,952, an increase of 30,696 in ten years; and of Chinese, 28,812, a decrease of 7,436.

The State has three universities—Leland Stanford Jr., the University of California, which matricu-

lates about 12,000; and the University of Southern California. There are many colleges.

One of the points of interest is the motion picture colony at Hollywood, a suburb of Los Angeles. The atmosphere is so clear that motion pictures may be taken on about 360 days of the year, while the topography and flora afford most varied "locations." Yosemite Park (national) is a scenic wonder. The retention of the Spanish influence in architecture, the climate and the profusion of vegetation, where water flows on the lands, attract many tourists.

The United States Department of Agriculture lately has developed cotton growing, which has produced a fibre of the quality of the finest sea island, which, in turn, has given rise to the cotton mill industry. Other manufacturing is extensive, the investment being about \$750,000,000, and the output about the same.

The Roman Catholic Church leads all religious bodies, the bequestal to later generations of the work done by the Catholic missionaries who established a string of 26 missions a day's march apart from the Mexican line to upper San Francisco Bay.

### COLORADO.

Area, square miles.....105,948.....7th in rank  
Population, 1920.....939,629.....33d in rank

Colorado, one of the mountain States, is bounded on the north by Wyoming and Nebraska, on the east by Nebraska and Kansas on the south by New Mexico, and on the west by Utah.

Its topography is varied, being plains lands in the east and south, but rising to the elevations of the Rocky Mountain range in the west, some peaks towering to an altitude of 14,000 feet. The Union Pacific crosses Marshall Pass at above 10,846 feet, and the Denver & Rio Grande climbs the Tennessee Pass, near Leadville, at 10,219.

Soils vary from arid, when non-watered, to productive. Irrigation is extensive, and has lifted agriculture to first place in the State, ahead of mining and livestock, which come next. The 1920 census showed all crops valued at \$181,065,259, even mineral production, \$51,217,038, being behind, although the State abounds in mineral wealth and development is rapid, with petroleum abundant and production great. Minerals produced are gold (second in output in the country), in 1921, \$7,347,800; silver, \$6,310,694; coal, \$28,342,195; copper, zinc, lead, manganese, gypsum; and the State is first in radium output and second in tungsten.

The western ranges abound in forage grasses, on which large numbers of food animals and horses live and produce vast annual wealth.

The climate is warm in summer and cold in winter, but dry, and stimulating. It is said that the sky is absolutely cloudless in Denver (the capital and chief city), 5,183 feet above the sea, on 300 days of the year. These qualities have attracted many persons desiring relief from tuberculosis.

Railway facilities are plentiful, and freight tonnage and tourist travel are heavy. The rapidly improving highways are covered by many trans-continental automobile parties, which, en route, seek the local attractions of mountain and valley, chief among which are the mineral springs at Colorado Springs, and everywhere there is unusual conformation and coloration. The State has developed a wonderful highway through the reserved State Park, which is scenic and diverse in interest. The Royal Gorge of the Arkansas, through which the Denver & Rio Grande runs, is justly famed.

Illiteracy is low at 3.2 per cent. of the whole population in 1920; native white, 1.4 per cent., and foreign-born, 12.4. For a State of 939,629 population, there is unusually large provision for education, with 192,000 public school enrolment in 1919, and the State University at Boulder, University of Denver, State Agricultural College at Fort Collins, State Teachers' College at Greeley, the State Normal School at Gunnison, and the State School of Mines at Golden, which has advanced far in mineralogical science.

### CONNECTICUT.

Area, square miles.....4,965.....48th in rank  
Population, 1920.....1,380,631.....20th in rank

Connecticut, one of the original Thirteen States of the Union, is situate in New England; bounded on the south by Long Island Sound, on the east by Rhode Island, on the north by Massachusetts, and on the west by New York. It was settled early in the seventeenth century by the Dutch from New York, then known as New Amsterdam, and by Puritans from Massachusetts at Hartford, in 1636.

In 1639 it adopted a written constitution, confirmed by a charter from King Charles II. in 1662, and replaced in 1818 by a State constitution.

The State is now intensely industrial, although earlier it was agricultural. The 1920 census indicated that 62.7 per cent. of the people live in towns of 10,000 or more population, and that, including smaller towns, 85 per cent. live urban lives, practically every town having industries. Connecticut presents an unusual contrast in the presence, especially in the western part, of hundreds of beautiful country homes of New York and other city folk, alongside of towns and villages in which industry flourishes.

Proportioned to population, no State has greater industrial strength or a wider range of manufactured products.

Connecticut's surface is broken, there being ridge after ridge, with verdant valleys between. Toward the shores of the Sound, the land is generally flat, but it rises to about 2,000 feet of altitude in the north-western parts, where the Berkshire Hills begin and extend northward into Massachusetts and Vermont. Originally, the entire State was heavily wooded with all trees known to the temperate zone, hardwood and coniferous varieties abounding. Lumbering has reduced the timber supply materially. The water supply is large for industrial uses. The Connecticut River and the Housatonic are the principal streams, their valleys immensely productive. Tobacco is a very great source of wealth, 45,074,000 pounds being grown on 31,000 acres in 1921.

Besides its pre-eminence in manufacturing industry, Connecticut has in the capital, Hartford, also the insurance centre of the United States, with numerous powerful assurance companies covering every modern phase—life, fire, burglar, etc.

Its industrial output in 1920 was valued at \$1,392,432,000, or almost exactly \$1,000 per capita, in which there was a net of \$706,494,000 added to materials used by the process of manufacture. In which 292,672 persons were employed, or considerably more than 20 per cent. of the total population. It was the large growth of industrial interest that brought in many foreigners as factory and other laborers, so that, although originally intensely New England in social composition, its population now is largely mixed.

The range of industrial output covers brass, bronze, copper products, very many kinds of machinery, silk goods, hardware, cutlery, electrical apparatus, rubber goods, woollens, ammunition, tires, hats, boots and shoes, great quantities of all kinds, typewriters, firearms, needles, pins, paper, clocks, ordnance, knit goods, dyeing, lumber, clothing, engines and scores of other products.

Agriculturally, Connecticut has fallen off from her one-time superiority, the competition of the virgin soils of the Middle West and the Far West causing the abandonment of many farms a generation ago, these farms having been taken over in recent years for country homes. Against the large industrial output values, the 1920 census gave the value of all crops at \$4,472,644.

In early days, shipping was important, but is to-day relatively negligible excepting for coastwise water-borne traffic. The prevalence of good roads has enabled the development of many motor truck lines, which haul immense quantities of goods and materials to market without utilizing the railway for any part of the haul, while the same good roads have multiplied automobile tourist travel until the State accommodates very heavy vehicular traffic. Railroad mileage, 1921, was 1,001.

Before the influx of foreigners, illiteracy was almost nil. It is now 6.2 per cent. for the State: 4-10ths of 1 per cent. for the native whites, and 12.8 for the foreign-born. The whole of New England was shown by the 1920 census to be 4.9 per cent. illiterate, and the United States 6 per cent.

Yale University, at New Haven, founded in 1701, has grown to be a world-famed institution, with 4,000 students. Trinity College in Hartford is the other principal higher institution, and there are normal schools for the training of teachers at New Britain, Danbury, New Haven and Willimantic. About 270,000 are enrolled in the public schools, or about 27 for each 108 of population.

## DELAWARE.

Area, square miles.....3,390.....47th in rank  
Population, 1920.....283,003.....47th in rank

Delaware, one of the thirteen original States, next to Rhode Island the smallest, lies in the South Atlantic group, bounded on the north by Pennsylvania, on the east by New Jersey, Delaware Bay, and the Atlantic Ocean, on the south by Maryland, and on the west by Maryland and Pennsylvania. It is 110

miles long with an extreme breadth of 35 miles. The land is low lying, one-twentieth being marshy.

It is essentially agricultural, 85 per cent., 944,511 acres, of the 1,500,000 total State acreage, being in farms, and 653,052 improved, with corn and wheat the chief products, and also much fruit and tomatoes, Delaware being the second State in tomato packing, and famous for its peach crop. Its flat, alluvial soils, practically unbroken, yielded, Census of 1920, \$23,058,906, or almost exactly \$10 per capita for the 223,000 of population. Oysters and fish are taken extensively.

Relative to the size and population, Delaware has large manufacturing interests. Wilmington, at the northern tip of the State near Philadelphia, with 110,108 persons, about one-half the population, has most of the industries. Leather and knitting lead. The large parent plant of the duPont powder works is in the valley of the Brandywine.

Wilmington is the chief port, ship traffic passing up the Delaware River. A Government canal connects Delaware and Chesapeake Bays. A concrete motor highway completing a trunk line through the State was built at a cost of nearly \$4,000,000 by Gen. T. Coleman duPont (U. S. Senator) as a gift to the State.

Railway mileage, 1921, was 335. About 35,000 attend the public and other schools, and the percentage of illiteracy for the State was, in the 1920 census, 5.9, native white, 1.8, and 19.1 for the Negro, who totals 15 per cent. of the whole population. Educational progress is being made as proved by the 1910 illiteracy percentage, 8.1, reduced materially by 1920. Ability to read and write are requisites for voting.

Delaware is the only State to retain the whipping post as a punishment for criminals.

## DISTRICT OF COLUMBIA.

Area, square miles.....70.....49th in rank  
Population, 1920.....437,671.....49th in rank

The District of Columbia is the seat of the Federal Government of the United States. Its area was originally 100 square miles taken from the sovereignty of Maryland and Virginia, Virginia's portion south from the Potomac being later ceded back to that State. It lies therefore on the west central edge of Maryland on the Potomac River, opposite Virginia. It is in the South Atlantic group. The District is co-terminus with the City of Washington.

Almost the entire activity is governmental, there being regularly employed therein from 100,000 to 120,000 persons. Industrial interest is mostly output for local consumption, although there has been effort by some to develop Washington, the Capital City, as an economic centre. Navigation is carried on via the Potomac River, which is a branch of Chesapeake Bay. The river was naturally capable of accommodating large vessels, and has been improved in depth and otherwise, so that heavy war or commercial craft may pass. Washington is the chief railway stopping point en route between North and South. The Union Station in Washington is said to be not only one of the most efficient in the world for passenger transportation handling but also one of the finest architecturally ever built. Railroad mileage, 1921, was 36.

The distinctive feature of the city municipally is the fact that the Government is by the Congress directly as to legislation, and by Executive Commissioners elected by the President of the United States, confirmed by the Senate. Each House of the Congress has a Committee on District of Columbia, and taxation current and for improvements is, by and large, borne half by the Congress, half by the people locally.

Physically, the distinctive feature is the excellent town planning done there by Major Pierre l'Enfant, French engineer, at the instance of George Washington. By a peculiar accident, Washington obtained a most excellent physical arrangement, economic and social. Major l'Enfant, drawing on French history, laid out the city with wide diagonal avenues, traversing streets planned on the "iron" method. Major l'Enfant's idea was that, in the event of street riots, artillery could rake the city, and piling of barricades would be difficult if the diagonals were made very wide.

The result was a beautiful city with ideally economic traffic outlets in all directions, wide where needed, narrower where wide highways are not necessary. The streets are wonderfully shaded with a luxuriant growth of trees, which have been brought to high perfection by the United States Department of Agriculture, and brought, as well, from almost every country in the world.

There is generous provision for park space. There is the Mall, running from Capitol Hill toward and

around Washington Monument in large park spaces back of the White House and Executive Departments, being designed (under the newer improved plan, for which Charles Moore of Detroit was chiefly responsible), for the accommodation of a group of governmental structures on a scale apparently never before contemplated by any other Government in the world. There are many smaller parks scattered through the city, and little street crossing resting places. Fort Creek Park is one of the finest in the country for natural beauties.

Many wealthy Americans in late years have erected palatial dwellings in Washington, and there are many fine country estates nearby, with desirable suburban centres on all sides. The Census of 1920 returned 204 farms in the district.

Educationally, the District of Columbia is far advanced. The higher institutions are Georgetown University (Catholic), George Washington University, the Catholic University of America, the National Methodist University, Howard University for Negroes, and two normal schools for the training of teachers.

Literacy in the District is low at 2.8 for all native white, 3-10ths of one per cent., Negro, 8.6, Negro population being almost exactly 25 per cent. of the total. About 6 per cent. are foreign-born.

### GEORGIA.

Area, square miles. . . . . 59,866 . . . . . 20th in rank  
Population, 1920. . . . . 8,896,889 . . . . . 12th in rank

Georgia, of the South Atlantic group, which was one of the Thirteen Original States is bounded on the north by Tennessee, North Carolina and South Carolina, on the east by South Carolina and the Atlantic, on the south by Florida, and on the west by Alabama.

Agriculture is very important. Of the total of about 40,000,000 acres 25,000,000 are in farms or 62.5 per cent., and more than 13,000,000 actually improved, or about 82 per cent.

All crops. Census of 1920 were valued at \$540,618,628, of which \$60,720,000 was for cotton in 1,681,907 bales from 4,720,498 acres Georgia being the second cotton State only Texas exceeding it. Crops are various—cotton, corn, oats, wheat, sugar cane, corn the most important cereal, with 69,975,000 bushels produced in 1919.

Ten States exceed Georgia's 35,000 acres devoted to tobacco. Georgia comprehends all things grown in the temperate and sub-tropical zones, is improving its methods with enthusiasm, and livestock values are very high.

Manufacturing has, however, passed agriculture in relative importance, the value of the industrial output, Census of 1920, being \$693,237,000. Cotton goods, from the lately developing mills, led with \$192,186,000, and oil and cake from cottonseed followed with \$99,320,000, so that cotton and its several forms is Georgia's chief single interest. The cotton mills operate more than 2,000,000 spindles. The percentage of child labor, 1920, was 17.2 in Atlanta.

From the extensive forested area \$35,886,000 of lumber and timber products were shipped, land fertilizers were valued at \$47,480,000, and other industrial concerns include car works, shipbuilding, machinery, knit goods, flouring mills, food preparations and others.

The State has important mineral resources, coal, iron, manganese, gold and silver, not yet highly developed, and fisheries of oysters and other shellfish are considerably important.

Transportation is highly developed, with abundant rail lines and large ocean shipping in and out from Savannah, chief port. A third of a billion of dollars of exports went therefrom in 1920, vessels up to 32 feet draft being accommodated at high tide across the bar, and 28 feet at all times.

Railroad mileage, 1921, was 7,326.

Negro population is 42 per cent. of the total, bringing up the percentage of illiteracy for the whole State to 15.3, that of native white being 5.4 and of Negroes 29.1. Illiteracy percentage in 1910 was 20.7. Of 2,895,882 population, there were Census of 1920, 570,000 attending school.

Atlanta, chief city and capital, is accounted one of the progressive cities of the South, and nationally holds high place in banking strength.

Water power abounds, and manufacturing advance has been due largely to it.

The lumber cut, mostly pine, exceeds 500,000,000 feet, although production, as in most of the Southern States, is due soon to diminish to negligible quantities for exportation, owing to the enormous areas of the originally large forested lands having been cut over.

Okefonokee Swamp, in the southeastern corner, 400,000 acres, is, like the Everglades of South Florida, potentially rich for agriculture when drained.

### FLORIDA.

Area, square miles. . . . . 58,866 . . . . . 31st in rank  
Population, 1920. . . . . 868,470 . . . . . 32d in rank

Florida, a South Atlantic State, reputed to have been discovered by the Spaniard, Ponce de Leon, in his search for the "fountain of perpetual youth," is the southeastermost point of the United States, bounded on the north by Georgia and Alabama, on the east by the Atlantic Ocean, on the south by the Straits of Florida, and on the west by the Gulf of Mexico.

It is one of the three or four most important fruit States, its cultivated lands producing in all \$80,266,806 in 1919. Florida is lowest of all Southern States in cotton production. The sub-tropical products prevail in fruits and other land output.

A present and future source of great wealth are the natural deposits of phosphatic rock, whence normally, pre-war, more than 1,000,000 tons were exported for foreign use as land fertilizer, and much was used domestically. It produced \$6,678,888 worth in 1919. It is the world's largest phosphate measure.

Florida, being of coral formation, there are no high elevations and in the southern part are vast swamps, the Everglades, which are being drained, providing large potential agricultural wealth.

Less than one per cent. of the area is forested, but from it comes about one-half the national supply of turpentine and resin, known commercially as "naval stores."

The State is penetrated by several rivers, chief of which is the St. John, up which steamers ply for 180 miles. At the mouth lies St. Johns said to be the oldest white settlement on the continent.

Railroad mileage, 1921, was 5,812.

Florida is the resort of very large numbers of winter tourists, there being a dozen places of that character scattered along both coasts and inland. Coastwise, the vegetation is sub-tropical and in the interior is a coniferous tree-clad, sandy region where citrus fruits have been developed highly.

The celebrated resort is Palm Beach on the east coast, to which go some of the most ardent devotees of fashion.

Three of each eight persons are Negro. The illiteracy reported in the 1920 census was 9.6 per cent., against 18.6 in 1910, indicating remarkable progress in popular education. Native white illiteracy was 2.8, and of Negroes 21.5. Public school enrolment was 196,408, and there are the John B. Stetson University of De Land, the University of Florida at Gainesville, Rollins College at Winter Park, and the State College for Women at the capital, Tallahassee.

### IDAHO.

Area, square miles. . . . . 82,886 . . . . . 19th in rank  
Population, 1920. . . . . 451,866 . . . . . 43d in rank

Idaho, of the mountain group, is situated astride the Rockies in the Pacific Coast region, bounded on the north by British Columbia and Montana, on the east by Montana and Wyoming, on the south by Utah and Nevada, and on the west by Oregon and Washington.

Its topography, mountainous with broad level plateaus. It classes as of the irrigation States agriculturally, the lands when watered being exceedingly productive, fruit raising having been highly developed. Most of the plains lands which have not been reclaimed by irrigation remain unproductive, with considerable livestock interest thereon. The Rocky Mountains traverse the State, highest elevation being Mount Hyndman, 12,078 feet. The Snake River is the chief stream, is the western boundary of the southern two-thirds of the State, and is navigable for a considerable distance above Lewiston where it makes up into the State of Washington on its way 200 miles to the Pacific Ocean. The climate is dry and stimulating, warm in summer and cold in winter.

Idaho is undeveloped, having large mineral resources, and much land yet to be covered with irrigation waters. The Federal Reclamation Service has already built several important irrigation projects, and many private projects have been carried through.

Present mineral production is very great, especially in the northern or "Panhandle" section, where the lead output is second only to that of Missouri. Zinc production is sixth (value of both lead and zinc, 1921, \$9,529,728) among the States, gold

eleventh (1921, \$542,200); silver fifth (1921, \$7,200,319); lead (1920, \$22,292,000); and copper (1920, \$491,000). But all the principal metals are present, and tungsten is a source of interest.

The value of the agricultural yields, Census of 1920, was \$126,495,111, there being thirty States that exceeded it. Of the total of 60,000,000 acres there were 42,106 farms, Census of 1920, comprising 8,375,873 acres, of which 3,266,386 were irrigated. Varied crops were raised, wheat, 27,079,000 bushels; oats, 7,740,000; barley, 2,784,000; potatoes, hay, all sorts of vegetables.

The livestock industry is very great, the wool clip alone in 1920 being 21,702,000 pounds; sheep, cattle and horses abounding, cattle numbering 642,000.

Normally, almost a billion feet of lumber are cut. The forest wealth is large, white and yellow pine, larch, white fir and cedar supply activity to many mills. It is claimed that the sawmill at Pottlach, Idaho, cutting 750,000 feet daily, is the largest in the world. Idaho pine is famous for ship and yacht

Railroad mileage, 1921, was 2,877.

Only Iowa, with 1.1 per centage of illiteracy shows a better record than Idaho and Oregon with 1.5 each; native white, figures of 1920 census, 3-10 of 1 per cent., foreign-born, 6.5. Educational institutions show an unusually large proportion in school—105,000 of the total State population of 431,866; or one for each four persons. Higher institutions are the University of Idaho at Moscow, the College of Idaho at Caldwell, and State normal schools at Lewiston and Aiblon.

A summer feature is the running of the dangerous but picturesque Snake River in flatboats, together with the unexcelled fishing in the mountain streams, where speckled trout are taken.

## ILLINOIS.

Area, square miles ..... 56,665 ..... 33d in rank  
Population, 1920 ..... 6,485,280 ..... 3d in rank

Illinois, the third most populous State of the Union, lies in the East North Central group, its northeastern corner touching Lake Michigan, the Mississippi River flowing along its western boundary line, the Ohio River along its southern end, and is bounded on the north by Wisconsin, on the east by Indiana, on the south by Kentucky and Missouri, and on the west by Missouri and Iowa. It is intensely industrial, agricultural, mining, and water and rail transportation in interest.

Illinois is almost uniformly level, being situated in a glacial moraine, and is alluvial in all parts, with a climate such as prevails in the whole of the Middle West. It is so level that a railway possesses one precisely straight line 100 miles long in which scarcely a dirt cut was necessary—a vast prairie, once largely wooded, now with but 10 per cent. of forest cover. With the exception of Iowa, no other State has so large a proportion of lands susceptible of cultivation.

It is provided with remarkable mileage of riverways, the Mississippi, the Ohio, and the Wabash, which skirts the southeastern corner. The Illinois River is the principal intrastate river. The artificial waterway is the important Chicago Drainage Canal, 40 miles from Chicago on Lake Michigan to Joliet on the Illinois River, a unique engineering device which supplies drainage out from the flat lake-coastal district around the city and the Chicago River, and really reverses the natural tendency to drain into Lake Michigan. Eventually, the canal will be extended by improving the Illinois River to the Mississippi, giving Chicago navigation from "the Lakes to the Gulf" of Mexico.

Traffic on the Great Lakes to and from Chicago (population, 1920, 2,701,705), which is the second most populous city in the country, is attaining immense proportions, in general cargo as well as in ore brought from the Minnesota, Wisconsin and Michigan mines to the great works of the United States Steel Corporation in Gary, Indiana, a suburb of Chicago.

Although second to Texas, which has 16,041 miles, Illinois, in 1921, with 12,181 miles of railway has the heaviest railway transport tonnage in the United States, Chicago being the greatest railway centre in the world.

The industrial interest of Illinois far exceeds its agricultural. The 1920 census gave the State \$864,737,833 value of all crops, and \$3,250,000,000 value of manufactured products. Were the products of the Gary works included, as economically they should be, the value would be vastly more; while for the same reason the immense Standard Oil and other steel working industries of the East Chicago-Indiana, district, should be added. The

range of industrial output is great—iron and steel, the greatest meat packing works—the Union Stock-yards—in the world, machinery, electrical equipment, implements, furniture, motor cars and railway cars, woodenware; flour, woolen goods, and scores of other things. Between \$2,500,000,000 and \$3,000,000,000 is invested in manufacturing, the products going to all parts of the world.

Everything appertaining to the temperate zone is produced on Illinois lands—all cereals, vegetables, fruits and livestock. The 1920 census gave Illinois's corn production as 301,000,000 bushels, nearly 10 per cent. of the national crop; wheat, 65,675,000; oats, 123,960,000; and immense output of other crops. The Chicago Board of Trade is the principal grain dealing exchange in the country.

Bituminous coal underlies more than half the area of the State, Illinois ranking third in mineral output. The 1920 census assigns coal output values of \$240,000,000, with oil and natural gas in generous measure. The other base minerals are found in that belt.

The 1920 census showed 1,116,099 pupils and students in all educational institutions reporting, about one in each six persons. Besides a very extensive public school system, there are 29 colleges and universities, and five State normal schools for training of teachers. The most prominent universities are the University of Illinois at Urbana, 9,403 students; the University of Chicago (endowed for more than \$30,000,000 by John D. Rockefeller), 9,032; Northwestern University at Evanston, 4,759; Loyola University at Chicago, 1,621; James Milliken University at Decatur, 1,538.

Illinois shows 3.4 per cent. of illiteracy, Census of 1920, native white, 8-10 of 1 per cent., foreign-born, 11 per cent., and Negro (of whom there has been a remarkable influx induced by the late war demand for labor), 6.7 per cent. Of the 6,485,280 of population, Census of 1920, native-born whites were 5,092,382; foreign-born, 1,206,951; per cent. of native, 78.5; foreign, 18.6; Negro, 2.8. Chicago is the chief Polish centre of the country, with a large percentage of Jews and all classes of immigrants.

Tourists find a wealth of art centres in Chicago, such as the Field Museum and the Chicago Museum of Art, with many art schools. Chicago is a great national convention resort; the Auditorium, seating about 8,000, is usually the place of entertainment. Chicago's park and boulevard system, as planned, is perhaps the most ambitious ever conceived by any city in the world, with three large parks already developed, connected by wide boulevard along the lake front cutting through the heart of the city, the whole laid out by some of the greatest city planning and landscape architects in the world.

## INDIANA.

Area, square miles ..... 36,364 ..... 37th in rank  
Population, 1920 ..... 2,980,390 ..... 11th in rank

Indiana, in the East North Central region, touches Lake Michigan at the northwestern corner of the State and is bounded on the north by Michigan, on the east by Ohio and Kentucky, on the south by Kentucky, and on the west by Illinois. The Ohio River, important in navigation, skirts the entire southern side, and the Wabash River, also susceptible of greater navigation development, about half of the western boundary line. There are 550 miles of riverways navigable.

In general, Indiana occupies a fairly level tableland and was once a glacial moraine. The climate is characteristic of the Middle West, warm in summer and rather cold in winter.

Industry, with \$1,901,846,000 output, Census of 1920, exceeds agriculture with \$497,229,719 value of all crops, and mining, \$59,926,558.

Transportation is heavy, with 7,586 miles of railways. Immense tonnage moves riverwise on the Ohio and Wabash, and also enormous tonnage enters and leaves the Lake Michigan ports of Whiting, Standard Oil town; Indiana Harbor and Gary (United States Steel Corporation city), in iron ore, steel products, cereals and coal. Electric interurban traffic is the heaviest in the country.

Manufacturing comprehends practically all standard products—steel, machinery, very many motor cars, tinplate, cement, vehicles, flour, glass, oil refining, meat packing, there having been in the past 20 years, as in all Middle Western States, a vast industrial invasion to get nearer ultimate markets and obtain labor. Many Indians (Hoosiers) divide their time between farm and factory.

The 1920 census showed the value of all crops to be \$497,229,719, with corn leading—169,848,000 bushels—about 5 per cent. of the national crop; oats, 45,072,000; wheat, 24,144,000; and all other

temperate zone products, including fruits and livestock, generously represented. Evansville, on the Ohio River, is the largest hardwood market in the country, selling not only the heavy State cut from hardwood forests of vast value, which formerly covered much of the State, but also handling immense output from Southern forests.

Indiana ranks sixth in coal production; bituminous and canal—a very fine fuel for fireplaces—with \$56,926,558, Census of 1920. There are oil wells also, the State ranking twelfth in production. Many other basic minerals are found.

Railroad mileage 1921, was 7,426. The increase of industrial interest in the past two decades is the feature of Indiana's later history. In that space of time, the towns along the shore of Lake Michigan have been developed into vast beehives of industry, and Gary especially has become one of the chief steel points, increasing rapidly in population and being known also for its school system which has been copied largely in the East.

Coincidentally, Indiana has developed a remarkable school of fiction and drama writers, among them Booth Tarkington, George Ade, and Meredith Nicholson. In the southern part many mineral springs are found, principally at French Lick, where famous hotels entertain tourists from all parts of the world, and where mineral waters are bottled for domestic and foreign consumption.

Indiana has four educational institutions of fame—De Pauw University at Greencastle, with 1,025 students; Indiana University at Bloomington, 2,659; University of Notre Dame, Catholic, at South Bend, 1,123; Purdue University at Lafayette, 3,113. The public schools enroll 575,000 pupils. Illiteracy is low at 2.2 per cent., among native white, 1.3; foreign-born white, 11.8; Negro, 9.5; native whites being 91.8 per cent. of the population, foreign-born, 5.9; Negro, 2.2. A racial phase was the influx of many Germans at the time of the German revolutionary movements of the last century, the result being that now from Fort Wayne southward the German population is predominant in many districts numerically and socially. That portion of the population has always been exceedingly thrifty and dependable economically, and has aided much in the late remarkable industrial development.

In the intense industrial district along the lake the foreign-born population predominates, with Slavs of the several European countries very numerous, and in the World War Indiana responded to the first call for volunteers as promptly as any State in the Union, as proved by the records in Washington.

For the last four decades the centre of population of the United States has been in the southern part of Indiana, moving very slowly west.

## IOWA.

Area, square miles.....56,147.....24th in rank  
Population, 1920.....2,404,081.....16th in rank

Iowa lies in the East North Central part of the Middle West, bounded on the north by Minnesota, on the east by Wisconsin and Illinois, on the south by Missouri, and on the west by Nebraska and South Dakota. The Mississippi River flows along the entire eastern boundary line, and the Missouri River along three-fourths of the western line.

It is very level, only one point of elevation being 745 feet above the mean. Iowa claims the largest proportion of actually arable lands of all States and proves it by the immense agricultural production, soil and climate combining to give it that prestige, the climate being Middle West characteristically.

The value of all crops, Census of 1920, was \$890,391,299, exceeded only by Texas with \$1,071,542,103 or five times the land area of Iowa. Farm property exceeds \$8,000,000,000 in value, its area being 93,474,896 acres of the total of 36,000,000 acres in the State, 14 per cent. of the corn of the country, Census of 1920, was produced in Iowa—444,190,000 bushels—wheat being low with 10,102,000, and potatoes high with 4,128,000 bushels, hay with 4,650,000 tons, and oats with 187,045,705 bushels.

Live stock interests are immense, with all animals raised in the temperate zone abundant, and dairy and poultry outputs likewise enormous.

Fruit interests are confined mostly to the smaller varieties, and garden stuff is heavily cultivated. The farms number 213,439, averaging 156.8 acres and 134 actually improved. Iowa is the strongest centre of the late agricultural movement, which resulted in the rapid development of the American Farm Bureau Federation, the President, James Riley Howard, being an Iowan, and agrarian influence dominates the State. Iowa has the largest

ratio of automobiles per capita of all States, the farmer-owned prevailing.

Transportation is highly developed, with railways literally ribbing the State, for river through, as well as immense local, tonnage. River tonnage on the Mississippi moves in vast volume, with much on the Missouri.

Railroad mileage 1921, was 9,808. Interurban electric service is greatly developed.

Coal underlies about 19,000 square miles, the output, Census of 1920, being 6,300,000 tons, lead being found in the northeastern part, and quarry output heavy.

Manufacturing naturally consumes mostly agricultural products, in preparation of foodstuffs for the market—meat packing, flour, etc., with considerable development also of machinery making to supply the immense nearby markets. More than \$500,000,000 is invested in manufacturing, the output, Census of 1920, having been \$310,750,000.

Iowa leads all States in literacy. Only 1.1 per cent., Census of 1920, are illiterate, the percentage of native whites being 5-10 of 1 per cent., of foreign-born white, 4.9, and of Negro, 8.1. The State has a large percentage of native-born whites—89.8.

There are about 600,000 persons at school in Iowa, or one for each four of the population. The public school system is highly advanced, in method and provision for the people of all classes.

The College of Agriculture at Ames is claimed to be the leading institution of that character in the country. It has 4,859 students, and has pursued scientific investigation along all lines that appertain to agrarian interests, with much original research, and development of methods for crop and animal production and care.

The University of Iowa at Iowa City has 2,889 matriculated; Upper Iowa University at Fayette, 388, and Drake University at Des Moines, the capital, 1,460.

A signal enterprise is the utilization of vast electrical power in the Mississippi River at Keokuk, where a remarkable dam has been thrown across the river.

The diffusion of prosperity is indicated, Census of 1920, by the \$391,505,000 deposits in savings banks by 905,970 persons, averaging \$432.14 per account, or almost one account for each two and a half persons.

## KANSAS.

Area, square miles.....82,168.....13th in rank  
Population, 1920.....1,769,267.....34th in rank

Kansas, a West North Central State, in almost the exact geographical centre of the United States, is bounded on the north by Nebraska, on the east by Missouri, on the south by Oklahoma, and on the west by Colorado. It is varied in topography, with prairies extending westward, where elevations of 4,000 feet are found. There is heavy forest cover in the eastern half, much hardwood, black walnut abounding. The climate is severe in winter and warm in summer, but constantly modified by the prevalent winds. The Missouri River skirts the northwestern side for 150 miles, giving navigation to St. Joseph, Atchison, Leavenworth and Kansas City, the only other considerable river being the Arkansas, which flows through from Colorado. The Kaw is another river.

Railway traffic is mostly east and west, and several of the largest systems have lines, with liberal provision for branch service, to care for the heavy through traffic and the large State production. Railroad mileage 1921, was 9,388.

Kansas is essentially agricultural, although natural mineral wealth adds heavily to production. The Census of 1920 gives \$583,923,244 as value of all crops, livestock products and timber. The total acre in the State is 56,000,000, of which by the 1920 census there were 45,425,179 in farms, with 30,600,760 actually improved. Corn is the chief crop—132,786,130 bushels—next to wheat, 140,842,516 bushels, additional production running the gamut of temperate zone foodstuffs in cereals, tubers, sugar beets and the several kinds of animal foods. Farming is marked with the most modern of equipment in machinery. Cotton and tobacco are grown to some extent, the climate and soil being such as to enable the further development thereof when economic conditions demand.

In the western reaches of the valley of the Arkansas River irrigation is extensive and becoming more important (45,000 acres under water) as demand for land increases in the whole country. Dairy and poultry products run above \$60,000,000 annually.

Kansas derives wealth from livestock husbandry second to cereal producing. The herds range in the western and southwestern portions mostly, although not relatively so important as in the earlier days

Manufacturing, including smelting of ore, refining of oils, meat banding and milling is very extensive, the 1920 census assigning \$913,667,000 as the value of the products of all industries. Slaughtering and meat packing leads with \$427,663,000, and flour milling comes next with \$206,881,000, and oil refining with \$63,786,000, while car building and repairing by the railways adds annually \$28,231,000, and butter about \$24,444,000.

The coal fields underlie more than 15,000 square miles and, Census of 1920, produced 5,982,143 tons, and the oil measures, which are very extensive, yielded 38,501,000 barrels of petroleum. There are zinc, lead and salt.

Kansas has only 1.6 per cent. of illiteracy, that of the native whites being 6-10 of 1 per cent. of foreign-born whites, 10.5; and of the Negroes, 3.3; the Kansas colored man having advanced far along the roadway toward normal literacy. The attendance at all educational institutions is more than 400,000, or about one for each four persons, with 7,500 students in the six colleges.

Kansas was one of the first States to adopt Prohibition, and a unique present feature is the State Industrial Court, which essays to prevent strikes, and which the Governor, Henry Allen, alleges is used more by laborers initiating cases than by employers.

The diffusion of prosperity is to be judged by the fact that agricultural, livestock, dairying, mineral and manufacturing annual production totals about \$1,700,000,000, or about \$2,180 for each man, woman and child in the State.

### KENTUCKY.

Area, square miles.....40,598.....36th in rank  
Population, 1920.....2,416,650.....16th in rank

Kentucky, grouped as East South Central, a border State between the North and South, is bounded on the north by Indiana and Ohio, on the east by West Virginia and Virginia, on the south by Tennessee, and on the west by Indiana and Illinois. The Mississippi River touches the westernmost tip, and the Appalachian Mountains cross the eastern side, the Ohio River skirting the entire northern boundary. Navigable rivers flow past the State for a total distance of 813 miles. The topography is broken, with many hills dotting the tablelands, of which the famous Blue Grass region in the northern part, east from Louisville, is best known and most productive.

Agriculturally, the State is very productive: \$347,338,888 is given by the Census of 1920 as the value of all crops, which included the highest quantity of tobacco of all States, 467,500,000 pounds; and a most varied list of temperate zone products, shading off into those distinctively Southern. The corn crop in 1921 was 82,150,000 bushels.

Livestock interest is important, Kentucky horses having been for long world famed, its thoroughbreds not being excelled anywhere. Other domestic animals abound, and fruits are extensive.

Coal mined in 1920 was 27,678,572 tons, and petroleum lifted, 8,692,000 barrels.

Forest wealth is great, coniferous and hardwood trees abounding, and normally yielding annually \$20,000,000.

Manufacturing engages about \$200,000,000 of capital, and outputs about \$250,000,000 of products, and mostly uses raw materials that come from the soils, although clothing industry is developing.

Railroad mileage, 1921, was 3,929.

The illiteracy percentage is 8.4, that of native whites being 7, of foreign-born 7.3, and of Negroes 21. The State public school system enrolls about 550,000, and four universities, 5,200.

The distinctive natural phenomenon is the 9,000 square miles in Central Kentucky which is ribbed with underground passages and caves, chief of which is the Mammoth Cave, with its 150 miles of connecting passages.

In the old days before Prohibition, Kentucky was famed for its whiskeys, Bourbon County, at Paris, in the Blue Grass region, having lent its name to the corn liquor of that name formerly made and consumed in the United States.

The Kentucky mountains, picturesque and beautiful, have for years been the scene of feuds between families, which descended from father to son through generations, and which often broke in bloody conflicts, now happily passing away.

### LOUISIANA.

Area, square miles.....48,608.....30th in rank  
Population, 1920.....1,798,509.....22d in rank

Louisiana, situate in the West South Central region, on the Gulf of Mexico, at the mouth of the Mississippi River, is bounded on the north by

Arkansas and Mississippi, on the east by Mississippi State and the Gulf, on the south by the Gulf, and on the west by Texas. It is practically all alluvial built up from the silt brought down by the Mississippi River, which has thrust out a long point into the Gulf, as the southernmost part of the State.

There are no hills of consequence, and much of the lands are lower than the immediate banks of the great river, powerful levees being necessary to protect from constant overflow. As a consequence of the downwash of river sedimentary matter, the lands were naturally highly enriched, and subsequent overflowing of the waters has added food values to the soils, as does the Nile in Egypt.

The western part, immediately next to Texas, shades off toward the drier character of climate and soils, the climate of Louisiana for the greater part being rather moist and very warm in summer, with little of winter cold. It is semi-tropical.

The Sabine River bounds the State on the west, and with the Red River and the Mississippi, Louisiana has 4,794 miles of navigable waters, much of it being on the large bayous in the south.

The Mississippi River has always largely determined the character of New Orleans, chief city, for there river traffic from earliest days has been extensive, and New Orleans has dominated the State economically. For some years after the Civil War of 1861-5, river traffic fell off, but is now being revived, and is expected to grow to very heavy volume.

Railroad mileage, 1921, was 5,223.

Agriculturally, Louisiana is prolific—rice, cotton, sugar cane, corn, sweet potatoes, tobacco, especially fine, fruits of all sub-tropical sorts, and nuts are produced largely. The value of all crops, Census of 1920, was \$231,506,000. Nearly all the sugar cane and molasses produced in the country comes from Louisiana, the value being \$44,000,000, 1920 census. Cotton values the same year were \$53,250,000. Livestock interests are extensive. It is second in output of lumber.

The State ranks fifth in petroleum output, 1920 census, 35,649,000 barrels. Sulphur also is largely produced. There are more than 6,000 square miles water covered, suitable for the propagation of oysters; the shrimp catch is very valuable, and commercial fishing an important industry. Trappers market muskrat, opossum, raccoon, mink and other furs in great quantities.

Manufacturing industry centres mostly around the use of soil raw materials, the annual output being worth about \$300,000,000.

Foreign trade through the port of New Orleans is large, 1920 exports equalling \$589,409,222, and imports \$252,313,000, mainly of cotton and cottonseed, wheat brought down the Mississippi, flour, rice and other products.

There were, in 1921, 355,000 enrolled in the public schools of a population of more than 1,800,000, divided, two-thirds white and one-third Negro. Much of the population retains the original French blood, and considerable numbers the mixture of French and Spanish, which produced the Creoles. About 6,000 attend the colleges and universities.

New Orleans, the chief city, is a welcome resort for tourists in the winter, having picturesqueness and the flavor of olden times, the annual Mardi Gras being the principal attraction. Much through passenger traffic flows through New Orleans to and from the Pacific Coast, railway and steamer facilities being well supplied.

### MAINE.

Area, square miles.....33,040.....38th in rank  
Population, 1920.....768,014.....36th in rank

Maine, in New England, northeasternmost State, is bounded on the north by Quebec, Canada, on the east by New Brunswick, Canada, and the Atlantic Ocean, on the south by the Atlantic, and on the west by New Hampshire and Quebec.

It is naturally heavily wooded, mostly with coniferous trees, is of broken topography, rising to mountainous elevations in the northwest, Mount Katahdin, 5,268 feet, the highest, and slopes in broken form toward the coast, which is rugged, tortuous, picturesque and indented with many harbors, with many islands adjacent, and has very extensive natural water power sites, already somewhat developed, but assuring great industrial capacity in the future.

Its waters abound in fish, its forests in wild animals, and it has a climate rather intensely cold in winter, but beneficent in summer. It has more than 1,600 lakes, several more than 100 miles long. The coastline is 278 miles long.

Agriculture, lumbering, manufacturing, quarrying and fisheries are the chief industries.

Of the 20,000,000 total land acres, about one-third is farming area, of which about two-thirds is improved. Potatoes form the leading crop, the 1920 census showing 25,531,000 bushels worth \$52,339,000. Hay is a large crop, and all vegetables and considerable small fruits are produced. The value of all crops, 1920 census, was \$100,152,324. Livestock and dairy products add to the wealth, the milk production coming in part to supply New York City.

In granite output it ranks third, Vermont and Massachusetts exceeding; it is first in feldspar, and produces many other of the cruder minerals for building.

Lumber is the principal manufacturing product, the cut, Census of 1920, being 650,000,000 feet, white pine, spruce for wood pulp, hemlock, balsam, birch, cedar, oak, maple, beech, ash, and basswood or linden. The paper pulp mills produce 70,000,000 annually, and along the rivers are many water power motivated textile, tanning, oilcloth, boots and shoes, canning flour and machinery works. The total value of the manufacturing output, 1920, was \$465,822,000, paper and wood pulp leading with \$93,917,000, cotton goods next with \$56,564,000, boots and shoes, \$48,689,000 woolen goods, \$42,442,000, lumber, \$28,515,000, etc.

Transport by water is mostly coastwise, although there is some foreign. The railroad mileage, 1921, was 2,295.

Maine is distinctively a pleasure resort, summer bringing many thousands of tourists and residents for the season, and the fall many hunters. Luxurious hotels are maintained, and there are many private lodges and summer homes, while many artists go to paint the beauties of the Maine landscape and coastline.

Portland, the chief port, has a large steamer tourist traffic, as well as extensive freight tonnage by water and by rail.

Illiteracy percentage is 3.3, that of native whites 1.6, and of foreign-born 11.1. Public schools enroll about 170,000, and higher educational institutions rank well, with Bowdoin, at Brunswick, among the country's best.

### MARYLAND.

Area, square miles.....12,337.....41st in rank  
Population, 1920.....1,449,661.....28th in rank

Maryland, a South Atlantic border State between the North and South, is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean, on the south and west by Virginia and West Virginia. It is penetrated from the south by Chesapeake Bay, a wide arm of the Atlantic, and an important channel of water-borne commerce which has made Baltimore a great seaport. The Potomac River flows along the western boundary line, also important in commerce. The topography is varied, low and flat in the portions toward the ocean, and rising to mountain levels in the western sections, Great Backbone Mountain, 3,400 feet, the highest. The State is distinctly separated by the Bay into Eastern and Western shore parts, each having somewhat of social and industrial individuality. The climate is warm, with mild, humid winters.

The Census of 1920 showed \$109,683,574 as the value of the crops, principally corn, tobacco, wheat, oats, hay, fruits of all kinds grown in the south temperate zone, vegetables being produced heavily for the markets of the larger cities as far north as New York. Products are varied and profitable on account of the proximity of big city markets.

Mining is principally of coal, about 3,600,000 tons being the normal output.

Manufacturing output, Census of 1920, was valued at \$873,945,000, and ran the gamut of almost all classes. Shipbuilding led with \$60,844,000, followed by clothing, \$41,439,000 and the iron and steel and meat packing, \$41,384,000, which is fast growing to great importance. The census reports showed 60 classifications with more than \$1,000,000 of output each, which afford profitable diversification in industry and employment for a versatile working folk.

Transportation is highly developed, water and rail. Railroad mileage, 1921, was 1,436. Baltimore is one of the country's principal ports, and is growing in importance much faster than the Nation's visible volume increases. Water traffic coastwise is very heavy, and several substantial steamer lines also ply between Baltimore and foreign ports. Much of the product of the South comes through Baltimore, and that port gets large share of the tonnage of the North and West.

The population is 17.9 per cent. Negro, and the percentage of illiteracy for the whole State is 5.6. The swiftness with which educational advantages for the masses is sweeping away illiteracy is shown by the figure of 5.6 for 1920, compared with 7.2 in 1910. In the schools were more than 250,000, and the higher institutions are celebrated. Johns Hopkins University, at Baltimore, is not excelled in any State or country for scholarship and breadth of scientific attainment. To its hospital go patients from all parts of the world to consult eminent specialists. There are other well-known higher institutions, Goucher's College of them.

Along artistic lines there is high development, principal centres being Peabody Institute for Education in Music, the Maryland Institute School of Art and Design, Walter's Art Gallery, and others.

### MASSACHUSETTS.

Area, square miles.....8,266.....44th in rank  
Population, 1920.....3,352,556.....6th in rank

Massachusetts, one of the Thirteen Original States, lies in New England, bounded on the north by Vermont and New Hampshire, on the east by Massachusetts Bay and the Atlantic Ocean, on the south by Rhode Island, Connecticut and the Atlantic, and on the west by Rhode Island and New York. The highest elevations are in the Berkshires in the west, about 2,400 feet maximum, and now a great summer resort of wealthy city dwellers.

It was naturally wooded in all portions, but retains only a fraction of the original forest wealth, which consisted of all trees which grow in the temperate zone, coniferous and hardwood.

The State has grown to a first place in industry, manufacturing having been developed very greatly, the 1920 census showing the value of all industrial products to be \$4,011,182,000, divided into 100 classes each exceeding \$5,000,000 annual output. The per capita industrial output is \$1,045. Much of the industrial strength is due to the development of extensive water powers in the State's rivers, but coal operates many.

Cotton goods lead with \$598,667,000; boots and shoes, \$442,466,000; worsted goods, \$237,443,000; leather tanning and finishing, \$129,595,000; foundry and machine shop products, \$111,853,000; slaughtering and meat packing, \$110,233,000; woolen goods, \$105,183,000; and nine classifications exceeding \$50,000,000 output, 12 exceeding \$25,000,000, and five exceeding \$20,000,000. Practically everything manufactured in modern industry is included, excepting in those basic industries in which the cruder raw materials such as ores are needed. The census showed 11,906 establishments worthy being reported, employing 812,906 persons, paying in wages \$706,623,337, capitalized for \$2,947,108,527, utilizing 1,729,878 horsepower, consuming \$2,260,713,026 of raw materials, and adding by the industrial effort \$1,750,468,496 to the original value of the materials.

The State has abundant rail and coastwise shipping facilities; there were 2,106 miles of railroads in 1921, and 2,804 of electric lines. From the earliest generations, the New England States have been efficient in ocean-going shipping, and Massachusetts not less than any.

Massachusetts is the second densest populated State. The dense industrial and residential development is indicated by the 94.8 per cent. of urban population, which leaves agriculture, once dominant, reduced to 32,001 farms averaging 77.9 acres, value of all crops in the 1920 census being \$53,700,925, taken from farm property valued at \$300,471,748. In value, hay was the leading crop, tobacco next with \$6,419,000, and potatoes with \$6,000,000, others being wheat, corn, oats, rice, buckwheat, apples, maple sugar, and small fruits, cranberries abounding in the lands along the coast.

It is the leading fisheries State of New England, \$11,000,000 of catch being reported in 1920. Mineral products consist chiefly of quarry outputs.

No State is further advanced in primary and higher educational facilities, although, owing to recent heavy influx of industrial foreigners, the percentage of illiteracy is not low at 4.7. Native whites show 4-10ths of 1 per cent., foreigners 12.8, and Negroes, 6.8.

Of the 3,352,556 of population, 1,077,531 are foreign-born, of which 262,021 are Canadians, 117,037 Italian, 163,171 Irish, 92,034 Russian, and the others from all foreign lands.

Enrolment in the schools was 618,828; normal schools number 11, and the list of higher institutions is long and impressive, the greatest proportioned to population in the country. These include Harvard University, Massachusetts Institute of Technology, the State Agricultural at Amherst, Tufts, Williams

Clark, Worcester Polytechnic, Boston University. Institutions for women include Wellesley, Smith, Radcliffe, an offshoot of Harvard and Mount Holyoke Colleges; Simmons, Laëll and Auburndale.

The colony in pre-Revolutionary times was the centre of republic-making in the North, perhaps in the country, the Boston Tea Party, which signalized the revolt against "taxation without representation" by the mother country, England, taking place on the Boston waterfront. The first shot in the Revolution was fired at Concord, close to Boston, so that visitors to the "Hub" find the flavor of history on every hand. Boston and environs are therefore the resort of tourists.

As with all New England, the State is a great summer resort, the North Shore above Boston being the resort of summerers and many artists, and the long hooklike Cape Cod and the adjacent islands attract thousands. At Provincetown, at the tip of the Cape, the Mayflower made its first landing, moving next to Plymouth. A monument, dedicated by the late Theodore Roosevelt, stands at Provincetown to commemorate the landing.

### MICHIGAN.

Area, square miles.....67,980.....22d in rank  
Population, 1920.....3,668,412.....7th in rank

Michigan, lying along the Canadian border, is divided by Lake Michigan into two parts: the northern peninsula has on the north Lake Superior, and on the south Wisconsin; the southern peninsula has Lake Michigan on the west, Lake Huron, Ontario, Canada, and Lake Erie on the east, and Indiana and Ohio on the south. The interests of the northern peninsula are mostly copper and timber. In the southern there are also minerals and timber, but manufacturing has grown to such large importance that it leads all other concerns.

The State is mostly flat and sandy, with large areas of cut-over timberlands, mostly coniferous, with rugged topography in the north. The State, the Federal Government and large private enterprises are now making great efforts for the reforestation of the land.

No State has greater water boundary lines proportioned to area, transport naturally is great by that means. Rail facilities are abundant, lines having sought the heavy tonnage of the recently developed industry. Railroad lines mileage 1921, was 8,734, and the great Sault Ste. Marie Ship Canal, between Lakes Huron and Superior, accommodates more tonnage than the Suez Canal or any other like canal. The 1920 census assigned it 68,235,564 tons, valued at \$914,513,944, of which much is iron ore from Minnesota and copper from Michigan, vast supplies of grains, flour and timber, and coal and supplies for the Northwest.

Michigan is the automobile centre of the world, about two-thirds of the 2,000,000 cars produced annually being made there. There are 68 motor car factories turning out more than 1,000,000 a year, chief of which are the works of Henry Ford at Detroit, which, according to degree of production at the moment make up to 1,500,000 a year, besides farm tractors at Dearborn, nearby, and steel and other mills operated by the Fords. Besides the Ford cheap car, Detroit makes some of the finest built in the world.

There are 8,000 manufacturing establishments, capitalized at more than \$2,500,000,000, which represents an increase of 73 per cent. in five years, paying wages of about \$800,000,000 a year, using materials worth \$2,000,000,000 and employing about 500,000 persons normally. Fifty makers of automobiles, bodies and parts in the State do an annual business of above \$1,000,000.

Michigan leads all other States in output of chemicals, drugs, engines, threshing machines, furniture and refrigerators. Fourteen copper, brass and bronze manufacturers exceed \$1,000,000 of annual output. Stove-making is as great as in any State, and there are many other factories, there being 460 concerns that output more than \$1,000,000 annually. Michigan cuts close to a billion feet of lumber.

Production of iron ore was valued in 1919 as \$60,906,692; copper, \$34,476,336; coal, 1,400,000 tons was produced in 1920 and of salt, 2,000,000 tons.

Agriculture adds annually, Census of 1920, \$404,347,810 for all crops, potato production the third largest with a \$32,000,000 crop. Sugar beet output is heavy, and all temperate zone crops are raised. In shipbuilding it ranks seventh among the States. Fisheries catch annually 60,000,000 pounds.

There are more than 6,000 smaller lakes, where fishing and summer sports attract many. Apple production is fourth highest, and the State claims

leadership in small fruits. Corn yields about \$50,000,000.

Educationally, Michigan has its great State University at Ann Arbor, which was first to admit women matriculates, the oldest agricultural college in the country, many normal schools, and a public school system that enrolls 670,000; it has a literacy percentage of 3: native white, 7-10ths of 1 per cent., and foreign-born, 9.9.

Detroit, by the Census of 1920, had 993,739, showing an increase of 57,978—113 per cent.—in the decade, and is now (1922) in the million population class. It has a large percentage of foreigners, being the second in Polish of the country.

Beautifully situate along many waterways, it bids successfully for metropolitan repute and constantly attracts newcomers from home and abroad. In summer time, the Mackinac Islands, Belle Island, Ausable and St. Mary's River are popular resorts.

### MINNESOTA.

Area, square miles.....34,683.....11th in rank  
Population, 1920.....2,387,125.....17th in rank

Minnesota, of the West North Central, on the Canadian border line, is bounded on the north by Manitoba, Canada, on the east by Lake Superior and Wisconsin, on the south by Iowa, and on the west by the Dakotas. The Mississippi River rises in Minnesota. It is a State of widely variant natural resources and rapidly developing wealth, in general a tableland of rolling, timbered, prairies excepting in the western parts, where timber is scarce, and of rugged character in the northeast, where immense deposits of ore, high-grade Bessemer prevailing, supply the steel concerns of Illinois, Pennsylvania and Ohio. Its climate is not excessively warm in summer, and is cold in winter time. There are about 10,000 lakes, many exceedingly beautiful, that abound in fish, and are the resort of pleasure-seekers from all parts of the Union in the summer.

Agriculturally, the State is rich, with \$506,020,233 as the value of all crops reported by the 1920 census; a billion feet of lumber cut, mostly white pine; 34,593,000 tons of iron ore, worth \$128,377,174, being 61 per cent. of the national production, shipped eastward by steamers on the Great Lakes; manufactures, \$1,218,129,735 worth of product in 6,125 establishments, capitalized at \$679,386,436, employing more than 147,678 persons, and using materials worth \$883,989,777. The flouring mills are the principal concerns, leading the United States and the world in annual volume of output, \$381,249,000.

Industry is considerably diversified, there being 65 lines, the annual output of each of which was reported by the 1920 census as more than \$1,000,000, including meat packing, \$146,361,000; butter, \$38,862,000; lumber, \$37,321,000; railway cars and repairs, \$35,351,000; linseed oil, \$33,238,000. Manufacture of machinery is now an important industry, Minneapolis and St. Paul the chief centres of all industry.

By adaptation, fruits have been made to thrive, until the crop is large of all kinds grown in the north temperate zone; while corn, in earlier years scarcely known, has by the same process been brought to high value, having won first prize in one national contest at the New Orleans Exposition. The 1920 census reported the crop at 118,000,000 bushels, wheat, once the chief crop, 37,710,000; oats, 90,000,000; with generous yields of all other cereals.

Twenty-five years ago, Minnesota ranked third in lumber output, but has fallen to eleventh place, although there remain an estimated 21,000,000,000 feet of spruce in the forests, which is very valuable for paper woodpulp in these years of diminishing supply. 80 per cent. of the cut is white pine, which also is rapidly disappearing.

Railroad mileage, 1921, was 9,114. Minnesota has been especially fortunate in the heavy inflow of those European racial migrations from the northern countries whence come good farmers, Scandinavians in the majority, but with almost as many Germans; both nationalities settled in more or less clanish sections, but have helped to develop the State with great thrift and industry.

In literacy the State is among the lowest, only 1.8 per cent. being unable to read and write, against an average of 1 per cent. for the United States. The State claims one of the most efficient systems for popular education, with enrolment of about 550,000 in all institutions out of a population of 2,387,125. The University of Minnesota, upbuilt by its late President, Cyrus Northrop, has close to 10,000 students and ranks among the greatest of the country, with smaller colleges such as Hamline

University, St. Thomas, Macalester, Carleton, and a score of others scattered through the State, some supported by church denominations.

The grain trade control in Minneapolis is second only to that of the Chicago Board of Trade; and the water and rail shipping from and to Duluth, at the head of the Great Lakes, on Lake Superior's western end, is immense in ores, coal, cereals, and general freight. The Great Northern Railway Company maintains a fleet that traverses the lakes, and inflates shipments to and from all parts of the world via the lake route.

In the carrying of iron ores, the United States Steel Corporation, which owns mines and railways in the northern ore region, has developed a fleet of monster carriers and a system of prevention of waste time not excelled by any transport agency in the world.

### MISSOURI.

Area, square miles ..... 69,480 ..... 18th in rank  
Population, 1920 ..... 3,404,065 ..... 9th in rank

Missouri, a West North Central border State, is bounded on the north by Iowa, on the east by Illinois and Kentucky, on the south by Arkansas, and on the west by Oklahoma, Kansas and Nebraska. The Mississippi River skirts the entire eastern boundary line for 500 miles, and the Missouri River the northern half of the western line, cutting then through the State to confluence with the Mississippi at St. Louis. In all it has nearly 1,000 miles of navigable waterways.

Its topography is varied—upland table in the north and west, the Ozark Mountains in the centre and south, with low-lying river bottom areas in the extreme southeast. Its climate is a compromise between the north temperate and sub-tropical.

Economically, it partakes of the characteristics of both North and South. is strong agriculturally, timberwise, horticulturally, industrially and in education.

Manufactures exceed agriculture in value of products, reported by the 1920 census as more than \$900,000,000, all crops being valued at \$559,047,854. Manufactures rest chiefly on soil produce as raw materials, the list including meat packing, flour milling, machine-making and foundries, with very large production of boots and shoes, chemicals, tobacco products, paints and varnishes, corn-cob pipes, and lumber and timber products.

Industry centres in St. Louis, principal city, at the junction of the Mississippi and Missouri Rivers, and in Kansas City at the junction of the Kansas and Missouri Rivers on the western border, and is spreading rapidly into other parts, as well as increasing in volume.

Missouri is second in the production of zinc and lead, the value in 1919 being \$15,879,177.

Agriculturally, it is a great State. There is a total of about 38,500,000 acres in all, of which the 1920 census assigns to farms 34,774,000, with more than 24,000,000 improved. The corn crop was 182,000,000 bushels, wheat and oats together more than 76,000,000, tobacco, 3,700,000 pounds. The crop of cotton, mostly in the southeast, was 78,000 bales on 117,000 acres, far above the average per acre production.

In livestock the Missouri mule, which is facetiously said to have won the war, has always been used much locally and exported to all other States and foreign countries.

Railroad mileage, 1921, was 8,117.  
With 4.8 per cent. of Negro population, the average of illiteracy for the State is 3 per cent. for all classes: native white percentage, 2; and foreign-born, 9.6.

Although the native-born whites are 88.2 per cent., and foreign-born whites only 7, the influx of Germans in the revolutionary times of their native land in the last century left a large proportion of persons of that blood, especially in St. Louis, to this day, those now being practically all natives. They have been noted for thrift.

The schools enroll about 750,000 of a population of 3,404,065 by the 1920 census. The State University at Columbia, Washington University at St. Louis, twelve colleges and seven normal schools are the higher institutions.

St. Louis is the gateway for north and south travel as well as of freight traffic, and many tourists stop there en route. A feature is the famous bridge across the Mississippi, which is said to accommodate more freight cars than any other in the world. River traffic is immense, to and from New Orleans and intermediate points.

### MISSISSIPPI.

Area, square miles ..... 46,865 ..... 51st in rank  
Population, 1920 ..... 1,790,618 ..... 23d in rank

Mississippi, one of the States of the East South Central group, is bounded on the north by Tennessee, on the east by Alabama, on the south by Louisiana and the Gulf of Mexico, and on the west by Louisiana and Arkansas; the Mississippi River is the western boundary line. It is hilly but not rugged, and in general slopes downward to the great river and the Gulf shore. The climate and production are sub-tropical.

Agriculture is its chief interest. The 1920 census gave the value of all crops as \$336,267,156, corn and cotton the main production. It was the sixth cotton State, producing 885,000 bales worth \$173,820,000, with cottonseed by-products worth \$28,000,000. Other crops are rice, sugar cane, oats, wheat, hay, peanuts, potatoes, and every character of fruit grown in its zone. Apples, plums, pears, apricots, melons, strawberries, peaches, and grapes grow in the western parts, with oranges, lemons, figs and olives in the Gulf coast sections. Nuts are abundant.

Dairying and fishing yield generously.  
Manufacturing rests mostly on an agricultural basis for the utilization of the soil products of the State, the total value, Census of 1920, of industrial products being \$197,747,000 for 2,455 establishments, employing 64,452 persons, capitalized at \$154,117,000. Lumber and timber products lead with \$87,608,000; oil and cake from cottonseed yielding \$39,202,000. Cotton mills are not yet extensive.

The forest wealth is very great. Of the total of 33,000,000 acres, about 11,000,000 is forested, yellow pine chiefly. There is much of the fast disappearing hardwood.

Transport is supplied by the rail lines and by the Mississippi River, on which traffic, lessening in the recent era of rapid rail development, is growing again to great relative importance.

Railroad mileage, 1921, was 4,369.  
Vicksburg is the chief city, and was the theatre of the famous siege by Gen. Grant, Union commander, who took the city, in an action said by military authorities to have virtually settled the Civil War issue.

The old plantation life prevails as unchanged as in any Southern State, with spacious mansion houses and large estates, the homes of the old-time aristocracy of the age of the Southern cavalier.

The rate of illiteracy is high—17.2 per cent. on the average—owing to the large number of Negroes, who are 58.2 per cent. of the whole population. Native whites showed, Census of 1920, only 3.6 per cent. illiterate, but the Negroes 29.3. Rapid progress in popular education is being made, the illiteracy percentage in 1910 having been 22.4.

Public school enrolment is about 600,000, more than half of which is colored. A score of higher educational institutions are maintained, the University of Mississippi the leader, and there are several church colleges.

### MONTANA.

Area, square miles ..... 146,997 ..... 3d in rank  
Population, 1920 ..... 548,899 ..... 39th in rank

Montana, a mountain State, is bounded on the north by Canada, on the east by North and South Dakota, on the south by Wyoming and Idaho, and on the west by Idaho.

The Rocky Mountain range crosses the State in the west, with the Bitter Root range at the extreme western side, the country east of the Rockies sloping off into vast plains and smaller valleys between smaller hill elevations. Its rivers of note are the Missouri, up which crude boat navigation has passed for generations; the Yellowstone, Madison and Bitter Root. Of the 50,000,000 acres, the forests of about 30,000,000 acres are, with other areas, ranges for livestock grazing, which is important.

Mining, copper smelting and refining are the leading interests, producing two-thirds of the total industrial values reported in the 1920 census, \$195,624,000; value of all crops being \$69,975,000. The wool and sheep of the State ranking third, and cattle bringing in \$28,000,000, while dairy and poultry products added about \$38,000,000.

Irrigation, by Federal Government and private initiative, has been highly developed, resulting in the production of large quantities of the standard fruits, orchard and small, of the temperate zone, the State, although far north and high in elevation, being especially suited to that activity, largest development being in the Bitter Root, Missoula

and Flathead regions. Wheat, oats, flaxseed, barley, rye, corn, hay, potatoes and sugar beets are produced. Montana has a stumpage of more than 58,000,000,000 feet of timber, of which much is the increasingly valuable white pine; other kinds are larch, spruce, cedar, Douglas fir, white fir, lodge-pole pine, valuable for telegraph poles, hemlock and yellow pine.

The mineral resources are very great. The 1920 census gave \$77,032,000 as the value of coal and metals, excluding manganese, the latter being necessary in all modern steel-making processes. The wide fluctuations of copper, lead and zinc prices in the past few years have rendered the annual mineral output value exceedingly variable. The output value reported in 1920 was not much more than half that of the previous year.

The State produces the third largest amount of copper, and coal underlies about 20 per cent. of the whole State area. All of the metals and minerals are found in vast abundance, large fortunes having been made by organized mineral industry. Montana smelters utilize ore running so low as slightly under 2 per cent. of actual copper, so highly organized are the appliances.

The State leads in silver output (1921, \$9,677,020), is second in zinc, eighth in lead, sixth in gold (1921, \$1,725,600), and first in semi-precious stones. Considerable oil is produced, and valuable process minerals are graphite, gypsum and tungsten.

A million potential horsepower is available in the waters, of which almost one-third has been developed. Immense reservoirs have been constructed on the Madison and Missouri Rivers to give dependable water supplies.

Railroad mileage, 1921, was 5,072.

Montana is low in illiteracy—2.3 per cent.—that of native whites being only 3-10ths of 1 per cent. Public school enrolment, 1920 census, was 122,000, of a population of 548,000, and there are four well-equipped colleges and normal schools.

Scenically, Montana is not surpassed. Its lofty mountains are rugged and picturesque, and travel by rail or automobile takes one through beautiful and grand places. Glacier National Park, on the line between the United States and Canada, is one of the most wonderful public preserves in the world. Granite Peak, 12,834 feet high, is the highest of many very high elevations.

## NEBRASKA

Area, square miles.....77,620.....15th in rank  
Population, 1920.....1,296,370.....31st in rank

Nebraska, a West North Central State, is bounded on the north by South Dakota and Iowa, on the east by Iowa and Missouri, on the south by Kansas and Colorado, and on the west by Colorado and Wyoming.

Typical of the American western plains States, its lands a vast inclined plane, sloping off eastward to the Missouri River bottoms. No point rises more than 5,300 feet above sea level, while the average elevation is about 2,000. Its climate is typically north temperate, its products likewise, including almost every species appropriate to that latitude. In the east, rainfall is sufficient for crops, with little irrigation. In the west, irrigation is resorted to, and grows in importance. The livestock industry is second to agriculture in primary wealth producing, Nebraska supplying very much of the Nation's meat, and packing a large portion of it in the stockyards at Omaha.

Of the 55,000,000 acres in the State, 42,338,000 are included by the census in farm lands, with 24,587,000 improved. The corn crop was 184,000,000 bushels, fourth in rank; wheat, 60,000,000, ranking third, and large quantities of oats, barley, rye, potatoes, buckwheat, flax, cloverseed and sorghum syrup, and sugar beets to some extent. Fruit raising is not extensive.

Nebraska is not rich in mineral wealth. In the west, potash lies in considerable quantity in solvent form in several lakes, from which in the war about 61,000 tons, 45 per cent. of the relatively low United States production, was taken.

Manufactures relate chiefly to the utilization of soil products. The 1920 census gave 2,844 as number of establishments, employing 40,076, and \$596,041,000 as the value of the entire products, of which meat packing led with \$303,849,000. Manufacture centre in Omaha, which also is one of the greatest rail traffic centres of the United States, being the true eastern terminus of the Union Pacific system.

Railroad mileage, 1921, was 6,166.

With the University of Nebraska at the head, there are 16 colleges and normal schools, liberally attended.

Percentage of illiteracy is exceedingly low at 1.4,

that of native white being 4-10ths of 1 per cent., although the percentage of foreign-born whites is 14.8. More than 300,000 attend the public schools of a population of 1,300,000

## NEVADA

Area, square miles.....110,690.....6th in rank  
Population, 1920.....77,407.....49th in rank

Nevada, least populous of all States, less even than the District of Columbia, is of the Mountain group in Western United States, bounded on the north by Oregon and Idaho, on the east by Utah and Arizona, on the south and west by California.

It is mountainous, and minerals yield \$48,528,000. Census of 1920, against \$13,980,000 as the value of all crops. Much of the land is arid or semi-arid, and irrigation is developing to large importance. The Federal Government has a project to reclaim 160,000 acres, which when complete will add not less than \$20,000,000 to the annual crops. Agriculture is not varied, owing hitherto to lack of water, but as irrigation advances, diversification of products proceeds. Live stock interests are relatively large.

With only 77,407 persons indicated by the Census of 1920, there are 2,357,000 acres in farm areas, with 595,000 improved.

Mineral resources are varied—gold (1921, \$3,220,500); and silver, third in rank (1921, \$6,908,774) leading. Copper, lead, zinc, iron, quicksilver, tungsten, sulphur, graphite, borax, gypsum and quarry stones are produced also.

The forest area is more than 5,300,000 acres, of which 4,971,335 are set aside as national forests. Manufacturing output, Census of 1920, was about \$20,000,000.

Railroad mileage, 1921, was 2,160.

Illiteracy percentage was 5.9, of which native whites showed only 4-10 of 1 per cent. Schools for popular education are well provided, with about 15,000 enrolled.

Reno is known the world over as having been for years the Mecca of persons desiring divorces; but the laws of the Commonwealth recently have been made more stringent in their requirements.

## NEW HAMPSHIRE

Area, square miles.....9,341.....43d in rank  
Population, 1920.....443,083.....41st in rank

New Hampshire, the Granite State of New England, is bounded on the north by Canada, on the east by Maine and the Atlantic Ocean, on the south by Massachusetts, and on the west by Vermont, and was one of the original Thirteen States.

Its northern parts are rugged, reaching in the White Mountains the highest elevations of the Northeastern United States (Mount Washington, 6,293 feet). Toward the sea, it is more level and agricultural and industrial by utilization of river water power.

With less than half a million people, census of 1920, value of all crops was \$23,509,000, while the value of all industrial products was \$407,205,000,—cotton goods, \$85,986,000; boots and shoes, \$73,871,000; paper and wood pulp, \$41,826,000; woollens, \$31,245,000; with twenty other industries exceeding \$1,000,000 in annual output, lumber having \$14,992,000, worsteds, \$14,695,000.

The industrial production is highly diverse and employs all kinds of workers, from machine tenders to the most skilled.

Railroad mileage, 1921, was 1,252.

New Hampshire has in all 5,779,000 acres, of which in farm lands there are 1,441,111 cultivated. Hay is the chief crop, followed by corn, potatoes, oats, and apples, with relatively large dairy output, milk being shipped to the New York market.

The State has 4.4 per cent. of illiterates; native white having 7-10 per cent., and foreign-born, 15.4. Public school enrolment was 70,000. Dartmouth College at Hanover is the leading educational institution, from which many eminent men have come, among them Daniel Webster. There are four other higher institutions.

The White Mountains are par excellence a summer resort for persons from all parts of the United States. A modern system of automobile highways is maintained, ribbing the mountains.

## NEW JERSEY

Area, square miles.....8,224.....45th in rank  
Population, 1920.....3,156,900.....10th in rank

New Jersey was of the Original Thirteen States, and is in the Middle Atlantic region, bounded on

the north by New York and Pennsylvania, on the east by the Atlantic Ocean and New York, on the south by the Atlantic and Delaware Bay and on the western side by Pennsylvania. It is mostly low and flat, having hilly development in the northern end, where an extensive State park has been set aside.

New Jersey has extensive water navigation facilities, with Delaware Bay, and the Delaware River along most of its western side, the Atlantic on the east, and the valuable facilities of New York City's harbor and branches on the northeast.

Railroad mileage, 1921, was 2,362.

The State grades sixth in industrial strength, production being exceedingly varied, and, although the greater part is in Newark, it is well diffused in all parts. As a consequence, railway facilities are highly developed, and especially in the northern parts the electric railway lines are unusually extensive.

Economically and to a degree politically, New Jersey and New York City have common interests. Very many New Jersey people or transact business in the greater city, transit facilities being arranged so that access to New York is as facile as to any other part of the city by means of the Hudson and Manhattan tubes.

The output, Census of 1920, of the industries was valued at \$2,990,939,000. The 306 silk mills employed 25,046 persons, and output \$120,075,000. Oil refining leads all industries, with \$228,120,000, followed by explosives, \$197,074,000, chemicals, \$189,117,000; machinery, \$140,119,000; shipbuilding, \$123,884,000; woollens and worsteds, \$118,635,000; rubber goods, \$95,410,000; wire and wire cloth, \$93,350,000; with large productions of pig iron and steel and iron, \$3,425,000; cigars and tobaccos, \$55,470,000; leather, \$44,552,000, and numerous others which employ most varied operators, skilled and unskilled.

Its agriculture is affected most vitally by the proximity of the immense markets of the greater city and the fact that 78.7 per cent. of the population is urban. Market gardening has advanced to large magnitude, very many foreigners, especially Italians, having gone out to work in that line. The 1920 census gave \$37,494,000 as the value of all crops. The total land area of the State is 5,779,840 acres, with 1,441,000 cultivated. Corn, wheat, oats, potatoes of both kinds, rye, buckwheat, and hay are the chief crops. Fruits are extensively grown, the cranberry marshes supplying about one quart for each of the population of New York City, and the same of strawberries. The peach and apple crops are always important. The dairy output was reported at \$19,198,000.

New Jersey produces minerals abundantly—iron ore, and about one-fourth of the Nation's supply of the important magnetite, zinc and much clay products.

The educational institutions are important; Princeton University at Princeton is one of the country's foremost colleges, of which former President Wilson was President. Rutgers College, New Brunswick, is well known, and there are five other colleges of prominence. More than 700,000 are enrolled in the schools, the percentage of illiteracy being, Census of 1920, 5.1: native white, 6-10 of 1 per cent.; foreign-born, 15.3. In Passaic, Bergen, Union and Middlesex Counties the percentage of foreign-born is from 25 to 35 per cent.

Atlantic City, three-fourths of the way down the eastern coast, is one of the great seashore resorts in the country, and Cape May, the southernmost tip, another. Summer homes are maintained by city folk in many parts.

## NEW MEXICO.

Area, square miles.....192,634.....4th in rank  
Population, 1920.....360,350.....44th in rank

New Mexico, of the Mountain (southeast) group is bounded on the north by Colorado, on the east by Texas, on the south by Texas and Mexico, and on the west by Arizona. The Rocky Mountain range marks the north and centre; the eastern parts are of the flatter tableland of which Texas forms also a part, and in the south are bare, sterile, desolate peaks surrounded by arid and semi-arid plains and deserts, of which the mirage is an interesting phenomenon. The central western portion has drainage by the Rio Grande River, and the Pecos River flows through the eastern districts, both toward the south.

The climate is dry, stimulating, with mean annual rainfall of from 12 to 16 inches in different localities, and with 100 degrees of heat infrequent in summer, the mean for the year being about 50.

The population of 360,000 produces agriculturally, Census of 1920, \$40,619,000; from mineral industries, about \$45,000,000; about \$20,000,000 of manufactures, and heavily of live stock products.

A unique feature of tillage is the production from dry farming, a modern scientific process, causing otherwise dry, almost arid lands to yield. There are more than 945,000 acres included in irrigation projects, with 550,000 actually under water. The 29,845 farms averaged 840 acres, and the chief crops are hay, corn, wheat, oats, barley, rye, kafir, milo, all the vegetables, potatoes, cotton with 5,000 bales production, broom corn, sugar beets, the fruit industry being extensive.

Railroad mileage, 1921, was 2,372.

New Mexico partakes of the oldtime life of the West so far as does any other State, but is practically of the new day, with all civilized agencies at hand, even the cowboy passing rapidly away as modern devices multiply.

The population is 21,181 Indian on Government reservations (4,697,224 acres in 1920 with a valuation of \$21,916,965, and income of \$2,196,417), 13,414 of Mexican parentage, of a total of 360,350.

Many go to the State for wintering, and artists have lately resorted there for the painting of Indian and old Spanish types, and the things that remain from the aged Aztec civilization. Albuquerque, Santa Fe, Las Vegas and other cities are popularly sought by the tourists and artists and writers, who are provided with excellent travel facilities by the several standard rail lines.

Students and deep interest in the history of the areas which once were the bed of a great inland salt sea, in which were deposited all the basic salts found in the ocean waters, and which are expected to yield later rich mineral wealth for fertilization of lands and chemical uses.

## NEW YORK.

Area, square miles.....49,804.....89th in rank  
Population, 1920.....10,886,277.....1st in rank

New York, the Empire State, since 1820 the most populous in the Union, is bounded on the north and west by Lake Erie, Ontario, Canada, Lake Ontario and Quebec, Canada; on the east by Vermont, Massachusetts and Connecticut; and on the south by the Atlantic Ocean, New Jersey and Pennsylvania. Its sea front consists of the southern shores of Long Island, Staten Island, and the entrance into New York Harbor, one of the greatest in the world, and the chief port of the United States, into and out from which moves the greater part of the national commerce, foreign and domestic, passenger and freight. Long Island Sound, a wide arm of the Atlantic, which separates Long Island from Connecticut on the north, is navigable for deep sea craft. The Hudson River carries heavy ship tonnage northward from New York Harbor 160 miles to Albany, the capital, and Troy. Large steamers and sailing craft also ply the two Great Lakes, and the St. Lawrence River, which forms part of the northwestern boundary. On the northern part of the eastern boundary line is Lake Champlain, 100 miles long, a historic waterway bearing much commerce and making into the St. Lawrence River at Sorel. New York Harbor also includes the shores of New Jersey, enabling traffic intercourse between the two States.

New York has about 800 miles of navigable ocean, lake and river waterways, the State being penetrated by the New York State Barge Canal (Erie), through which there is capacity for the passage annually of 20,000,000 tons of freight. The canal also connects with Lake Champlain, so that inland tonnage may move between New York City, Buffalo, about 500 miles northwestward on Lake Erie; Oswego, on Lake Ontario, the ports on Lake Champlain northward so far as Rouse's Point at the Canadian border, and on into the St. Lawrence River; besides to several interior New York State points on other minor canal routes.

The Adirondack Mountains (first land to appear in the western world) occupy the northeast part of the State, and are dotted with beautiful lakes and rivers. In the east the Catskill Mountains, made famous by Washington Irving's story of "Rip van Winkle," line the western bank of the Hudson. Just above New York City the topography of the Hudson's banks takes the form of lofty rock falls, beautifully conformed and colored, and on the edge of which is a spacious Interstate Park set aside by the States of New York and New Jersey. All of New York is marked with scores of lakes and smaller rivers navigable for pleasure craft. The drainage from the crest west from Utica is in three directions—southeastward into the Atlantic Ocean; northward into Lake Ontario at Oswego, and south-

ward into the rivers that make through Pennsylvania. The east slopes of the Adirondacks drain into Lake Champlain.

The 49,204 square miles of area, equivalent to 27,490,560 acres, contains 1,550 square miles, or 992,000 acres, of inland waterways, leaving a net land surface of 47,654 square miles, or 26,498,560 acres. The chief economic interests are the national and international financial community of New York City, the foreign commerce in New York Harbor, now the heaviest in the world; the large manufacturing, and the rich agricultural resources.

The 1920 census gave \$417,046,864 as the value of all farm crops, to which the greater part of the 17.3 per cent. of rural population gave direct or contributory attention. Only California exceeded New York in production of hay and grapes, New York's grapes being from 30,677,555 vines, and the hay weighing 928,874 tons, Kansas coming next.

Literally everything characteristic of the temperate zone is produced in fruits, vegetables, grains and forage crops. New York led all States with 2,778,761 pear trees of bearing age, Michigan being next. In apple trees of bearing age, New York led the country, although Washington, with less trees, harvested more bushels. In acreage of small fruits, New York was second only to Michigan; and only California had larger acreage devoted to vegetables produced for sale. The State was second to Vermont in output of maple sugar, and led all the States excepting Maine in production of potatoes, Minnesota coming third.

Only Pennsylvania led New York in quantity of buckwheat grown; in wool New York with Pennsylvania led all Northeastern States. In the value of dairy products, New York was easily second in the country, with \$756,045,942. Wisconsin leading, with \$858,258,521; while in value of livestock products of farms, New York led the United States, with \$225,465,730, Wisconsin following with \$213,022,023. In pure-bred sheep on farms, New York was surpassed by only seven States, while in pure-bred cattle New York was second only to Iowa.

In the number of domestic animals of all kinds on farms, New York led the United States, was far down the list in poultry, and was fifth in amount expended for farm labor. The State was sixth in number of farms mortgaged, and in total amount for which mortgages were given, and these things were developed on a total farmland area which classes the State as nineteenth in the country.

It was at Binghamton the first Farm Bureau was organized, which has grown into the American Farm Bureau Federation, a national organization with more than 1,000,000 members.

Mineral resources are considerable, but in rank the State is below many others. Some iron ore (1919, \$5,264,443) is mined in the Lake Champlain region; petroleum (1919, \$9,900,894) is produced near the Pennsylvania border, also natural gas. Graphite is produced, also the baser minerals for building and manufacturing purposes. The output of salt in Onondaga County, fringing Lake Ontario (annually 10,000,000 barrels) is a large industry.

In manufacturing, commerce and finance, the figures are very large. More than one-half the export and import shipments of the United States pass through the Port of New York, to organize which into an economic and non-wasteful commercial agency the sovereign State of New York has created the Port of New York Authority, to work co-ordinately with a similar body created by the sovereign State of New Jersey, to the end that commerce flow be more facile.

The number of vessels entering New York port in the fiscal year ending June 30, 1922, was 5,201, of a tonnage of 18,450,808; clearing for other ports 5,280 vessels, tonnage, 9,470,642.

Railroad mileage, 1922, was 8,390.

The commerce flowing through the New York State Barge Canals, and through the ports of Buffalo and Oswego, runs into the millions of tons, and includes very heavy haulage of grains grown in the Middle West, destined for European ports.

The value of the total manufactured products in the State according to the Census of 1919 was \$8,867,004,906, and comprehends almost everything fabricated in modern industry.

Total resources of all financial and banking institutions, State and national, those subject to supervision by State and Federal authorities, exceed \$13,000,000,000. Especially since the World War, New York financial lines criss-cross the earth. The Federal Reserve Bank of New York City transacts about one-third of the total business done by the Federal Reserve System of the United States.

Population figures of the 1920 census of New York State show the presence of large representation of every civilized people on the globe, divided: 65.8 per cent. of native parentage; 13.9 of foreign parent-

age; 8.1 of mixed parentage, and 11.2 of foreign-born. About fifteen times as many Jews as are in Palestine live in the State, and almost as many Italians as in Rome, Germans numbered 295,650, and Irish 284,747, with 135,305 English.

The percentage of illiteracy was reported at 5.1: native white,  $\frac{1}{2}$  of 1 per cent.; foreign-born, 14.2; Negroes, who have increased rapidly since the late war, 2.9 per cent.

Nearly 2,000,000 attend the educational institutions, primary and higher, under control of the Board of Regents of the University of the State of New York (which see), and some of the most famous colleges and universities in the country are in New York State, among them Columbia University, which matriculates more than 20,000; the New York University, the College of the City of New York, Cornell University, Syracuse University, the University of Rochester, Hamilton College, Union University, Colgate University, Buffalo University, St. Lawrence University, Hobart College, College of St. Francis, Fordham University, Rensselaer Polytechnic Institute, and scores of special schools which are suited to every requirement in letters, science, engineering, finance, economics, sociology and art. Of the latter there are many of acknowledged merit, New York City being one of the art centres of the world.

At West Point, on the Hudson above New York, is the Military Academy of the United States Army, in a location famed for beauty.

The interests of the Empire State are so varied along other lines that no listing is attempted here. More than 200,000 transient travellers enter the greater city daily, so it is estimated; and to Niagara Falls, near Buffalo, more than 1,000,000 go each year. The Adirondacks and the Catskills have each summer hundreds of thousands of tourists and campers, the other lakes their tens of thousands. Safe waters on Long Island Sound are used by many yacht clubs, and the ocean beaches daily have large throngs.

Were the population of the City of New York subtracted from that of the entire State, as shown in the 1920 census, there would remain a total "up-State" population greater than the entire population of any other State except Pennsylvania, Ohio and Illinois, with their large cities included in their total. New York City, within its political boundaries, ranks next to London in population; but the metropolitan district of New York City had in 1920 about 165,000 more persons than the London district of the same character as to population grouping. (See pages 452 et seq. for detailed statistics.)

## NORTH CAROLINA.

Area, square miles.....63,426.....27th in rank  
Population, 1920.....2,559,123.....14th in rank

North Carolina, a South Atlantic State, of the Old South group, is bounded on the north by Virginia, on the east by the Atlantic Ocean, on the south by the Atlantic and South Carolina, and on the west by Tennessee. Physically, it is divisible into three distinct parts—a sloping sandy coastal plain from the low-lying 300-mile sea line on the east, a tableland in the central portion, and a mountainous western one-third running into the Appalachian range, Mt. Mitchell, 6,711 ft., the maximum.

The climate grades from sub-tropical in the east, to milder on the tableland, and relatively cool and stimulating in the mountains.

There are many islands off the northern half of the coastline, with Pamlico Sound and its tortuous shores affording many inlets and potential harbors, a favorite resort for hunters. Cape Hatteras, the easternmost point, is feared by mariners as especially stormy and dangerous.

The Census of 1920 gave \$943,808,000 as the value of manufactures, cotton goods leading with \$518,368,000, (exceeded only by Massachusetts and South Carolina,) others being tobacco, cigars and cigarettes, \$226,636,000; lumber and timber products, \$54,928,000; cottonseed oil cake, \$46,995,000; chewing and smoking tobacco, \$33,188,000; knit goods, \$29,834,000; furniture, \$29,725,000; fertilizers, \$27,551,000 and 30 others from \$24,000,000 down to slightly more than \$1,000,000. Including in part flour, car building, machinery, vehicles, medicines, clay products, silk goods, in a total of 5,999 establishments employing 75,493 persons, capitalized at \$669,000,000, and using materials valued at \$526,906,000.

Agriculture's principal crops, Census of 1920, were valued at \$503,228,000, cotton at 875,000 bales, ranking the State sixth.

North Carolina is the second tobacco State, producing 310,240,000 pounds, corn, wheat, rye, potatoes and peanuts, 4,756,000 pounds, are large crops.

with all others raised suitable to the zone, fruits as well, grapes being especially plentiful.

In minerals, the State is rich, ranking first in production of mica, there being much magnetic iron ore, and some lead, zinc, copper, gold, silver, cerium, tin, feldspar, talc and graphite. A valuable contribution is monazite and zircon, used in making incandescent lamp mantles.

Of the 35,000,000 acres in the State, originally about 11,000,000 were forested, chiefly with yellow pine, of which it is estimated that 15,000,000,000 feet remain on about half a million acres. The annual lumber cut is about 1,200,000,000 feet, the market being largely in the North, considerable coming to New York coastwise in vessels.

Railroad mileage, 1921, was 5,522.

The Negro constitutes 31.6 per cent. of the population, Census of 1920, and the State percentage of illiteracy is 13.1, having been 13.6 in 1910. Illiteracy of native whites is 6.8. Public school enrollment is 725,000, with compulsory instruction. The chief higher institutions are the State University, Chapel Hill, and the Agricultural College, West Raleigh. Much effort is expended by the latter to improve tillage methods, with increase of the per acre production as one result.

A striking feature has been the very large migration of residents of the mountains to the cotton mill towns, where they remain as operatives, whole families accepting employment, including children. The rapid increase of cotton mills has been in the past 20 years especially, causing large tonnage for rail and steamer. In addition to the export cotton, which leaves mostly from Wilmington.

Asheville is the chief resort, being popular in the winter, its golf course one of the most famous in the country. Country homes in the delightful mountain regions are also becoming more numerous, northerners going there.

### NORTH DAKOTA.

Area, square miles.....70,837.....18th in rank  
Population, 1920.....246,872.....36th in rank

North Dakota, in the West North Central group, formed of part of the original territory of Dakota, is bounded on the north by Canada, on the east by Minnesota, on the south by South Dakota, and on the west by Montana. It is drained in the southeastern one-third by the Missouri River, and in the northeast by the Red River, which stream is the line between North Dakota and Minnesota, and the valley of which, an old lake bed, is exceedingly fertile. "Number One Northern Hard" wheat originated there, and is a premium grade of that cereal. The surface in the eastern two-thirds is a vast rolling plain, once with scant rainfall, but now, since cultivation advanced westward, having precipitation enough for the large crops produced.

Agriculture is easily the chief interest, with the value of all crops reported in the 1920 census at \$301,782,000, against \$57,374,000 for all manufactured products, and that mostly of flour and other grain products consumed locally.

Every cereal and other crop known to the north temperate zone is produced, wheat being the principal crop, 61,540,000 bushels reported in the 1920 census, grown on about 9,000,000 acres, worth \$147,696,000; rye, barley and corn being also extensively produced, and the total value of all cereals given at \$215,764,000. Hay is raised heavily, more than 4,000,000 tons, worth \$56,000,000. On 650,000 acres, 2,972,000 bushels of flaxseed were raised, highest production in the country, value being \$13,000,000.

Much of the grain and practically all of the forage crops are for local feeding to livestock, that industry being very important. More than 2,300,000 domestic animals were reported by the 1920 census, with more than 40,000,000 acres of land for grazing in the State.

A vast proportion of the western part is underlain by brown or low-grade coal, which is produced not extensively and only for local domestic consumption, the State depending on the mines of other States for supply.

Railroad mileage, 1921, was 5,311.

North Dakota, with total population of 246,872, Census of 1920, had 131,590 or 27.1 per cent. of foreign-born whites. The percentage of illiteracy is very low at 2.1; native whites, 4-10ths of 1 per cent., foreign-born, white, 5.6. Foreign-born whites in order of numbers were Norwegian, Canadian, Russian and German.

North Dakota has been the theatre of several advanced social and economic experiments, the State, under the leadership of the Non-Partisan League, entering basic business enterprises including bank-

ing, against which some court decisions have militated.

The recreation for outsiders is the big hunting in the west and on the prairies for game birds, the prairie chicken predominant, and the lakes and rivers abounding in geese and ducks.

### OHIO.

Area, square miles.....41,040.....86th in rank  
Population, 1920.....5,759,394.....4th in rank

Ohio, an East North Central State, is bounded on the north by Michigan and Lake Erie, on the east by Pennsylvania and West Virginia, on the south by West Virginia and Kentucky, and on the west by Indiana. It has no considerable elevations, being highest in the centre, and sloping in each direction to the lake on the north and to the Ohio River, a great traffic route, on the southern boundary line. Its climate is characteristic of the north temperate zone, with abundant rainfall.

Ohio has navigable waterways for the 430 miles of the Ohio, the 230 miles of lake frontage, and 100 miles up the Muskingum River in the southeast. It sends much tonnage down the Ohio. Rail transport is very heavy in all directions. Railroad mileage, 1921, was 9,001.

Manufacturing, mining and oil are the chief interests. The value of all products exceeds \$2,250,000,000, from 16,000 establishments, employing more than 1,000,000 persons, and representing investment of about \$2,000,000,000. The iron and steel ore and reduction and machinery industries lead all others, with 29,649,245 tons of ore received at the Lake Erie port of Cleveland, heaviest handler of ore in the world. Cleveland, Youngstown, Canton, Steubenville and Middletown are the principal iron and steel working points. Manufacturing is very extensive in other lines. Of the 264 industries classified by the Federal Census, Ohio has considerable production in all but 46, ranking first in 18 of them.

Akron is the world's rubber centre, turning out in 1920 tires worth \$545,312,000. Fourteen rubber companies there employ 72,397 persons, 1920 census, and pay salaries totalling \$142,330,000. The product goes to every country on the globe, as does the machinery made in the State.

The State ranks fourth in mineral wealth extracted, 45,000,000 tons of bituminous having been lifted in 1920 by 50,000 miners who received more than \$48,000,000 in wages, Cleveland alone shipped also 22,900,000 tons of coal in 1920.

Oil production is very great, especially in the Lima district, the total value in 1919 being \$45,483,525.

The pottery interest used 1,811,000 tons of clay, and has developed large factory production.

The output of automobiles in the Toledo and Cleveland districts is second only to that of Detroit, mostly of medium or higher grades.

But the agricultural wealth also is great, value of all crops and livestock sold being as reported in the 1920 census \$904,400,000, which was exceeded by only four other States. Principal crops are cereals, hay, potatoes, tobacco, vegetables, sugar beets, and all products of the zone. Corn totalled 149,841,000 bushels, oats, 46,000,000; hay, 7,600,000 tons; tobacco, 64,420,000 pounds; and canning of fruits and vegetables was extensive, the fruits being those of the north temperate zone, the 1920 report showing the value of the output more than \$19,000,000.

Much high-bred livestock is raised, and the meat packing industry is highly developed.

Its mineral wealth includes coal, iron, glass sand, clays, salt, petroleum, natural gas, limestone, sandstone, gypsum, mineral waters, some potash and pyrite.

Standard railway and electric lines total 13,364 miles and include all companies operating in the Middle West.

Illiteracy is low at 2.8 per cent.; native white, 9-10ths of 1 per cent., foreign-born, 12.6, and Negro, 8.1. Foreign-born number 1,258,000, 5 per cent. of the population, and are in the industrial centres chiefly, although throughout the agricultural districts the German native-born element is numerous, having come when the revolutionary movement broke in Germany in the last century.

The State has very many institutions of higher education, the Ohio State University at Columbus, the capital, leading with 5,165 students, others being Cincinnati University, 3,006; Western Reserve University at Cleveland, 1,990; Ohio Wesleyan University at Delaware, 1,258; Oberlin at Oberlin, 1,178; and eight others with about 4,000 attendance. Public school enrollment is more than 1,900,000.

Ohio is distinguished among the States for the tenseness of its political life. It is regarded as a

politically pivotal State, and is the home of President Harding, whose newspaper is at Marion. It has given the United States five Presidents, all native born, while two others elected as residents of other States, were born in Ohio.

### OKLAHOMA.

Area, square miles. . . . . 70,057. . . . . 17th in rank  
Population, 1920. . . . . 2,028,333. . . . . 31st in rank

Oklahoma, in the West South Central group originally set apart for Indian reservations, and formerly known as Indian Territory, is bounded on the north by Kansas, on the east by Arkansas and Missouri, on the south by Texas, and on the west by Texas, a small panhandle strip to the northwest also touching New Mexico. It was the home of these Indian tribes—Cherokees, Creeks, Choctaws, Chickasaws and Seminoles, whose descendants remain as a large part of the present population, numbering 119,255 in 1920, holding 19,551,890 acres with a valuation of \$320,496,333 and an income of \$39,393,608.

Oklahoma is mostly a vast plain of rolling, fertile prairies, rising in the west to maximum elevations of 4,000 feet, one being 4,700 feet, with mountains in the south central and southwestern portions. It has a fair share of forested area, yellow pine predominating, with about 200,000,000 feet the normal annual cut, and 4,800,000,000 feet of timber standing. It has a healthful climate, rather warm in summer, with good precipitation for watering the large areas of agricultural lands, that with livestock and immense oil production being the main interests.

The 1920 census gave \$522,565,000 as the value of all crops, cotton, 1,006,242 bales ranking the State fourth; corn, 74,000,000 bushels; wheat 52,640,000; oats, 49,500,000; and heavy production of other cereals and the basic vegetables with all fruits of the temperate zone abundant.

Dry farming is practised extensively in the western portions, and production of cotton is close to half a bale to the acre, much higher than the average.

Including the refining of oil, Oklahoma's industrial output, Census of 1920, was valued at \$401,363,000. Refining led with \$150,673,000, furs coming next with \$40,844,000. Industry comprehends smelting and refining zinc, the product being \$19,518,000, oil cake making, \$18,907,000, foundry and machine shop output, \$13,510,000; and 25 other lines with more than \$500,000 annual output.

The number of establishments was 2,445, employing 38,314 persons, with more than \$250,000,000 capital.

It is only 18 years since oil was discovered in Oklahoma, yet it has risen to the first rank as a producer. The 1920 figures on production were 105,725,000 barrels. Much of the oil land is owned by persons formerly in moderate circumstances. Indians among them, suddenly made rich by royalties on oil lifted on their lands leased to operating companies. The oil measures are of a kind with those of Texas, at to geological character and abundance, there being considerable litigation between the two States as to title to certain very valuable oil territory.

Railroad mileage, 1921, was 6,572.

The percentage of illiteracy is 3.3; native whites 2.3; Negroes, 12.4; and foreign-born whites, 14; Negroes being about 10 per cent. of the whole.

The public school enrolment is about 600,000 with several promising higher institutions with large attendance.

Apart from the romance of the Indian days and the cowboy, Oklahoma went into history as the theatre of the most exciting "Sooner" rush for new land ever staged in the United States, when more than 25 years ago the Federal Government, after taking large areas from the Indians by treaty, threw them open for settlement, and thousands camped on the boundary line for weeks, rushing across the border when the moment came for admission. The settlement and development into an organized community were remarkably rapid, until now the State has all that appertains to modern life.

### OREGON.

Area, square miles. . . . . 98,699. . . . . 9th in rank  
Population, 1920. . . . . 788,389. . . . . 34th in rank

Oregon, of the Pacific (northwest) group, is bounded on the north by Washington, on the east by Idaho, on the south by California and Nevada and on the west by the Pacific Ocean.

It has every character of climate and soil and production known to the temperate zone, the lands

ranging from the heavily vegetated coast areas where rainfall is abundant, to the large stretches of semi-arid lands of the southeastern parts, with a touch here and there of almost desert, although negligible in extent.

The coast climate is salutary, never very cold, and seldom very hot. That of the eastern portion, east from the Cascade Mountains, is drier and often colder.

It has very important navigation facilities—the Columbia River flowing into the Pacific with a width at the mouth of up to 14 miles the river carrying tonnage along the whole of the 400 miles of its seaward course from the Idaho line and the Snake, running along the northern half of the eastern boundary, already conveying much traffic and being susceptible of greater development.

Into Oregon pour the products of "The Inland Empire," a region comprising 250,000 square miles in Eastern Oregon, Eastern Washington, and Northern Idaho, the Columbia being the waterway outlet, and the railways following the water grades from the Empire through the Columbia River Gorge to Portland, the "Rose City," which is actually on the Willamette River, one mile from the Columbia, but economically on the Columbia. Portland has very heavy foreign commerce.

The products of that Inland Empire are most varied, as are those of Oregon which are very large fruit production, immense salmon fisheries, most extensive cereal production, and timber from forests that are the most extensive of any American State, it being estimated that the standing timber is 500,000,000,000 board feet.

The part of Oregon west from the Cascade Mountain range, which has peak elevations up to 12,000 feet, is slashed north and south by the Coast Range, a very aged ridge now eroded to lower levels. The whole of the western one-third of the State has abundant rainfall, although not so much nor so constantly as many believe, the average precipitation at Portland being about that of Chicago or New York. There are such forests as may be found in few parts of the world, immense numbers of trees attaining 20 feet in diameter, while there are vast stretches in which the lumbermen have taken only trees not less than eight feet in diameter, and regarded it as cut-over land. The chief varieties are Douglas and white fir, spruce, hemlock, cedar, and larch, west of the Cascades, with yellow pine in the eastern Blue Mountains, another range. Oregon has almost one-half the more than one trillion feet of timber standing in the three Coast States, Oregon, Washington, and California. Some of the trees are more than 300 feet high. In the southwest are found forests of the redwoods, with at least 20 other varieties of timber in abundance, some of it excellent for furniture manufacture, which is a considerable industry. The cut of timber is the third in the United States, Washington and Louisiana exceeding. The lumber is shipped to all foreign lumber-buying lands, more than a billion feet comes by the Panama Canal to the Atlantic Coast, and much is distributed by rail to the Middle West.

The fruit industry is among the most important in the country. Especially in apples the world calls for Oregon products, and the varieties of fruit grown include also peaches, pears, prunes, and all the small kinds. Hood River, Medford, The Dalles and other towns are the centres of highly developed fruit raising.

In agriculture, development has been rapid, there being about 1,000,000 acres under water, and more than 2,000,000 included in irrigation projects, Federal and private. The lands not needing irrigation, which are very extensive, produce clover. The 1920 census assigned \$131,884,000 as the value of all crops; wheat, about 24,000,000 bushels, more than 2,100,000 tons of alfalfa; hops, 4,788,000 pounds; and more than 8,000,000 bushels of oats.

In livestock the State is productive. The wool clip was 16,000,000 pounds, and \$17,000,000 was realized from dairy products. The Coast States are especially fine for dairying.

Although undeveloped as yet, there are all the basic minerals in Oregon. Gold, silver and copper are mined, with also stores of lead, oil, quicksilver, chrome iron ore, platinum, and all the clays.

The value of the products of manufactures in the 1920 census was \$366,783,000, lumber leading with \$85,348,000, flour following with \$42,550,000, other industries being shipbuilding, meat packing, canning, there being 20 others with more than \$1,000,000 annual output.

The salmon fisheries centring in Astoria, at the mouth of the Columbia, are among the world's third greatest, the pack in 1920 being 481,645 cases.

Railroad mileage, 1921, was 3,305.

In literacy Oregon ranks with Iowa and Idaho as the highest in the country, the percentage being 1.5, that of native-born 4-10ths of 1 per cent. There are several colleges, the State University at Eugene, the celebrated Agricultural College at Corvallis, Reed Institute at Portland, and others.

The coast resorts are much patronized, and Portland, with mild climate, is also the summer home of many from surrounding regions.

Oregon initiated the national movement for direct primaries, the initiative and referendum, and the recall, and adopted Prohibition independently of the national amendment.

Its great Columbia Highway, unexcelled for scenic beauty, running up the river from Portland; Mt. Hood and other lofty mountains, and the unique Crater Lake, are points of tourist interest.

Each October, a great cowboy roundup is held at Pendleton, Eastern Oregon, to which thousands of visitors go.

The mountains in all parts of the State are summer camping grounds. Klamath River in Southern Oregon is said to yield the largest trout in the world; and half a dozen Indian reservations are favorite resorts of tourists, writers and artists.

## PENNSYLVANIA.

Area, square miles . . . . . 46,186 . . . . . 32d in rank  
Population, 1920 . . . . . 8,720,017 . . . . . 2d in rank

Pennsylvania, of the Middle Atlantic group, is bounded on the north by Lake Erie and New York, on the east by New York and New Jersey, on the south by Delaware, Maryland and West Virginia, and on the west by Ohio and Lake Erie.

It is of varied topography, like most Atlantic States having level lands to the east, and rising to higher altitudes to the westward. The Appalachian range traverses the central part from northeast to southwest, a higher mountain region being in the extreme west, and another lower plane running down to the shores of Lake Erie. It has rivers important in navigation—the Ohio, the Susquehanna, the Delaware, the Allegheny and the Monongahela.

Viewed by and large, Pennsylvania may be said to lead all States in mineral and industrial production. Its mineral riches are very great. The 1920 census reported anthracite coal output at 86,200,000 tons; bituminous, 145,300,000 tons; worth together about \$900,000,000. The coke output alone was \$160,357,000. The natural wealth in iron ore, oil (value in 1919 \$66,271,961), once leading the United States, and the quarries is large.

The State has built its industries largely on these basic elements. It produced nearly half the steel of the country, supplying it to all parts of the world. Its production in pig iron in 1920 was 13,983,134 gross tons. Pittsburgh is the centre of the greatest metal production ever attained in one locality. Its supplies of iron ore come mostly from Minnesota, and its operations have made more millbals than any other single industrial centre in the country. It was there that the late Andrew Carnegie built up his fortune, developing new steel making processes. The perfected tonnage from Pittsburgh is the heaviest, excepting at New York and Chicago. Electrical goods and equipment is made in Pittsburgh in large quantity.

The State leads the Midwest States in cotton goods, is second in silk and wool goods, ranks first in leather output, glazed kid the most important. The census reports more than 20,000 industrial establishments, employing 1,523,000; paying \$1,864,000,000 in wages; \$312,000,000 in salaries; using \$5,075,000,000 of capital; and making more than \$8,500,000,000 of products.

The principal port is Philadelphia, which receives and sends to all world ports. It was the capital of the United States, 1790 to 1800. The great Baldwin Locomotive Works is located there, and also extensive electrical equipment manufacturing. Scranton is the greatest hard coal centre of the country, and makes much steel.

Erie on Lake Erie is the lake port.

Railroad mileage, 1921, was 11,550.

Pennsylvania produced, Census of 1920, more than \$500,000,000 of crops, the region around Reading, Lancaster and York, with English hames, is the seat of the famous German (Pennsylvania Dutch) agricultural development, not perhaps equalled in any other section of the United States.

Production is varied in all parts of the State, the cereals, forage crops, fruits, and all the temperate zone raises. The crops are spread evenly through the whole list, with large diversification and consequent steadiness of prosperity. Tobacco raised was 57,000,000 pounds, 1920 census,

In educational facilities the State ranks high. The principal higher educational institutions are the University of Pennsylvania at Philadelphia, the Pennsylvania State College, the University of Pittsburgh, and the Carnegie Institute of Technology at Pittsburgh, Lafayette College, Lehigh University at Bethlehem, Temple University, Bucknell University, Dickinson College, Allegheny College, Duquesne College, Grove City College, Pennsylvania College, and Swarthmore College, there being three colleges for women at Bryn Mawr, Pittsburgh and Chambersburg, Bryn Mawr having been distinguished especially.

Public school enrolment exceeds 1,600,000, and the rate of literacy is 4.6 per cent.; native white, 8-10 of 1 per cent.; foreign-born, 13.9; Negro, 6.1. Of the total of 8,720,017 persons, the native white population is 80.3 per cent.; foreign, 18.8. In the industrial districts reside the bulk of the foreigners, the census of 1920, showing in all 1,387,850, of which 120,194 were German, 90,666 Irish, 122,755 Austrian, 222,764 Italian, 161,124 Russian, 171,380 Hungarian, the Slavic strain being numerous. The urban population is 63.3 per cent.

In the past there have been bitter industrial conflicts, which happily have subsided to a large degree. The present era sees industry, mining and agriculture the three interests, with lumbering lately reduced to unimportance, although once a leading activity.

Under Gifford Pinchot, formerly Chief Forester of the United States, serving as State Forester for several years, a great reforestation movement has begun.

The Pennsylvania State Police, serving mostly the rural districts, have become an establishment of social import.

The mountains are popular for summer resorting, with many fine country seats developed by the wealthy from old farm estates.

## RHODE ISLAND.

Area, square miles . . . . . 1,248 . . . . . 45th in rank  
Population, 1920 . . . . . 804,397 . . . . . 36th in rank

Rhode Island, smallest of States, of the Original Thirteen, and in New England; is bounded on the north and east by Massachusetts, on the south by the Atlantic Ocean and on the west by Connecticut. Only 1,060 square miles of it is land. With 566.4 per square mile, it is the most densely populated State, exceeds all others in the per capita industrial output, it is 97.5 per cent. urban, and exerts influence out of all proportion to size and numbers.

The 1920 census gave these figures: Number of manufacturing establishments, 2,466, employing 156,012 persons, paying \$168,609,358 in wages and salaries, using \$415,989,203 of materials, and producing \$747,323,000 in all, or \$1,245 for each man, woman and child in the State; using \$594,337,448 of capital. It ranks fifth in the making of cotton textiles, third in woollens, sixth in silk, has a large list of other industrial activities, mostly calling for rather skilled operatives.

The first cotton spinning works of this country were established in Pawtucket in the eighteenth century, and since then Rhode Island has carried on large textile industry.

Jewelry, rubber goods, electrical equipment, hosiery, knit goods, and many other lines are produced. Providence, Woonsocket, and Pawtucket are the chief centres of industry.

Although so small in all ways, yet the agricultural output by the 2.5 per cent. of rural population, Census of 1920, was \$5,340,378, and included about everything produced in the temperate zone.

A large traffic coastwise and foreign passes through Providence, as well as heavy passenger travel, rail and water. Railroad mileage, 1921, was 211. Newport on Narragansett Bay, has been for decades the most famous of America's watering places. Palatial summer homes were built by the socially prominent of the past one or two generations, embellished by every art of architect and landscape gardener. A private bathing beach for the socially elect is a feature.

On the western side of Narragansett Bay, Narragansett Pier is a popular summer resort, with large hotels and broad beach.

The State enjoys extensive educational facilities, with Brown University and the State Normal School at Providence as the best known. Public school enrolment is 95,000.

The percentage of literacy is 6.5; native white, 7-10ths of 1 per cent.; foreign-born, 16.5. Foreign-born are 28.7 per cent. of the population, numbering 173,499—English, 25,782; Scotch, 22,253; Canadian, 36,400; Italian, 33,211.

**SOUTH CAROLINA.**

Area, square miles ..... 30,889 ..... 39th in rank  
Population, 1920 ..... 1,683,724 ..... 26th in rank

South Carolina, in the South Atlantic group, of the Original Thirteen States, is bounded on the north by North Carolina, on the southeast by the Atlantic Ocean, on the southwest by Georgia. Its topography is like that of North Carolina, mountainous, 4,000 feet the maximum, in the western part, a plateau in the central strip, and low-lying and sandy toward the 200-mile seacoast.

The climate westward is comparatively cool, in the central part medium, and nearer the coast sub-tropical and humid.

The coast is indented with several harbors, Charleston having the most important one, and being a prominent coastwise and foreign shipping port, cotton a principal outlet to Europe.

Agriculture easily leads in production, with \$437,121,000 as the value of all crops, Census of 1920; cotton with 2,631,718 bales ranking the State fifth. Of the 193,000 farms, Negroes cultivated more than half, and owned very many. The sea island cotton grown there is the finest grade produced in the country.

All of the cereals, peanuts, tobacco, in which it ranks fifth, sugar cane, and all the vegetables are produced in profusion. Fruits are abundant, of temperate zone and sub-tropical varieties.

Livestock of higher breeds is an increasingly valuable adjunct.

Naturally, about half the area was forested, yellow pine predominating, with much hardwood, but the lumbering has been so extensive that the forested area is reduced to about 1,000,000 acres, and the cut is diminishing rapidly. About 14,000,000 feet of pine remains standing.

In cotton mill spindles, 4,974,460, the State is second only to Massachusetts. Much of the labor in these mills is supplied by mountain families who were induced to migrate to the lower levels by the higher incomes offered; the industrial development having been peculiar to the Southern cotton-mill States in the building of towns owned entirely by the companies. Much child labor is employed.

Railroad mileage, 1921, was 3,814.

About 400,000 are enrolled in the public schools, 200,000 being colored, who form 55.2 per cent. of the population, the State percentage of illiteracy being 18.1, against 25.7 in 1910. That of native whites is 8.5, of foreign-born white, 6.2, and of Negro, 29.3.

The University of South Carolina at Columbia is the leading higher educational institution. Clemson Agricultural College being next. Clemson in 1908 opened the first textile school in the United States, which has achieved much in training technical mill workers and foremen.

**SOUTH DAKOTA.**

Area, square miles ..... 77,615 ..... 14th in rank  
Population, 1920 ..... 536,547 ..... 37th in rank

South Dakota, West North Central, lower portion of the former Territory of Dakota, is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Wyoming and Montana. Its climate is that of the temperate zone northern latitudes, cold in winter and pleasant in summer. Before cultivation of the soil was extensive, it lacked rainfall; but precipitation swept westward as tillage advanced, until it now has normally abundant watering.

Its highest elevations are in the Black Hills in the southwest, the remainder of the State being a vast rolling prairie, falling off to lower levels in the northeast, which drains into the Mississippi River and into the Red River of the North. The major part of the State is drained by the Missouri River, which crosses the State through the centre north and south. There are several minor drainage basins, feeding the larger rivers. With a succession of fertile valleys highly productive, and a fair area of forests, yellow pine, spruce, and others, 1,100,000 acres being under forest cover.

About 120,000 acres are irrigated, with about 200,000 acres normally in the irrigable sections.

It is claimed that more than 90 per cent. of the total area is arable. Of the 50,000,000 total acreage, 34,500,000 is in farmlands, with about 19,000,000 improved, farms numbering, Census of 1920, 74,564, crops being valued at \$321,202,000.

Corn leads with 91,200,000 bushels; wheat, 30,175,000; oats, 58,650,000; barley, 19,250,000, and

all the other cereals. Only the hardier fruits are grown.

The Census of 1920 shows livestock shipped valued at \$154,631,000, dairy, fruit, poultry and other things \$50,000,000; the total revenues from all sources of wealth produced being \$400,000,000, or about \$600 per capita.

Mineral wealth is practically all in the Black Hills, where gold mined ranks the State fourth (value in 1921, \$6,623,000). Silver, lead, and basic minerals also abound. There is coal in the northwestern parts, not yet accessible to transport.

Railroad mileage, 1921, was 4,276.

The 1920 census reports manufactures to be mostly of soil products, valued at \$62,420,000, and population 84 per cent. rural, 100,628 foreign-born of the total of 636,547, of which 16,000 were Norwegian, and 15,000 German.

Illiteracy is 1.7 per cent.; native white, 4-10ths of 1 per cent. About 100,000 attend the schools.

A feature is the large area in Indian reservations—the Rosebud, Cheyenne River, Pine Ridge, and the Lower Brule. The Indians numbered in 1920, 23,010; they engage in agriculture and livestock husbandry, occupy 6,685,734 acres, valued at \$63,265,900, and have an income of \$4,331,940.

**TENNESSEE.**

Area, square miles ..... 42,022 ..... 34th in rank  
Population, 1920 ..... 2,337,855 ..... 19th in rank

Tennessee, in the East South Central group, is bounded on the north by Kentucky and Virginia, on the east by North Carolina, on the south by Mississippi, Alabama, Georgia and North Carolina, and on the west by Arkansas and Missouri.

The eastern parts are in the Great Smoky Mountains, the surface sloping toward the west, first to an elevated tableland, then to the bottoms of the Mississippi River, which skirts the western border. It has the Tennessee River, which sweeps into Alabama from the northeast and returns to Tennessee at the northwest corner.

The forests cover about 30,000 square miles, and yield half a billion feet of lumber—oak, yellow pine, gum, yellow poplar, hemlock and chestnut.

The 1920 census showed \$318,285,000 as the value of all crops, which include all things grown in the temperate zone, shading off to the almost sub-tropical in the south. Eight other States exceed its 264,562 bales of cotton produced; its tobacco crop was 112,367,000 pounds, and all cereals and vegetables were grown.

Coal production was given at 6,026,000 tons; and there are stores of iron ore, 450,000 tons, with 830,000 tons of pig iron; copper, 15,629,454 pounds; zinc, oil; and manganese.

The census figures on industry show 4,589 manufacturing establishments, employing 113,360 persons, engaging \$410,203,000 of capital, and producing \$556,253,162 in all. The census analysis indicates a rather broad basis laid for future development of industry, the list revealing 56 lines with more than \$1,000,000 annual product. Flour leads with \$1,913,000, and cottonseed and lumber have their usually large proportions as in all Southern States; but considerable beginnings have been made in the manufacture of dyestuffs, leather tanning, iron and steel furnaces, woolen goods, vehicles, bedding, implements, and cotton goods, product of which was \$22,461,000.

Railroad mileage, 1921, was 4,078.

Tennessee is almost wholly American in population—foreign-born whites being 7-10ths of 1 per cent. Negroes are 19.3, and the percentage of illiteracy is 10.3 for the State; native white, 7.3; Negro, 22.4.

Attending school were 630,000 persons. The main higher educational institutions are the University of Chattanooga, University of Tennessee at Knoxville, Fisk University at Nashville, Vanderbilt University at Nashville, Cumberland University at Lebanon and the University of the South at Sewanee.

The Tennessee Mountains, like those of Kentucky, are beautiful, delightful summer resorts. Lookout Mountain, scene of a celebrated battle in the Civil War, is the object of chief interest in Nashville.

**TEXAS.**

Area, square miles ..... 265,896 ..... 1st in rank  
Population, 1920 ..... 4,068,288 ..... 6th in rank

Texas, of the West South Central group, up to 1836 part of Mexico, then an independent republic, becoming one of the United States on Dec. 29, 1845, is bounded on the north by New Mexico and Oklahoma, on the east by Oklahoma, Louisiana and the Gulf of Mexico, on the south by the Gulf

and Mexico, and on the west by Mexico and New Mexico. It is the largest State, embracing nearly 8 per cent. of the area of the whole country, and is about 800 miles long by about the same wide.

In the western part it is mountainous, the "Staked Plains" lying in the northwest, a great prairie in the central portion, and a lower lying region nearer to the Gulf. Western Texas is mostly without forestation, but in the east naturally there was a large wooded area, nearly 8,000,000 acres, materially reduced by extensive lumbering; the normal annual cut being more than 1,250,000,000 feet, mostly yellow pine.

In all lines Texas produces heavily. It is easily the third cotton State, the 1920 census returning 11,522,837 acres devoted to its culture, 2,971,757 bales the output. Rice was grown on 164,481 acres, yielding 5,306,369 bushels; 122,170 tons of sorghum came from 35,589 acres; 49,093 acres of vegetables were raised 6139 acres of small fruits, sugar cane, tobacco, most of the cereals, potatoes, the forage foods, and a large variety of other soil products.

The census reports Texas the only State in which the total of crops exceeds a billion dollars—\$1,071,542 103,—the total return from crops, fruits, livestock, lumber and oil and other minerals being more than \$1,500,000,000.

The farmland area was 113,580,000 acres, in 436,033 separate farms, of which 33,700,000 were improved acres, the value of all farm property being more than \$4,400,000,000. There are about 2,000,000 acres irrigable, and nearly 600,000 acres actually irrigated.

The corn crop was 156,920,000 bushels, and there was large production of wheat, oats, etc. Potatoes, white and sweet, yielded 11,500,000 bushels, and so on through the whole list.

The fruit production ranges from the varieties which are grown in the temperate zone to the semi-tropical kinds, and the pecan nut is a large crop.

The 12,000,000 domestic animals bring immense sums annually, the wool clip alone being from 15,000,000 to 20,000,000 pounds, with very heavy returns from cattle, horses, pigs and sheep, which range on the vast mid-western prairies, some of the ranches being of several hundred thousand acres. It leads the country in the cattle breeding industry.

The mineral resources of Texas are not yet defined. Development has wrought to yields of about 40,000,000 barrels of petroleum, according to the market demands (value of product in 1919 \$143,337,362), and its refining has become an important interest. Oil is found all the way from the northwest to the southeast on the Gulf, the field there being somewhat concurrent with that of Mexico. In the north and northwest, the formation runs with that of Oklahoma and Kansas, in all sections the content being rich.

More than 2,000,000 tons of coal were mined, and asphalt and pottery clay were important products, as also all the base minerals, silver, lead, quicksilver and copper being naturally present and somewhat developed as to production.

In the northwest the bed of a former inland salt sea contains the salts that appear in all sea waters, and the University of Texas at Austin and the United States Geological Survey have announced the discovery of potash, the work of proving the extent thereof being now in progress. The announcement in 1921 caused the usual rush of prospectors and speculators, with boom times resultant.

The 1920 census gave \$999,995,796 as the total value of all industrial products, there being 5,724 establishments, employing 130,911 persons, paying \$145,907,000 in wages and salaries, and using \$701,170,000 of materials, with \$585,776,000 of capital invested.

The three principal manufacturing industries were petroleum refining, \$241,757,000; meat packing, \$125,192,000; cottonseed oil and cake, \$102,122,000. Flouring mills brought in \$73,064,000; lumbering, \$47,884,000, with 60 other industries which totalled each more than \$500,000 of annual products. Cotton goods manufacture is not proportioned to the immensity of the cotton growing, the amount reported being \$13,920,000.

Texas leads in railroad mileage, having 16,125 miles in 1921, Houston being the most important railway centre, claiming 17 different lines. Transport is heavy to Galveston, the largest seaport of Texas, on the Gulf, 50 miles from Houston, and to New Orleans, with large tourist travel to and from the Pacific Coast.

Public school enrolment is about 1,125,000 for a population of 4,663,228 reported in the 1920 census. The University of Texas at Austin is well known, and has authority in many lines of research, especially in geology. There are a dozen other well established higher institutions.

The percentage of illiteracy was reported at 8.3; native white, 3; Negro, 17.8; foreign-born white,

33.8. The 249,652 Mexicans are the largest body of foreigners, communication across the international boundary line being in peace time constant and extensive.

Texas is a strange mixture of the old West and the progressive new South, the cowboy remaining in the western parts, and the eastern cities taking on modernities, with steady tendency toward the up-building of industry.

In the recent troubles with Mexico, there has been much disturbance on the border, but normally now Mexico is a source of wealth and prosperity to Texas. Galveston, the chief port, is expected to develop much vaster commerce than its already large tonnage. Galveston has a wonderful concrete seawall as protection against the fearful tidal wave and hurricane which swept it more than 20 years ago, practically destroying the city.

In late years, an automobile route has been popularized through Texas to the Pacific Coast, and efforts are making to improve the roads, not yet very facile for motor car passage.

In San Antonio, close to the border, the Alamo, a fortress defended to the death by the Texas patriots, is the chief point of interest to tourists, and in various places the visitor is shown battlefields on which the Lone Star State won freedom from Mexico.

## UTAH.

Area, square miles..... 84,990..... 10th in rank  
Population, 1920..... 449,396..... 40th in rank

Utah, of the Mountain group of the Far West, is bounded on the north by Idaho and Wyoming, on the east by Colorado, on the south by Arizona, and on the west by Nevada. It has several mountain ranges, which attain up to 12,000 feet elevation (the highest peak, Kings Mountain, 13,498 feet), the greater part of the State being a plateau 6,000 feet above sea level. The rivers are useful only for irrigation more than 1,300,000 acres being under water. The Great Salt Lake, salt being 20 per cent. of the fluid content, is in the northwest part, altitude 4,218 feet, and has no known outlet. The climate is dry, stimulating and wholesome, warm in summer, rather cold in winter, and the sky so clear that no cloud specks it on 300 days a year.

The value of all crops in the Census of 1920 was \$57,890,000, of which hay and forage led, with \$24,583,000, mostly alfalfa. All the temperate zone cereals are produced. Emphasis is placed on forage crops.

The fruit production ranges from temperate to sub-tropical zone varieties, which latter grow in the southern tier of counties.

The wool clip in the 1920 census was 11,690,239 pounds.

Mineral resources are most varied, including gold, silver, lead, manganese, copper, gypsum, petroleum, sulphur, zinc, salt and coal, the State ranking third in copper. The total value of mineral output given in 1920 was \$45,169,328. Coal was mined, 5,800,000 tons.

Production of uranium and vanadium, especially valuable, is the second in the Union.

Semi-precious stones are taken in large quantities, and a high grade of marble and onyx for building is quarried.

The manufactures consist mostly of smelting and refining of lead and copper, and the making of beet sugar, sugar beets being raised worth \$10,048,611, for \$30,427 tons. Manufactures are mostly in Salt Lake City and Ogden. The number of establishments was given as 1,159, capital \$143,366,000, wages paid \$21,396,000, and value of all products, \$156,804,000, for a population of 449,396, of which 48 per cent. was urban.

Railroad mileage, 1921, was 2,161.

Illiteracy is low, at 1.9 per cent.; native white three-tenths of 1 per cent., foreign-born 6.3 there being 56,455 of foreign birth, English most numerous. About 100,000 attend the schools, and higher educational institutions are becoming numerous and well established.

The distinguishing feature is the Mormon Church, the Latter Day Saints, as they call themselves, numbering three-fourths of all church membership. The Mormons came originally to Utah from the Midwest, being driven out by persecution, and journeyed to the territory when it was almost completely a wilderness, subduing it and building a social formation based on the domination of the Mormon Apostles and Bishops, with close inter-relationship between church and government, the tithing system being adopted.

Salt Lake City, the capital, has several celebrated structures built by the church, among them the great Tabernacle and the Temple.

The Great American Desert lies in the north-western corner of Utah, reaching over into Nevada.

## VERMONT.

Area, square miles ..... 9,504 ..... 42d in rank  
Population, 1920 ..... 362,428 ..... 45th in rank

Vermont, a New England State, is bounded on the north by Canada, on the east by New Hampshire, on the south by Massachusetts, and on the west by New York. Lake Champlain, more than 100 miles long, marks the western boundary line. The Green and Adirondic Mountains cross the State. The climate like its topography is rugged and characteristic of the north.

The 1920 census gives \$47,999,600 as the value of all crops, and \$168,159,000 as the value of all manufactures. Vermont has the largest value of dairy products per capita in the Union, the value being returned as \$27,162,984, and it leads all States in the production of maple sugar. Agricultural production takes a wide range, including even tobacco, and covers all the cereals suitable to the zone, with considerable fruits, apples predominating.

Known as "The Green Mountain State," its chief mineral wealth is in its quarries, leading all States in output of granite (value, 1919, \$3,563,734), marble (value, 1919, \$2,103,872), asbestos and talc, its granites and marbles having gained Nation-wide markets, some of the most celebrated buildings having been erected with them.

Railroad mileage, 1921, was 1,076.

Vermont is a popular resort in the summertime for persons from all Eastern cities, the mountain scenery being beautiful, and a system of roads being now in process of building up to modern standards. The shores of Lake Champlain, for 100 miles, afford excellent boating, and the area of the State teems with historic interest, having been the theatre of many battles in the former wars.

The illiteracy percentage is 3; native white 1.5, and foreign-born 11.3. Of the total population of 362,428 returned in the 1920 census, foreign-born numbered 44,526; Canadians, 24,868.

The University of Vermont and Middlebury College are the leading institutions of learning.

Vermont was the first State admitted after the adoption of the Federal Constitution.

## VIRGINIA.

Area, square miles ..... 42,687 ..... 53d in rank  
Population, 1920 ..... 2,509,187 ..... 30th in rank

Virginia, one of the South Atlantic, and one of the Thirteen Original States, is bounded on the north by West Virginia and Maryland, on the east by Maryland and the Atlantic Ocean, on the south by North Carolina, and on the west by West Virginia and Kentucky. Part of its original territory was taken in 1863, during the Civil War, to form West Virginia. On its eastern side, the great waterway, Chesapeake Bay, cleaves the State, cutting off a small portion between which and the main portion is the entrance past the Capes to the bay, and there are many rivers which flow into the bay, with navigation up the James, the York, the Rappahannock and the Potomac.

The topography is varied, beginning with the low lying lands along the coast, known as Tidewater Virginia, rising to an extensive tableland in the central part, and ending mountain elevations up to 3,700 feet in the west. In the northwestern corner is the rich Shenandoah Valley. The Potomac River bounds the State on the north, making off from the bay. The mountains are the Alleghenies, the Shenandoahs and the Blue Ridge. The climate is as varied as the topography, characteristic in each portion, cool in the higher elevations and rather warm in the lower.

Fundamentally, Virginia is agricultural, its manufacturing being based on utilization of the soil products and some of the minerals, with which the State is well endowed.

Railroad mileage in 1921 was 4,703.

The 1920 census gives \$292,824,260 as the value of all crops, Virginia being the third State in tobacco production, with 102,381,226 pounds, the culture of the plant having been first done by whites at Jamestown 300 years ago. The temperate zone grains, vegetables and fruits are grown in profusion. The corn crop was reported as 44,800,000 bushels, with peanuts, 5,282,000 bushels, the third largest in the Union.

Livestock husbandry has been in late years emphasized especially, effort being exerted to bring in pure blood strains. Much of the progress in this line is due to the incoming of many Northerners, who have taken over rural estates to obtain the social

advantage of the delightful country life of the Old Dominion State, which was of the flower of the old time era of the cavaliers.

The manufactures have an output running at more than \$800,000,000, and are growing in importance. Cotton goods especially are becoming great in volume, the mills having about 600,000 spindles, Virginia using much more raw cotton than it produces. The lumber but averages about 300,000,000 feet, and is unusually varied, including yellow pine, oak, gum, hemlock, cypress, chestnut, yellow poplar, cedar, tupelo, basswood, hickory, and walnut.

The tobacco and cigarette factories send their finished product across the earth, besides which large quantities of tobacco are sent to England and other European countries for manufacture there into cigarettes, cigars and smoking tobacco.

Manufacturing also comprehends extensive canning of fruits and vegetables, leather, coke, sawmill machinery, woodenware, pig iron, clothing, implements, silk and knit goods.

Mineral output includes coal, the State ranking ninth, with 9,500,000 tons; iron ore output, these figures from the 1920 census, being 320,000 tons, with all the basic crude minerals also produced, including large supplies of building minerals, and with salt, copper, lead and zinc produced. The mineral output averages about \$50,000,000 for 35 kinds mined.

In Hampton Roads the United States maintains a great navy yard, as the principal rendezvous of the navy, utilizing the James River as a chief anchorage.

In Newport News, on the James River, an extensive shipbuilding plant constructs vessels of many types, including warships of heaviest tonnage.

Norfolk has large shipping interests, and is one of the principal centres for the manufacture and distribution of land fertilizers.

Fortress Monroe, on the peninsula between the James River and Chesapeake Bay, has strong, modern fortifications, commanding all adjacent waters.

Near the fortress, large hotels, maintained for many years of Government-owned lands, have been mined for instant blowing up in the event of war, to remove obstruction to the range of the big guns.

The illiteracy percentage is 11.2, Census of 1920; native white, 5.9; foreign-born, 7.1; and Negro 23.5. The Negro constitutes 29.9 per cent. of the population, having fallen from 32.6 per cent. in 1910. As to illiteracy, no State offers a wider range of gradations, the older families showing very low percentage, and the mountain regions very high.

In higher educational institutions, Virginia ranks among the foremost States, having such well-known establishments as the University of Virginia, founded by Thomas Jefferson, at Charlottesville, from which many men famous in history have been graduated; Washington and Lee University, at Lexington; William and Mary College, the oldest in the United States, at Williamsburg; Virginia Polytechnic at Blacksburg; Virginia Military Institute at Lexington; Hampden-Sidney College at Hampden-Sidney, and Hampton Normal School at Hampton, the first well developed school for Negroes established in the South. More than 500,000 attend the public schools.

The "Old Dominion," first in population of the States until 1820, prides itself on its Revolutionary heroes, its five Federal Presidents, and its social prestige. It was the theatre of the decisive campaign in which the Civil War ended with the surrender at Appomattox of General Lee, head of the Confederate armies.

## WASHINGTON.

Area, square miles ..... 69,127 ..... 19th in rank  
Population, 1920 ..... 1,555,631 ..... 30th in rank

Washington, of the Pacific (Northwest) group, is bounded on the north by British Columbia, on the east by Idaho, on the south by Oregon, and on the west by the Pacific Ocean. It has the Columbia River as southern boundary line for 300 miles from the west, and many streams of importance, mostly for irrigation uses, with the Snake River in its eastern reaches. In the northwestern third of the State the great Puget Sound, with tortuous shores and innumerable harbors, on which Seattle, Tacoma, Everett, Olympia and other important cities are situated, is not excelled as a commercial terminus for rail and water.

The Cascade Mountains cut the western third from the State's area, with the usual lower mountain range nearer to the ocean shores. A dozen peaks, snowcapped, rise in the west. Mt. Rainier or Mt. Tacoma (according to which city you may be in

at the moment) is a beautiful attraction with its 14,408 feet of height, now a national park, and the Olympic range in the northwest is surpassingly beautiful.

Standing timber is about 330,000,000,000 feet; Douglas fir, yellow pine, white pine, spruce, larch, cedar and other trees abound. Normally, the State cuts more than 4,000,000,000 feet, leading all the States, and shipping the product all over the world, much coming to the North Atlantic States via the Panama Canal, and going by rail to the Central West, while Washington shingles are used throughout the whole northern half of the country.

The trees are magnificent, like those of Oregon, and with that State Washington leads all others in amount of timber remaining.

Agriculture is developing rapidly. All crops reported in the 1920 census were valued at \$227,212,000, and included all the cereals, vegetables, forage crops, and the fruit production is famous, the irrigated sections all the way from the south to the very border of Canada being prolific and yielding products demanded in all Eastern fair market. Every variety known to the temperate zone is produced; the fruit and nut crop, 1920 census, was worth \$51,662,000, apples alone being worth \$88,823,000.

The geology is the same as that of Oregon—arid and semi-arid lands in the east, interspersed with fertile portions, and in the west much rainfall with resultant profusion of vegetation.

East of the Cascades most of the wheat is grown, the crop being 41,837,000 bushels, with many sheep, cattle and horses. "Horse Heaven" is located on the banks of the Columbia in Eastern Washington. The wool clip runs above 5,000,000 pounds. The livestock interests is mostly in the east, where the great ranges are, with mild winters in the valleys, with winter grazing.

The 1920 figures on manufactures showed 4,918 establishments, employing 150,479 persons, with \$574,235,000 of capital, outputting \$809,622,000 of products, lumber and timber leading with \$220,512,000, steel shipbuilding next with \$140,980,000, flour milling with \$81,141,000, and meat packing with \$34,398,000; wooden shipbuilding and boat building yielding \$25,539,000. Forty-five other lines had more than \$900,000 of annual production.

All the basic minerals are present, coal being produced in considerable quantity (value 1919, \$10,737,656) and gold, silver, lead and zinc also.

Shipping is very extensive from Puget Sound ports to the Orient, and coastwise via the Panama Canal, and the bulk of the shipping to and from Alaska is handled on Puget Sound, which, in the years of the great Klondike goldfields rush, made of Seattle and Tacoma scenes of feverish activity. The salmon fisheries of the Washington sea waters are very extensive.

Railroad mileage, 1921, was 5,587.

In illiteracy, the State has a percentage of 1.7: native white, 3-10ths of 1 per cent.; foreign-born, 4.7. Foreign-born number 250,055, being 18.4 per cent. of the population, of which Japanese and Chinese are numerous.

About 300,000 attend the public schools, and the State University at Seattle, with several well established colleges, provide ample higher educational facilities.

The shores of Puget Sound are very popular as summer resorts, with many hotels and cottage colonies, while steamer tourist travel to and from Alaska is extensive.

## WEST VIRGINIA.

Area, square miles.....24,170.....40th in rank  
Population, 1920.....1,463,701.....87th in rank

West Virginia, of the South Atlantic group, was set off from the original State of Virginia. It is bounded on the north by Ohio and Pennsylvania, on the east by Pennsylvania, Maryland and Virginia, on the south by Virginia and Kentucky, and on the west by Kentucky and Ohio.

It is essentially mountainous, the Appalachian range having several spurs therein. Its western parts drain into the Ohio River, and its eastern portions down the Potomac River to the Atlantic Ocean. The mountains are in the east. The climate is moderate, and between the north and south extremes.

Mining is the leading activity, the State ranking second in the production of coal, with 75,500,000 tons as the production reported in the 1920 census. Some of the finest steaming coal in the world is produced, especially the Pocahontas. It ranks first in output of natural gas, gaining about \$40,000,000 annually therefrom. In petroleum output

it ranks eighth. All of the base minerals are present in abundant supply, and the total mineral output runs above \$200,000,000. It is in West Virginia that for years industrial disturbances have upset production and affected political and social conditions, being now the subject of Federal inquiry that final settlement may be effected amicably to both sides.

West Virginia produces more hardwood than any other State, excepting Arkansas, and has vast timber wealth, including yellow poplar, birch, ash, oak, spruce, hemlock and walnut.

Its agriculture is not so important, total value of all crops reported in the 1920 census being \$96,537,000, the leading crops being corn, hay, tobacco, potatoes, and fruits of all kinds suitable to the zone.

Its transport by water is abundantly served with the Ohio River on the west. Railroad mileage, 1921, was 3,996.

Its illiteracy percentage is 6.4: native white, 4.6; Negro, 15.3; and foreign-born, 24. Negroes are 5.9 per cent. of the population, and foreign-born 4.2. Public school enrolment was reported at 360,000, and there are many colleges, church denominational schools being numerous; industrial schools also.

In recent years many Northerners have gone to the State to take country homes in the mountains. White Sulphur Springs in the eastern part is one of the most celebrated pleasure resorts, popular socially, and with a famous golf course on which some of the greatest golfers have played.

## WISCONSIN.

Area, square miles.....56,068.....25th in rank  
Population, 1920.....2,632,067.....15th in rank

Wisconsin, of the East North Central group, is bounded on the north by Lakes Superior and Michigan, on the east by Michigan and Lake Michigan, on the south by Illinois and Iowa, and on the west by Iowa and Minnesota. The Mississippi River forms the southern half of the western boundary line. It has the characteristic climate of the northern tier of States, cold in winter and pleasant in summer, dry and stimulating.

The value of the total manufactured product at about \$1,000,000,000 exceeds that of all crops reported in the 1920 census at \$445,347,868, although its agricultural activities are vitally important and thorough, a large proportion of foreigners from thrifty countries having attained high grade tillage. The mineral production also is large.

Railroad mileage, 1921, was 7,554.

Everything grown in the north temperate zone is produced, in grains, vegetables and fruits, agriculture being especially well diversified—corn, wheat, rye, barley, hay, flaxseed, potatoes, sugar beets, with considerable quantities of tobacco for cigar wrappers, hops, peas, sorghum and maple syrup. More peas are canned than in any other State, and more hemp raised. The grape production is very large, and the output also of cranberries, apples, cherries and plums.

Manufactures include the most lumber cut in the Great Lakes region. The State has the most creameries of any State, refines much beet sugar, makes much woodwork and implement products, considerable pig iron output, ranks fifth in zinc production, fourth in iron ore output, the valuable hematite kind chiefly, and the fisheries on the lakes are highly productive, the whitefish being highly valued.

The story of Wisconsin forests, as of all of the Lake States, is tragic. Naturally almost the entire State was covered with pine, hemlock, and the invaluable hardwoods. Lumbering proceeded without regard to conservation, until more than 8,000,000,000 feet were cut annually; production on account of the exhaustion of the supply then falling off, until the 1920 census reported the cut as 1,275,000,000 feet, with an estimated stand remaining of about 2,500,000,000 feet. There are therefore enormous areas of now useless cut-over forest lands, with comparatively scattered timber tracts left.

Superior, at the head of Lake Superior, opposite Duluth, is the main terminus of the Great Northern Railway, and has great ore, lumber, wheat and coal dockage, with considerable manufacturing of iron products.

Of the 2,632,067 population shown by the 1920 census, the number of foreign-born was 460,128, or 17.5 per cent., Germans numbering 151,250.

The percentage of illiteracy was 2.4, against 3.2 in 1910. The native white illiteracy in 1920 was 7-10ths of 1 per cent.; foreign-born, 8.4; Negro, 4.1.

The University of Wisconsin at Madison is especially far advanced in sociologic research, domestic science and the practical arts. The 1920 matricula-

tion was 10,155, including the summer school; and a correspondence course is conducted by which 16,554 persons are instructed. There are besides many colleges and smaller schools.

Wyconsin has been and is the scene of intense political battles and advanced social experiments, of which Robert Marion La Follette has been the leader, as Governor and United States Senator. It has a large percentage of foreign-born and foreign-extracted population, with numbers of Socialists.

The Great Lake shores contain many pleasure resorts, while the smaller lakes of the State are also popular with summerers, fishing being prime, and hunting in the fall.

## WYOMING.

Area, square miles.....97,914.....8th in rank  
Population, 1920.....184,403.....45th in rank

Wyoming, a Mountain Group State, is bounded on the north by Montana, on the east by North Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah, Idaho and Montana. It is a lofty region, its mean elevation about 6,000 feet—a broad plateau traversed by the Rocky Mountains, highest point of which is Mt. Gannett, 13,785 feet. Topography is varied.

Its waters flow in all directions, drainage by the Green River to the southwest, by the Yellowstone and Snake Rivers to the northwest, by the Big Horn to the north, and by the North Platte, Sweetwater and Laramie Rivers to the southeast, none of them navigable. Theriver waters are however valuable for irrigation, more than 1,200,000 acres being actually under irrigation, and an area of nearly 2,700,000 acres being included in irrigation projects which are under construction.

The climate is that of the rarefied air of high elevations, and is salutary, with severe winters and pleasant summers, moisture precipitation being low at about 12 inches mean annually.

With less than 200,000 population reported in the 1920 census more than \$50,000,000 was assigned as the value of all crops, hay the leader, mostly alfalfa, and corn, potatoes, oats, wheat, rye and barley also produced.

Stock raising is the most important industry, sheep husbandry being the second in rank in the United States, the wool clip reported at 33,000,000 pounds.

Mineral resources are extensive, coal production, 1920, 8,928,000 tons; copper of considerable quantity, and petroleum high with 16,600,000 barrels. Petroleum mines are known to be very great. Gold, silver, iron ore, platinum ore and all the base minerals abound, with vast development assured for the future.

Manufactures are practically all for home consumption.

Railroad mileage, 1921, was 1,931.

The 1920 census reported the percentage of illiteracy as 2.1; native white, 3-10ths of 1 per cent; foreign-born, 9. There were 25,255 foreign-born, mostly from Europe.

The 1920 school enrolment was 47,552. The University of Wyoming at Laramie had 913 students.

The Yellowstone National Park in the northwest corner is one of the world's most famous resorts for the tourist, its giant geysers, waterfalls and high coloration of the rugged gnarled rocks attract heavy travel from all parts of the country and from foreign lands.

The ranch life retains much of the old time flavor of the West, and many Easterners go there to enjoy it. The annual cowboy roundup at Cheyenne attracts many

## ALASKA, TERRITORY OF

AREA, 590,884 square miles (including the Aleutian Islands).

POPULATION, Census of 1920, 54,899 (27,883 whites, 26,421 Indians and Eskimos).

CAPITAL, Juneau, population, 1920, 3,058.

Governor, Scott C. Bone, 1921-24, appointed June, 1921.

Consuls maintained at Juneau by Norway; at Nome by Russia (Consul General) and Sweden; at Skagway by Great Britain.

Alaska occupies the northwestern part of the North American continent. It is bounded on the north by the Arctic Ocean, on the west by the Arctic and Bering Sea, on the south by the North Pacific Ocean and on the east by Canada. From the south-

western corner the Aleutian Islands stretch out westward 1,200 miles to longitude 172° E. Cape Wrangell, facing Siberia, Bering Strait, 54 miles wide, separates the mainland of Alaska from Asia. The "Fairbanks" runs southward 600 miles along the Pacific to Dixon Inlet, and includes all the islands, the boundary with Canada along the mountain crests being fixed by arbitration in 1903, international survey completed, 1913.

Alaska, then sparsely colonized by Russian trappers and Indian traders, was bought from Russia by Secretary W. H. Seward, by the treaty of March 30, 1867, for \$7,200,000. It was made a Territory by the act of Aug. 24, 1912, which gave it a Legislature elected by direct vote and a Governor, appointed for four years by the President. Congress reserves the right to legislation on certain subjects.

Alaska is mountainous with high plateaus; the coast range extends through the southern part, the chief peaks being Mt. St. Elias (alt. 18,024 ft.), Mt. Wrangell (14,005 ft.) and further inland Mt. McKinley (20,300 ft.), the highest peak on the North American continent. There are more than a dozen active volcanoes, notably Mt. Katmai now with the "valley of 10,000 smokes" a national monument. Mt. Katmai which had been dormant, suddenly blew the top of its head off June 6, 1912—one of the greatest eruptions in history. The mountains and the Sitka district are densely timbered, mainly coniferous, but the islands are treeless. The most notable trappers are the Muir, Malaspina and Seward.

The Yukon is the chief river, 2,000 miles long, navigable for about 1,800 miles. The length of the coast line is about 4,750 miles, including islands 26,364 miles. There are many excellent harbors, one Dutch Harbor, Unalaska Island, being of great naval importance.

There is great diversity in climate. In the interior a temperature of 60° below zero in winter is not unusual, with a temperature of 90° in the summer, but on the coast owing to the Japanese current the thermometer rarely falls below zero in the winter with a maximum of about 80° in the summer. Rain there is abundant. All the hardier vegetables and the cereals, except corn, thrive during the short summer with its long hours of sunlight. Of the 378,165,760 acres the census of 1920 reported 90,652 in 364 farms, 5,836 acres only being under cultivation.

Reindeer were introduced from Lapland and from Siberia to insure the support of the Eskimos by the Government, which brought in 1,200 head between 1892 and 1902. These increased under careful handling to 22,107 in 1910, 92,938 in 1920 (valued at \$2,238,502) and (estimated) 216,000 in 1922. Some reindeer meat has been successfully exported. Fur farming also is on the increase, especially of foxes, the export of fox skins in 1919 being about \$800,000.

The killing of seals on the Aleutian Islands having been brought under control in 1910 and pelagic sealing prohibited by treaty in 1911, the seal herds have increased from 215,000 to 524,000 in 1919; 1919-20, 30,498 dressed sealskins, valued at \$1,509,600, were shipped to the United States. The shipment for 1920-21 was 24,889, valued at \$895,660, and for 1921-22, 26,293, valued at \$1,005,175.

Fishing is an important industry; in 1920, 788 vessels were engaged in it; 27,482 persons were employed, \$70,986,221 capital was invested and the value of the products was \$41,492,124. The salmon pack weighed 211,004,976 pounds, valued at \$37,050,212.

Since the discovery of gold at Juneau in 1860 (the great Klondike rush through Skagway into Canadian territory and the Upper Yukon began in 1896) up to January, 1921, Alaska has produced \$320,000,000 of gold, nearly two-thirds of it from placer mines. Copper (\$127,000,000) and other metals produced bring the total yield up to \$460,000,000. The U. S. Geological Survey estimates the value of the placer gold reserve to be at least \$360,000,000, this in addition to gold in veins that could not be estimated. There are large coal deposits, which are not yet fully developed. The coal by U. S. Navy has been found equal in steaming value to Pocahontas coal.

Congress in 1914 authorized the building of a railroad not to exceed 1,000 miles in length. The line is in operation from Seward to Fairbanks, 467 miles; with spurs to coal mines that brings the total up to 541 miles. The cost at wartime prices exceeded \$52,000,000. The rest of the system it is expected will be finished in 1923.

Merchandise passing through the port of Juneau to and from foreign countries was:

| FISCAL YEAR: | Exports.    | Imports.    |
|--------------|-------------|-------------|
| 1920-21..... | \$1,627,579 | \$1,099,161 |
| 1921-22..... | 1,441,810   | 1,202,525   |

Alaska's commerce with the United States for the last three fiscal years, ending June 30, was:

| FISCAL YEAR. | Exports to U. S. | Imports from U. S. | Gold Shipments. |
|--------------|------------------|--------------------|-----------------|
| 1919-20....  | \$66,498,871     | \$33,998,462       | \$3,793,085     |
| 1920-21....  | 54,126,718       | 27,333,972         | 7,072,114       |
| 1921-22....  | 36,775,810       | 23,625,161         | 6,881,020       |

## HAWAII, TERRITORY OF

AREA, 6,449 square miles (Hawaii, 4,016 square miles; Oahu, 598; Maui, 728; Kauai, 547; Molokai, 261; Lanai, 140; Niuhau, 73; Kahoolawe, 44, Molokini, 2.7).

POPULATION, Census of 1920, 255,912. CAPITAL, Honolulu, population, 83,327; other city, Hilo, 10,431.

Governor, Wallace R. Farrington (1921-24) assumed office, July 5, 1921.

Consuls are maintained at Honolulu by Belgium, Brazil, Chili, China, Denmark, France, Great Britain, Italy, Japan (Consul General), Mexico (vacant), The Netherlands, Norway, Panama, Peru, Portugal, Russia, Spain (vacant), and Sweden (vacant).

The Hawaiian Islands—the crossroads of the Pacific—are twenty in number of which nine are inhabited, lying in the North Pacific Ocean in longitude 154° 40'—160° 130' west, latitude 12° 16'—18° 55' north, and more than 2,000 miles from the nearest mainland. The group extends for 390 miles from northwest to southeast. San Francisco is distant 2,089 miles; Panama, 4,640; Auckland, N. Z., 3,800; Manila, 4,350; Hongkong, 4,950; and Yokohama, 3,440.

The islands are mountainous and volcanic in origin, filled with extinct craters, Haleakala on Maui being the largest in the world. On the island of Hawaii is Mauna Kea (altitude 13,823 feet) quiescent, and Mauna Loa (altitude 13,765 feet) active. Sixteen miles east of the latter is the largest active volcano in the world, Kilauea (altitude 4,400 feet) with its "pit of eternal fire." The last eruption was in March, 1921, and the island is scarred with many lava flows.

The islands are clothed with luxuriant tropical vegetation; with abundant rainfall and cooled by the prevailing northeast trade winds the climate is perpetual summer without enervating heat. The higher elevations of the mountains are covered with forests, and 820,000 acres are set apart as a forest reserve. The soil is very fertile and all tropical and sub-tropical fruits and vegetables are grown. The farms number (1920) 5,284, valued at \$151,129,085, with 2,702,245 acres, of which 435,242 were improved and 599,531 in woodlands. Of the 5,284 farmers 892 were white (627 owners, 679 Hawaiian (548 owners), 3,098 tenants (188 owners, 11 managers, and 2,899 tenants) and 560 Chinese (556 owners, 7 managers, and 497 tenants). In 1919 29,571,845 pounds of rice were produced and 19,883,650 pounds of coffee; 86 farms reported (1920) 1,407 breadfruit trees that produced a crop of 101,268 breadfruit. Banana cultivation has been pushed, 160,953 bunches being produced in 1919.

The largest industry of the islands is the growing of sugar cane and the production of raw sugar. The value of the sugar produced in 1919 was \$30,236,000, from 123,165 acres. The yield per acre is larger than any other country; about five tons of sugar per acre on an average; irrigated land yielding 70 per cent. more than unirrigated. The employees on the sugar plantations, about 45,000 in number of many nationalities, receive house fuel, water and medical attendance free and are paid a basic monthly wage and a bonus, which varies with the price of sugar. In 1920 the minimum basic wage was \$20 and the bonus, extraordinarily large, was 276 per cent. of the wage. For 1921 the bonus was \$30. Much welfare work is done.

The second largest industry is the growing and canning of pineapples. The product increased 1,094 per cent. in the 1909-1919 decade and in 1920 14,473,536 two-pound cans valued at approximately \$31,000,000 were produced. About 46,000 acres are under cultivation.

Hawaii exported to the United States in 1921 raw sugar valued at \$46,693,305 and canned pineapple, \$19,905,416. Imports from the United States were chiefly iron and steel manufactures, mineral oil, breadstuffs, meat and dairy products, lumber, textiles, etc., fertilizers, automobiles, rubber goods, leather and paper.

Honolulu, on the island of Oahu, is the capital and chief commercial city and port of the islands. It has a fine natural harbor which needs improvement and development. Its needs have been neglected by Congress which alone can appropriate the money for them. The customs receipts, Federal income and other taxes paid to Washington by the Territory amount to about \$25,000,000 yearly. The Federal Government maintains a large army post on the islands with quarters for a division of 30,000 men at Schofield Barracks and the subsidiary forts. The Navy Department has a large base at Pearl Harbor with drydock, opened Aug. 31, 1919. There are also a large aviation field and a powerful radio station.

Hawaii has an excellent system of roads, and in Honolulu much concrete construction is used. The islands have approximately 350 miles of steam railroads besides about 625 miles on the sugar plantations. In the fiscal year 1920-21, 1,601 ships with a tonnage of 6,008,689 entered the ports of the islands.

The native population of Hawaii at the time of the discovery has been estimated at about 200,000. With civilization it has dwindled and the race seems destined to disappear through intermarriage with other stocks rather than by deaths. Of the total population of 255,912 reported by the Census of 1920, there were, Hawaiians, 23,723; part-Hawaiian, 18,027; Portuguese, 27,002; Porto Rican, 5,602; Spanish, 2,430; other Caucasian, mostly American, 19,708; Japanese, 109,274; Chinese, 23,507; Filipino, 21,031; Korean, 4,950; Negro, 303.

Hawaii came under the influence of American missionaries in 1820, and a large proportion of the natives embraced the Christian faith. The impetus given to education was great, and elementary education has always been free. The language in general use in the schools is English. The Japanese have many so-called Buddhist schools, which their children attend in addition to the American schools. The school plants, both public and private, are of very high order. The University of Hawaii is State supported. The Bishop Museum at Honolulu is a scientific institution of the first order devoted especially to the preservation of the life of the native Hawaiians and to the study of the ethnology of Polynesia.

Pan-Pacific conferences on vital matters have been promoted during the last three years with great success; and the islands are yearly welcoming increasing numbers of tourists, being well favored with steamship communication.

The Hawaiian Islands were discovered by Capt. Cook in 1778, and there he met his death on his second visit in 1779. King Kamehameha brought the islands under one rule in 1791. The rule of his dynasty, which became a constitutional monarchy in 1840, ended when a revolution drove Queen Liliuokalani from the throne in 1893. An attempt to secure annexation to the United States failing, a republic was proclaimed July 4, 1894. On the outbreak of the Spanish-American War Hawaii was annexed to the United States by a joint resolution of Congress, July 7, 1898, and created a Territory by the act of April 30, 1900.

The chief executive officer of the Territory of Hawaii is the Governor, who is appointed by the President with the approval of the Senate for a four-year term, and who must be a resident of the islands in order to be eligible for appointment. The Territorial Secretary is appointed in the same manner, but the heads of the territorial departments are appointed by the Governor, with the approval of the Territorial Senate.

The Legislature of Hawaii consists of the Senate of 15 members, elected for four-year terms; and the House of Representatives, of 30 members, elected for two-year terms. The Delegate to Congress is elected every two years, and has floor privileges in the House, but no vote.

The judiciary consists of a Supreme Court, four Circuit Courts and numerous District Courts. The Justices of the Supreme Court and Circuit Courts are appointed by the President, with the approval of the United States Senate.

Hawaii's commerce with the United States is as follows:

| FISCAL YEAR. | Exports to U. S. | Imports from U. S. |
|--------------|------------------|--------------------|
| 1919-20..... | \$142,246,003    | \$59,261,621       |
| 1920-21..... | 127,692,379      | 77,324,114         |
| 1921-22..... | 68,335,073       | 51,581,621         |

The revenue of the Territory is derived from real and personal taxation, etc. For the fiscal year 1920-21 the receipts were \$9,553,450, expenditures, \$8,338,041; with a cash surplus of \$4,392,557.

## Dependencies of the United States.

### THE PHILIPPINE ISLANDS.

AREA, 114,400 square miles.

POPULATION, Census of 1918, 10,350,730.

CAPITAL, Manila, (Luzon), pop. 1918, 283,613 (summer capital Baguio, pop. 5,462) other cities, Cebu, pop. 65,300; Albay (Luzon), pop. 53,105; Iloilo, (Panay), pop. 47,808; Batangas (Luzon), pop. 41,182; Ormoc (Leyte), pop. 38,247; Laoag (Ilocos Norte), 38,294; Baybay (Leyte), pop. 36,934.

Governor General, Major Gen. Leonard Wood, appointed February, 1921; assumed office Oct. 5, 1921; resigned, to take effect Jan. 1, 1923.

Consuls General maintained at Manila by China, Great Britain, Japan, Mexico, The Netherlands and Spain. Consuls maintained at Manila by Argentina, Belgium, Brazil, Chile, Denmark, France, Italy, Liberia, Mexico (vacant), Nicaragua, Norway, Peru, Portugal, Russia, Sweden and Switzerland; at Cebu and at Iloilo by Great Britain, The Netherlands, Norway and Spain.

The Philippine Islands, the largest island group in the Malay Archipelago, were discovered by Magellan in 1521 and conquered by Spain in 1542; they were ceded to the United States by the treaty of Paris (Dec. 10, 1898) following the Spanish American War. Admiral Dewey had destroyed the Spanish fleet in Manila Bay, May 1, 1898, and Major Gen. Wesley Merritt had captured the City of Manila on Aug. 13, 1898.

The land area of the islands lies between 21° 10' and 4° 40' north latitude and between 116° 40' and 126° 34' east longitude. There are 7,083 islands extending 1,152 statute miles from north to south and 682 miles from east to west. Of this number 462 have an area of 1 square mile or over; 2,441 are named and 4,642 unnamed. The largest, Luzon, contains 40,814 square miles, and Mindanao, the next, 36,906. Panay is 4,448, Cebu, 1,935; Palawan, 4,500; Mindoro, 3,794; Bohol, 1,534; Masbate, 1,255. Between and about like the other groups including the Sulu or Jolo Islands in the south, the Babuyanes and Batanes in the north, the Catanduanes in the east, Culion in the west. Population by the Census of 1918 was 10,350,730, of which all but about 62,000 were Filipinos. There were 5,776 Americans, 43,802 Chinese, 7,806 Japanese, 3,945 Spanish, 1,148 Britons, 286 Germans, 182 French, 125 Swiss. In Manila in 1918 there were 3,124 Americans.

The archipelago has a coast line of 11,444 statute miles which exceeds that of the entire United States. There are 21 fine harbors and 8 landlocked straits, the principal being Manila, Subic, Batangas, Tayabas and Hondagua, Iligan, Ilana, Nasipit, Sibuguey, Sarangani Bays; the Gulfs of Lingayen, Ragay, Lagonoy and Davao, and the San Bernardino, San Juanico, Surigao and Basilan Straits and the Verde Passage. Manila Bay, with an area of 770 square miles, and a circumference of 120, is the finest in the entire Far East. It is a roadstead in all parts of which vessels can anchor, but a breakwater has been constructed for vessels to shelter behind in bad weather. Manila, Cebu, Iloilo, Zamboanga, and Jolo are the ports of entry.
